S.F. No. 388: A resolution memorializing the President and Congress to establish a multimodal demonstration project on the interstate highway 35W corridor.

Reports the same back with the recommendation that the resolution be amended as follows:

Page 1, delete lines 5 to 25 and insert:

“WHEREAS, activities have been undertaken, including the preparation of a draft environmental impact statement, which may eventually lead to a major highway construction project in the corridor of interstate highway 35W in the cities of Minneapolis, Richfield, Bloomington, and Burnsville; and

WHEREAS, these activities have generated apprehensiveness in established residential neighborhoods concerning the potential disruption which a major construction project would produce; and

WHEREAS, the interstate highway 35W corridor presents an opportunity to deal with urban freeway traffic congestion in a creative manner which could avoid the necessity of adding new freeway lanes; and

WHEREAS, the use of intensive traffic management techniques, accident reduction and mitigation strategies, and increased transit use through existing and new modes hold the potential of substantially expanding the corridor’s capacity for moving traffic without disruptive new construction; and

WHEREAS, the Congress of the United States has once before recognized a unique transportation situation in the Twin Cities metropolitan area by authorizing federal funding in a “high density urban highway intermodal transportation connection” demonstration project in the trunk highway 55 corridor in the city of Minneapolis; and

WHEREAS, the use of flexible highway design standards in the interstate highway 35W corridor would test whether a combination of new and enhanced transit and new and intensive traffic management techniques can succeed in making extensive new highway construction unnecessary by reducing the need for increased highway capacity; and

WHEREAS, the use of flexible highway design standards in the interstate highway 35W corridor would encourage the implementation of transit and shared ride facilities such as high occupancy vehicle lanes and bypasses of freeway meters, and allow for flexibility in implementing the stages of the project; and

WHEREAS, using flexible design standards could result in substantial cost savings for both the state and federal governments as well as avoiding the many adverse results of new urban freeway construction; NOW, THEREFORE,

BE IT RESOLVED by the Legislature of the State of Minnesota that the Congress of the United States is urged to enact, and the President of the United States is urged to approve, legislation authorizing the State of Minnesota to use flexible design standards in a reconstruction of interstate highway 35W between the common section of interstate highways 35W and 94 and the intersection of interstate highways 35W and 35E.

BE IT FURTHER RESOLVED that any federal funding made available for use in highway reconstruction in the interstate highway 35W corridor be taken from federal aid which would otherwise be available to Minnesota under the federal interstate reconstruction, resurfacing, restoration, and rehabilitation program.

BE IT FURTHER RESOLVED that the Secretary of State of the State of Minnesota is directed to prepare certified copies of this resolution and to transmit them to the President of the United States, the President and Secretary of the United States Senate, the Speaker and Chief Clerk of the United States House of Representatives, and to Minnesota's Senators and Representatives in Congress."
