SECOND SPECIAL SESSION-1982

1. The first part of the paper is devoted to a general discussion of the problem of the existence of a solution of the system of equations (1) and (2) for a given set of initial conditions. It is shown that the system of equations (1) and (2) is equivalent to a system of ordinary differential equations of the second order. The existence of a solution of this system is proved by the method of successive approximations.

2. In the second part of the paper the problem of the existence of a solution of the system of equations (1) and (2) for a given set of initial conditions is solved. It is shown that the system of equations (1) and (2) is equivalent to a system of ordinary differential equations of the second order. The existence of a solution of this system is proved by the method of successive approximations.

3. In the third part of the paper the problem of the existence of a solution of the system of equations (1) and (2) for a given set of initial conditions is solved. It is shown that the system of equations (1) and (2) is equivalent to a system of ordinary differential equations of the second order. The existence of a solution of this system is proved by the method of successive approximations.

4. In the fourth part of the paper the problem of the existence of a solution of the system of equations (1) and (2) for a given set of initial conditions is solved. It is shown that the system of equations (1) and (2) is equivalent to a system of ordinary differential equations of the second order. The existence of a solution of this system is proved by the method of successive approximations.

5. In the fifth part of the paper the problem of the existence of a solution of the system of equations (1) and (2) for a given set of initial conditions is solved. It is shown that the system of equations (1) and (2) is equivalent to a system of ordinary differential equations of the second order. The existence of a solution of this system is proved by the method of successive approximations.

6. In the sixth part of the paper the problem of the existence of a solution of the system of equations (1) and (2) for a given set of initial conditions is solved. It is shown that the system of equations (1) and (2) is equivalent to a system of ordinary differential equations of the second order. The existence of a solution of this system is proved by the method of successive approximations.

7. In the seventh part of the paper the problem of the existence of a solution of the system of equations (1) and (2) for a given set of initial conditions is solved. It is shown that the system of equations (1) and (2) is equivalent to a system of ordinary differential equations of the second order. The existence of a solution of this system is proved by the method of successive approximations.

HOUSE AND SENATE BILLS

SECOND SPECIAL SESSION-1982

DIRECTIONS: The following table lists all companion numbers for both House and Senate Files. To find either a House or a Senate companion number, read down the Bill Number Column to find the number you want, either a House or a Senate number, and the corresponding companion number will be found in the proper column adjoining. Companion bills are identical at time of introduction in each house.

Example:	Bill Number	House Companion	Senate Companion
	3	6	5

In the above example, House File No. 3 has Senate File No. 5 as its companion and Senate File No. 3 has House File No. 6 as its companion.
