v Function of the Pension Commission

- The Pension Commission is a joint agency of the Minnesota Legislature.
- The Pension Commission performs five major functions:
 - i) reviews and makes recommendations to standing legislative committees on pending proposed public pension legislation;
 - ii) conducts ongoing research on pension policy issues;
 - iii) provides legislative oversight for Minnesota's system of over 700 public employee pension plans;
 - iv) arranges for and oversees the preparation of regular actuarial valuations and periodic experience studies of the statewide and major local public pension plans; and
 - v) assesses the sufficiency of current public pension plan funding and recommends required modifications.
- The Minnesota Pension Commission is one of almost two dozen state pension commissions nationwide.

v Creation of the Pension Commission

• Initially established as an Interim Commission

1943 (Laws 1943, Chapter 449)
1955 (Laws 1955, Chapter 829)
1957 (Extra Session Laws 1957, Chapter 13)
1959 (Extra Session Laws 1959, Chapter 82)
1963 (Laws 1963, Chapter 888, Section 9)
1965 (Laws 1965, Chapter 888, Section 5)

- No Pension Commission was established during the 1961-1963 Biennium
- Pension Commission established as a permanent entity in 1967 (Laws 1967, Chapter 549; coded as Minnesota Statutes, Section 3.85)
- Pension Commission is the oldest extant Minnesota Legislative Commission

Legislative Commission on Pensions and Retirement Composition

Composition of the Pension Commission ν

- The Commission consists of five members of the House of Representatives and five members of the Senate
- The House members of the Commission are appointed by the Speaker of the House
- The Senate members of the Commission are appointed by the Subcommittee on Committees of the Senate Rules Committee
- 98 legislators have served on the Commission 1943-2003, during 242 two-year terms*

(* includes mid-term vacancies that were filled)

• Length of service by Commission members 1943-2003:

1 Year	3 Members	3.06%

Greater Minnesota	41	41.83	102	42.15

v Operation of the Pension Commission

- The Commission Chair sets the general direction of the Commission.
- The Commission Chair has a two-year term.
- The Commission Chair alternates between the House and Senate membership; the Chair and other Commission officers are elected from and by the Commission membership.
- After appointment, the Commission typically meets weekly during the Legislative Session until the initial committee bill hearing deadline.
- During the Interim, the Commission typically meets monthly.
- By longstanding agreement, the House and Senate committees with jurisdiction over pensions refrain from hearing proposed pension legislation until receiving a recommendation from the Commission.
- The Commission recommendation of proposed pension legislation requires a majority vote of the total commission membership of both the House and the Senate; all other Commission actions require simple majority vote of Commission members In attendance.
- The Commission recommendation on proposed pension legislation is typically accompanied by Commission-approved amendments.
- Commission recommended proposed pension legislation is typically consolidated into one or a small number of "Omnibus" Pension Bills.
- Commission recommended proposed pension legislation affecting pension benefits is typically accompanied by an actuarial cost estimate, generally prepared by the Commission-retained actuary.

v Staffing of the Commission

• The Commission employs a permanent staff of 3.5 positions.

Actuarial Resources

- The actuarial work for most Minnesota defined benefit plans is prepared by a consulting actuarial firm retained jointly by the seven largest retirement systems.
- The Commission can utilize the services of the jointly retained actuary.

v General Level of Public Pension Legislation

- Historically, an average of 78 public pension bills are introduced annually
- Commission typically reviews 85 percent of proposed pension legislation introduced
- Typically, 40 introduced public pension bills annually are ultimately heard in some form by standing committees
- Proposed pension legislation typically covers a broad range of plans and circumstances:

25 percent related to major statewide plans

13 percent related to minor statewide plans

- 6 percent related to local general employee plans
- 15 percent related to police and paid fire pension plans

8 percent related to volunteer fire relief associations

20 percent related to individual or small group requests

13 percent related to miscellaneous pension topics

I. Preamble

The Legislative Commission on Pensions and Retirement recommends the following statement of principles, which have been developed since 1955, as the basis for evaluating proposed public pension legislation. Problems can be avoided or minimized if a sound set of principles is used as a guideline in developing the various public pension funds and plans.

II. Substantive Principles

A. Purpose of Minnesota Public Pension Plans

- 1. Minnesota public pension plans exist to augment the Minnesota public employer's personnel and compensation system by assisting in the recruitment of new qualified public employees, the retention of existing qualified public employees, and the systematic outtransitioning of existing public employees at the normally expected conclusion of their working careers by providing, in combination with federal Social Security coverage, personal savings and other relevant financial sources, retirement income that is adequate and affordable.
- 2. Minnesota public pension plans should play their appropriate role in providing financial security to public employees in retirement.
- 3. As Minnesota public employee workforce trends develop, Minnesota public pension plans should be sufficiently flexible to make necessary adaptations.

B. Structure of Minnesota Public Pension Coverage

- 1. Creation of New Pension Plans
 - a. Minnesota public employers, on their own initiative, without legislative authorization, should not be permitted to establish or maintain new public pension plans, except for volunteer firefighter relief associations.
 - b. New pension plans for volunteer firefighters should be organized on a county or comparable regional basis if possible.
- 2. Mandatory Public Pension Plan Membership

To the extent possible, membership in a public pension plan should be mandatory for the personnel employed on a recurring or regular basis.

<u>Consolidation of Public Pension Plans by a Minnesota Public</u> <u>Employer</u>.

- a. The State, with the second largest number of public employee pension plans in the nation, would benefit from a more rational public pension plan structure,
- b. The voluntary consolidation of smaller public pension plans should be encouraged, with the development of county or comparable regional public employee pension plans in place of a large number of small local plans to assist in this consolidation if a statewide public pension plan is deemed to be inappropriate.

C. Pension Benefit Coverage

- 1. <u>General Preference for Defined Benefit Plans Over Defined</u> Contribution Plans
 - a. Defined benefit plans, where they currently exist, should remain as the primary retirement coverage for Minnesota public employees.
 - b. Defined contribution plans are particularly appropriate where interstate portability or private sector-public sector portability is a primary consideration of the public employee group, where the public employee group lacks civil service or analogous employment protections, or where the defined contribution plan is a supplemental pension plan.

2. Social Security Coverage

Except for public employees who are police officers or firefighters, coverage by the federal Old Age, Survivors, Disability and Health Insurance (Social Security) Program should be part of the retirement coverage for Minnesota public employees.

3. Equal Treatment Within Pension Plans

There should be equal pension treatment of public employees in terms of the relationship between benefits and contributions.

4. Appropriate Normal Retirement Ages

The normal retirement age should be set in a reasonable relationship to the employability limits of the average public employee and should differentiate between regular public employees and protective and public safety employees.

5. Appropriate Early Retirement Reductions

Public employee pension plans should not subsidize early retirement benefits and, except for appropriately designed early retirement incentive programs, retirement benefits should be actuarially reduced for retirement before any applicable normal retirement age.

6. Uniformity and Equal Benefit Treatment Among Plans

There should be equal pension treatment in terms of the relationship between benefits and contributions among the various plans and, as nearly as practicable, within the confines of plan demographics, retirement benefits and member contributions should be uniform.

7. Adequacy of Benefits at Retirement

- a. Benefit adequacy requires that retirement benefits respond to changes in the economy.
- b. The retirement benefit should be adequate at the time of retirement.
- c. Except for local police or firefighter relief associations, the retirement benefit should be related to an individual's final average salary, determined on the basis of the highest five successive years average salary unless a different averaging period is designated by the Legislature.

- d. Except for local police or firefighter relief associations, the measure of retirement benefit adequacy should be at a minimum of thirty years service, which would be a reasonable public employment career, and at the generally applicable normal retirement age.
- e. Retirement benefit adequacy must be a function of the Minnesota public pension plan benefit and any Social Security benefit payable on account of Minnesota public employment.

8. Postretirement Benefit Adequacy

- a. The retirement benefit should be adequate during the period of retirement.
- b. Postretirement benefit adequacy should function to replace the impact of economic inflation over time in order to maintain a retirement benefit that was adequate at the time of retirement.
- c. The system of periodic post retirement increases should be funded on an actuarial basis.
- d. In order to replace inflation, the post retirement adjustment system should follow a valid recognized economic indicator.

9. Portability

To the extent feasible, portability should be established as broadly as possible for employment mobile public employees.

10. Purchases of Prior Service Credit

Purchases of public pension plan credit for periods of prior service should be permitted only if, on a case-by-case basis, it is determined that the period to be purchased is public employment or substantially akin to public employment, that the prior service period must have a significant connection to Minnesota, that the purchase payment from the member or from a combination of the member and the employer must equal the actuarial liability to be incurred by the pension plan for the benefit associated with the purchase, appropriately calculated, without the provision of a subsidy from the pension plan, and that the purchase must not violate notions of equity.

11. Deadline Extensions and Waivers

Deadline extensions or waivers should be permitted only if, on a case-by-case basis, it is determined that there is a sufficient equitable basis for the extension or waiver, the extension or waiver does not involve broader applicability than the pension plan members making the request, and that the extension or waiver is unlikely to constitute an inappropriate precedent for the future.

12. Vesting Requirement Waivers

Waivers of vesting requirements should be permitted only if, on a case-by-case basis, it is determined that there is a strong equitable argument to grant the waiver for the requesting public employees. 13. Reopening Optional Annuity Elections

Reopenings of optional annuity elections should not be permitted.

14. Benefit Increase Retroactivity

Retroactivity of benefit increases for retirees and other benefit recipients should not be permitted.

15. <u>Repayment of Previously Paid Benefits and Resumptions of</u> <u>Active Member Status</u>

Repayments of previously paid benefits and resumptions of active member status should not be permitted.

16. Duplicate Public Pension Coverage for the Same Employment

Unless supplemental pension plan coverage is involved, public employees should not have coverage by more than one Minnesota public pension plan for the same period of service with the same public employer.

- 17. Reemployed Annuitant Earnings Limitations
 - a. Limitations on the earnings by reemployed annuitants should apply only to the reemployment of an annuitant by an employing unit that is a participating employer in the same public pension plan from which the annuitant is receiving a pension benefit.
 - b. Reemployed annuitant earnings limitations should be standardized to the extent possible among the various Minnesota public pension plans.
- 18. Disability Definitions

The definitions of what constitutes a disability giving rise to a disability benefit should be standardized to the extent possible, recognizing the differences in the hazards inherent in various types of employment.

- 19. Design of Early Retirement Incentive Programs
 - a. Early retirement incentive programs can have a valid role to play in the public sector personnel system.
 - b. Early retirement incentive programs should be targeted to situations when a public employer needs to reduce staffing levels beyond normal attrition.
 - c. Early retirement incentive programs should be financed appropriately, with the cost of the benefits provided under the early retirement incentive program borne wholly by the same public employer that gains any compensation savings from a staffing level reduction, without any subsidy from the affected public pension plan.
- 20. Future Pension Coverage for Privatized Public Employees

Because of applicable federal regulation, employees of public employers that are privatized should not be allowed to continue public pension plan coverage in the future. Privatized public employees should receive adequate replacement pension coverage and a better resolution of this topic should be raised with appropriate federal government officials.

21. Supplemental Pension Plans

- a. Public employees should be encouraged to engage in personal savings for their retirement.
- b. The State should assist this process by making personal retirement savings opportunities available to public employees.
- c. Public employers should have an opportunity to elect to provide financial support to established supplemental pension arrangements for their employees.

22. No Intended Ultimate Benefit Diminutions

- a. In recommending benefit plan modifications, the imposition of reductions in overall benefit coverage for existing pension plan members should not be recommended.
- b. The imposition of a reduction in overall benefit coverage may be imposed for new pension plan members in order to achieve sound pension policy goals.
- c. A reduction in some aspect or aspects of benefit coverage may be recommended in combination with a proposed benefit increase or benefit increases in implementing sound pension policy goals.

D. Pension Plan Funding

1. Equal Pension Financing Burden for Generations of Taxpayers

There should be utilized a financing method that will distribute total pension costs fairly among the current and future generations of taxpayers and that will discourage unreasonable benefit demands.

2. Actuarial Funding of Pension Benefits

- a. Retirement benefits in Minnesota defined benefit plans should be funded on an actuarial basis.
- b. Currently earned pension plan service credit, as measured by the actuarially determined entry age normal cost of the defined benefit pension plan, should be funded on a current basis.
- c. The administrative expenses of the defined benefit pension plan should be funded on a current basis.
- d. Existing unfunded actuarial accrued liabilities of the defined benefit pension plan should be amortized over a reasonable period of time, and that amortization period should be related to the average working career of the membership of the pension plan, but not to exceed forty years.

3. <u>Allocation of Funding Burden Between Members and</u> <u>Employers</u>

- a. Retirement benefits should be financed on a shared basis between the public employee and the public employer.
- b. For general public employees, the employee and employer should make matching contributions to meet the normal cost and the administrative expenses of the defined benefit pension plan and both the employee and the employer may be required to share some financial

responsibility for funding the amortization requirement of the defined benefit pension plan.

- c. For protective and public safety employees covered by a statewide public pension plan, the employee should pay forty percent of the total actuarial costs of the defined benefit pension plan and the employer should pay sixty percent of the total actuarial costs of the defined benefit pension plan.
- d. For protective and public safety employees covered by a local relief association, employee and employer contributions should be considered in light of the special circumstances and history unique to that association. Employees should pay an appropriate portion of the normal cost and administrative expenses of the relief association.

4. Funding of Postretirement Adjustments

- a. Ad hoc postretirement adjustments should be funded separately from the regular defined benefit public pension plan financing and should not be added to the unfunded actuarial accrued liability of the defined benefit public pension plan.
- b. Automatic postretirement adjustment mechanisms should be funded on an actuarial basis as part of the actuarial requirements and contribution structure of the defined benefit public pension plan.

5. Appropriate Basis for Actuarial Assumption Changes

- Actuarial assumption changes should only be based on the results of the gain and loss analyses in the regular actuarial valuation reports and the results of a periodic experience study.
- b. Actuarial assumption changes should stand on their own merit, and should not be changed solely to improve benefits or to lower contribution rates.

6. Appropriate Basis for Modifying Contribution Rates

Member and employer contribution rates should only be modified based on the trend in total support rate deficiency or sufficiency revealed in the regular actuarial valuation reports.

E. Pension Plan Investments

1. Appropriate Investment of Public Pension Assets

- a. Public pension plan investment authority should be as uniform as is practicable.
- b. Public pension plan investments should be made in accord with the prudent person rule.
- c. Public pension plan investment authority should be further regulated by a list of authorized investment types, which should appropriately differentiate between pension plans based on asset size and investment expertise.
- d. Written investment policies should be maintained for the investment of public pension plan assets.
- e. Public pension plans should regularly report on their investments, including performance.

2. Sole Membership Benefit Dedication of Plan Assets

Recognizing that public pension plan assets exist to defray current and future pension benefit payments, public pension plan assets should be dedicated to the sole benefit of the plan membership in their investment and expenditure.

F. Compliance With Federal Pension Plan Regulation

Consistent with the principles of federalism, dual sovereignty, and comity among governmental entities, public pension plan provisions and administrative operations and activities should attempt to comply with applicable federal pension plan regulation in order to maintain the tax qualified status of public pension plans.

G. Public Pension Plan Fiduciary Responsibility

1. Strong Fiduciary Responsibility Standards

Public pension plan activities should be conducted in accord with strong fiduciary responsibility standards and regulation.

2. Remedies for Fiduciary Breach

Failures to conduct public pension plan activities in accord with the applicable fiduciary responsibility standards and regulation should be subject to appropriate fiduciary breach remedies.

III. Procedural Principles of Pension Policy

A. Adequate Pension Funding

1. Pre-Existing Funding

No proposed increase in pension benefits for any public pension plan should be recommended by the Legislative Commission on Pension and Retirement until there is established adequate financing to cover the pre-increase normal cost, administrative expense, and amortization contribution requirements of the defined benefit public pension plan calculated according to the applicable actuarial reporting law.

2. Funding Increase

No proposed increase in pension benefits for any defined benefit public pension plan should be recommended by the Legislative Commission on Pensions and Retirement unless there is included, in the proposal, adequate financing to meet any resulting increase in the normal cost and amortization contribution requirements of the defined benefit public pension plan that are estimated by the applicable actuary to result from adopting the proposed benefit increase.

B. Preference for General Legislation

No pension legislation of local or special limited application should be recommended by the Legislative Commission on Pensions and Retirement if the purpose and the intent of the proposed legislation would be better served by legislation of general statutory application or if the proposed legislation constitutes a significant departure from previously established uniform pension policy. Pension legislation affecting local police or salaried firefighters may be recommended by the Legislative Commission on Pensions and Retirement in light of any special circumstances that are unique to the relief association.

C. Explicit Application of Principles of Pension Policy

1. Measurement Against Principles

Each proposed change in retirement benefits or financing should be measured by the Legislative Commission on Pension and Retirement against the current principles of pension policy as part of its consideration to insure that there is adherence to sound pension policy.

2. Formal Reporting of Consistency

The Commission's determination concerning compliance with the principles of pension policy should be a part of the Commission's formal report of its recommendations on proposed public pension legislation.

Revised 12/6/96

- A pension benefit plan is part of the overall personnel compensation system of the employer.
- A pension benefit plan must assist the other parts of the personnel system.
- Within the confines of affordability, the pension benefit plan should assist the employing unit in the following:
 - 1. the recruitment of new qualified personnel;
 - 2. the retention of existing qualified and productive personnel; and
 - 3. the encouragement of predictable and systematic out-transitioning of personnel at the end of their normally expected working career.
- The pension benefit plan accomplishes this assistance by providing pension benefits that are adequate to provide retiring employees with financial security at and after the date of retirement.
- The emphasis of a pension benefit plan will vary over time. During the early decades of this century, retention of personnel was the major emphasis for pension benefit plans. Over time, recruitment has gained greater emphasis. During recent periods of downsizing, out-transitioning has been emphasized to a greater extent by both employees and employers.
- The Commission's Principles of Pension Policy, last substantively revised in 1996, provide that:
 - Minnesota public pension plans exist to augment the Minnesota public employer's personnel and compensation system by assisting in the recruitment of new qualified public employees, the retention of existing qualified public employees, and the systematic outtransitioning of existing public employees at the normally expected conclusion of their working careers by providing, in combination with federal Social Security coverage, personal savings and other relevant financial sources, retirement income that is adequate and affordable.
 - 2. Minnesota public pension plans should play their appropriate role in providing financial security to public employees in retirement.
 - 3. As Minnesota public employee workforce trends develop, Minnesota public pension plans should be sufficiently flexible to make necessary adaptations.

- Pension plans will be one of two types. The types are:
 - a. <u>Defined Benefit Plans</u>. The pension benefit amount that is ultimately payable is predeterminable or fixed using a formula or comparable arrangement. The fixed element of the benefit amount leaves a variable element, which is the funding required to provide that benefit.
 - b. <u>Defined Contribution Plans</u>. The funding for the pension plan is fixed as a dollar amount or a percentage of payroll. The fixed element of funding leaves a variable element, which is the benefit amount that is ultimately payable.
- There is risk shifting that is applicable to each type of plan:
 - a. <u>Defined Benefit Plans</u>. The employer or the plan sponsor has the inflation and investment risks. If the investment return on plan assets is poor or if inflation produces ever increasing final salaries and benefit payouts, that risk is borne by the employer. The member has the turnover risks. If a plan member terminates with modest service having been rendered or at an early age, the member will receive either no benefit or an inadequate benefit.
 - b. <u>Defined Contribution Plans</u>. The plan member bears the inflation and investment risks. If there is poor investment performance, the plan member's pension assets will be depressed. If inflation impacts the immediate pre-retirement standard of living, the plan member's benefit will be less adequate in meeting the person's pre-retirement standard of living. The plan sponsor or employer loses any turnover gain potential, where past plan funding becomes more concentrated on a subgroup of the total plan membership.
- There are advantages and disadvantages to each type of plan:
 - a. <u>Defined Benefit Plans Employee Perspective</u>. The plan type favors long-term or long-service employees. It also favors employees who receive regular promotions and sizable salary increases throughout their careers or who achieve substantial salary increases in their compensation at the end of their career. It also favors employees who retire at or before the plan's normal retirement age.

<u>Defined Benefit Plans – Employer Perspective</u>. The plan sponsor can design the plan to emphasize new employee recruitment, existing employee retention, or career employee out-transitioning. The plan sponsor will suffer cost changes over time as demographic changes occur in the membership group, as benefit plan changes are implemented, or as market fluctuations occur in plan assets.

b. <u>Defined Contribution Plans – Employee Perspective</u>. The plan type favors employees who are very employment mobile, where employment changes beyond a single employer or a multiple employer group. It also favors short-term employees in comparison to defined benefit plans. It also favors employees with very stable and modestly increasing salary histories and employees who work considerably beyond the plan's normal retirement age.

<u>Defined Contribution Plans – Employer Perspective</u>. The plan sponsor can budget for retirement costs without experiencing unplanned changes in those costs, either as a percentage of pay or as a dollar amount, depending on the contribution specification. The plan sponsor will likely need to expend more dollars to provide the level of benefits to career employees as a defined benefit plan because of the more even allocation of defined contribution pension benefits over the coverage group.

- Earliest Minnesota public pension plan was the Minneapolis Fire Departmental Relief Association, established in 1868.
- All Minnesota public pension plans established before 1900 were public safety plans (except firefighters relief associations, including the Duluth and St. Paul fire plans, and one police relief association, the Minneapolis Police Relief Association).
- Minnesota public pension plans were created on patchwork basis, generally covering uncovered groups rather than reorganizing existing plan coverage.
- First general employee retirement plans were teacher retirement plans (Duluth Teachers Retirement Fund Association (DTRFA) in 1910, Minneapolis Teachers Retirement Fund Association (MTRFA) in 1910, St. Paul Teachers Retirement Fund Association (SPTRFA) in 1910, and the Teachers Insurance and Retirement Fund in 1915).
- First statewide retirement plans were the Teachers Insurance and Retirement Fund in 1915, the State Employees Retirement Association (now MSRS-General) in 1929, and the Public Employees Retirement Association (PERA) in 1931.
- First retirement plan to default was the Teachers Insurance and Retirement Fund. Plan was replaced by the Teachers Retirement Association (TRA) in 1931.
- Latest retirement plans were established in 1999 (State Fire Marshal Arson Investigator Retirement Plan and the local Government Correctional Retirement Plan).
- Retirement plan creation, count by decade:

1860's	1	1930's	11
1870's	0	1940's	23
1880's	3	1950's	11
1890's	6	1960's	12
1900's	6	1970's	3
1910's	8	1980's	5
1920's	2	1990's	2

 Some retirement plans have been closed to new entrants, with replacement coverage (Minneapolis Employees Retirement Fund (MERF), Minneapolis Teachers Retirement Fund Association (MTRFA)-Basic Program, St. Paul Teachers Retirement Fund Association (SPTRFA)-Basic Program, Duluth Teachers Retirement Fund Association (DTRFA)-Old Law Program, Minneapolis Firefighters Relief Association, Minneapolis Police Relief Association, Fairmont Police Relief Association, Virginia Fire Department Relief Association).

- Many retirement plans have been merged into another plan:
- Game Wardens Retirement Plan and State Police Retirement Plan into State Patrol Retirement Plan;
- County and Probate Court Judges Retirement Plan, District Court Judges Retirement Plan, and Supreme Court Justices Retirement Plan into Uniform Judicial Retirement Plan;
- Attorney General Retirement Plan and State Auditor Retirement Plan into Elected State Officers Retirement Plan;
- Supreme Court Clerk Retirement Plan into MSRS-Unclassified Employees Retirement Plan;
- 48 local police or paid firefighter relief associations into PERA-P&F.

Minnesota Defined Benefit Plans

A. Statewide Plans

- 1. General State Employees Retirement Plan of the Minnesota State Retirement System (MSRS-General)

Notes:

- ¹ Before the 1973 creation of the Correctional Employees Retirement Plan, coverage was provided by the General State Employees Retirement Plan.
- ² Game Wardens Retirement Plan was replaced by the State Police Retirement Plan in 1961.
- ³ State Police Retirement Plan consolidated with the State Patrol Retirement Plan in 1969.
- ⁴ Before the 1965 creation of the Legislators Retirement Plan, coverage was provided by the Public Employees Retirement Plan. The plan was closed to new interests as of July 1, 1997, and existing members were permitted to elect coverage by the Unclassified State Employees Retirement Program.
- ⁵ Coverage was shifted to the Elective State Officers Retirement in 1967.
- ⁶ Coverage limited to judges who first assumed judicial office before January 1, 1974.
- ⁷ Plan was repealed in 1980. Coverage for the membership of the prior plan was transferred to the Unclassified State Employees Retirement Program in 1981, retroactive to the date of initial appointment to employment position.
- ⁸ Before creation of the plan, coverage was provided by the General State Employees Retirement Plan.
- ⁹ Before creation of the program, coverage was provided by the General State Employees Retirement Plan. Program members retain the option to select General State Employees Retirement Plan benefits if the member has at least ten years of state service.
- ¹⁰ The plan was acquired by the Metropolitan Transit Commission from the prior employer, the Twin City Rapid Transit Co. in 1970. The plan consolidated with the General State Employees Retirement Plan in 1978.
- ¹¹ Before creation of the Public Employees Police and Fire Retirement Plan in 1959, coverage was provided by the Public Employees Retirement Plan. In 1999, the various police and salaried firefighter consolidation accounts were merged into this plan.
- ¹² The 1987 plan was not implemented by any of the counties authorized to do so by 1997 and was repealed. A replacement plan was enacted in 1999.
- ¹³ For local government elected officials added to eligibility for coverage by the plan in 1990, coverage is optional and prior coverage, if any, was by the Public Employees Retirement Plan.
- ¹⁴ Before creation of the plan, prior coverage was by the General State Employees Retirement Plan. Plan consolidated into the Public Employees Police and Fire Retirement Plan in 1978.
- ¹⁵ Plan was replaced by the Teachers Retirement Plan.

Establishment of Minnesota Public Pension Plans

- ⁶ Before creation of the Individual Retirement Account Plan in 1988, coverage was provided by the Teachers Retirement Plan.
- ¹⁷ Plan was closed to new entrants as of June 30, 1979. Coverage for applicable employees initially hired after June 30, 1979 is provided by the Public Employees Retirement Plan.
- ¹⁸ Plan was closed to new entrants as of December 31, 1969, in favor of the Public Employees Retirement Plan, and short service members and members opting for Social Security coverage were transferred to the Public Employees Retirement Plan. Plan was consolidated into the Public Employees Retirement Plan in 1973.
- ¹⁹ Plan was closed to new entrants and reemployed former members as of April 14, 1982.
- ²⁰ Plan was authorized in 1909, but not implemented until 1910.
- ²¹ Plan was closed to new entrants as of June 15, 1980 and consolidated into the Public Employees Police and Fire Plan in 1993.
- ²² Plan was closed to new entrants as of June 15, 1980 and consolidated into the Public Employees Police and Fire Plan in 1991.
- ²³ Plan was closed to new entrants in 1973 and consolidated into the Public Employees Police and Fire Plan in 1989.
- ²⁴ Plan was closed to new entrants in 1976 and consolidated into the Public Employees Police and Fire Plan in 1998.
- ²⁵ Plan consolidated into the Public Employees Police and Fire Plan in 1978.
- ²⁶ Plan was closed to new entrants in 1976 and consolidated into the Public Employees Police and Fire Plan in 1987.
- ²⁷ Plan was closed to new entrants in 1973, and consolidated into the Public Employees Police and Fire Plan in 1990.
- ²⁸ Plan consolidated into the Public Employees Police and Fire Plan in 1973.
- ²⁹ Plan was closed to new entrants in 1975 and consolidated into the Public Employees Police and Fire Plan in 1994.
- ³⁰ Plan was closed to new entrants in 1977 and consolidated into the Public Employee Police and Fire Plan in 1994.
- ³¹ Plan consolidated into the Public Employees Police and Fire Plan in 1990.
- ³² Plan was closed to new entrants as of June 15, 1980 and consolidated into the Public Employees Police and Fire Plan in 1992.
- ³³ Plan was closed to new entrants as of June 15, 1980 and consolidated into the Public Employees Police and Fire Plan in 1987.
- ¹ Coverage for active members was transferred to the Public Employees Police and Fire Plan in 1977 and plan was converted to cityoperated trust fund for benefit recipients.
- ³⁵ Coverage for salaried firefighters was transferred to the Public Employees Police and Fire Plan in 1973; Plan continues as volunteer firefighters relief association.
- ³⁶ Plan coverage was terminated in 1973.
- ³⁷ Plan was closed to new entrants as of June 15, 1980 and consolidated into the Public Employees Police and Fire Plan in 1989.
- ³⁸ Plan was closed to new entrants in 1971 and consolidated into the Public Employees Police and Fire Plan in 1990.
- ³⁹ Plan was closed to new entrants as of June 15, 1980 and consolidated into the Public Employees Police and Fire Plan in 1985.
- ⁴⁰ Coverage for active members was transferred to the public Employees Police and Fire Plan in 1969 and plan operates as trust fund for benefit recipients.
- ⁴¹ Plan was closed to new entrants in 1974 and consolidated into the Public Employee Police and Fire Plan in 1994.
- ⁴² Plan was closed to new entrants as of June 15, 1980 and consolidated into the Public Employees Police and Fire Plan in 1990.
- ⁴³ Plan was closed to new entrants in 1974 and consolidated into the Public Employees Police and Fire Plan in 1989.
- ⁴⁴ Plan was closed to new entrants in 1973 and consolidated into the Public Employees Police and Fire Plan in 1997.
- ⁴⁵ Coverage for active members was transferred to the Public Employees Police and Fire Plan in 1978 and plan was converted to cityoperated trust fund for benefit recipients.
- ⁴⁶ Plan was closed to new entrants as of June 15, 1980, and consolidated into the Public Employees Police and Fire Plan in 1988.
- ⁴⁷ Plan was closed to new entrants as of June 15, 1980 and consolidated into the Public Employees Police and Fire Plan in 1996.
- ⁴⁸ Plan was closed to new entrants in 1977.
- ⁴⁹ Plan was closed to new entrants in 1976 and consolidated into the Public Employees Police and Fire Plan in 1993.
- ⁵⁰ Plan was closed to new entrants in 1977 and consolidated into the Public Employees Police and Fire Plan in 1993.
- ⁵¹ Plan was closed to new entrants in 1974.
- Plan was closed to new entrants as of June 15, 1980.
- ⁻³ Plan was closed to new entrants as of July 1, 1997. Existing members were permitted to elect coverage by the Unclassified State Employees Retirement Program.
- ⁵⁴ Judges who reach the service credit maximum in the Judges Retirement Plan are covered by the Unclassified State Employees Retirement Program for future service (employee contribution only).
- ⁵⁵ The plan covers volunteer firefighters, but because it provides benefits based on the salary of a top grade Bloomington police officer, with post-retirement escalation, the plan is considered to be a salaried firefighter pension plan.
- ⁵⁶ The plan was closed to new entrants in 1980 and consolidated into the Public Employees Police and Fire Plan in 1998.
- ⁵⁷ The plan was closed to new entrants in 1980 and consolidated into the Public Employees Police and Fire Plan in 1997.

Plan is terminally funded, meaning that the State contribution is made only upon the retirement of each participant.
 Plan is funded on a current disbursements or "pay-as-you-go" basis, meaning that the State funds the retirement annuities or benefits monthly when they are done.

\$4,575

\$1,530

3,835

2,781

\$2,990

³ Plan is funded also with a direct State appropriation, excluded from this calculation, which would increase the total employer contribution amount.

Actuarial Reporting on Minnesota Public Pension Plans

- Before 1957, no state law required any actuarial reporting regarding Minnesota public pension plans.
- Regular Minnesota public pension plan actuarial and financial reporting was first required in 1965, with the actuarial valuations prepared by the consulting actuaries retained by the plans.
- Since 1984, actuarial reporting on the major and statewide Minnesota public pension plans has been required to be prepared by the consulting actuary retained by the Legislative Commission on Pensions and Retirement.
- Actuarial reporting requirements and major economic assumptions are largely prescribed in statute. The statutory regulation of actuarial work is augmented by the Standards for Actuarial Work adopted by the Commission. Additional demographic actuarial assumptions are adopted by the plan governing boards, subject to Commission approval.
- Actuarial reporting prepared by the Commission-retained actuary is reviewed or supplemented by the consulting actuaries retained by the various plans.
- The cost to the Legislative Commission on Pensions and Retirement for the regular pension plan actuarial reporting prepared by Commission-retained actuary is recouped from the various statewide and major pension plans.
- Actuarial reporting is intended to assess the adequacy of the total non-investment revenue financial support of the pension plan compared with calculated annual actuarial funding requirements of the pension plan, to assess the extent of conformance with the selected budgetary actuarial method for accumulating financial reserves for pension liabilities, and to provide required actuarial disclosure for governmental accounting purposes.

- Actuarial funding is a mechanism for:
 - 1. Determining the magnitude of pension liabilities previously undertaken by a defined benefit pension plan;
 - 2. Comparing the current pension plan assets reserved for pension purposes with the accrued pension liabilities amassed by a defined benefit pension plan; and
 - 3. Assessing the adequacy of total annual contribution support to meet the total annual funding requirements of a defined benefit pension plan.
- Actuarial funding differs from non-actuarial pension funding, which is typically represented by current disbursements (pay-as-you-go) funding, as used by the Social Security System historically.
- Many different actuarial funding methods exist and were developed primarily to meet the budgetary needs of a plan sponsor.
- Minnesota utilizes the Entry Age Actuarial Cost Method (or Entry Age Normal Cost Actuarial Cost Method), which emphasizes the determination of a level actuarial cost as a percentage of covered payroll over a plan member's working career.
- Minnesota actuarial reporting produces:

1.	A measure of the magnitude of accrued pension liability:	Actuarial Accrued Liability
2.	A pension reserve comparison:	Current Assets (actuarial value of assets) Unfunded Actuarial Accrued Liability Funding Ratio (assets expressed as a percentage of liabilities)
3.	Measure of contribution adequacy:	 <u>Funding Requirement</u> 1. Normal Cost 2. Administrative Expenses 3. Supplementary (Amortization) Contribution Total Actuarial Requirement (1. + 2. + 3.) <u>Contributions</u> 4. Member Contributions 5. Employer Contributions

- 5. Employer Contributions
- 6. State Aid or Other Regular Funding
- Total Contributions (4. + 5. + 6.)

Pattern of Recognizing Pension Costs Over Time Under Various Funding Methods

The Retirement Plan Watch List

As Reported by Milliman USA, the Consulting Actuarial Firm Retained by the Legislative Commission on Pensions and Retirement (2/10/2004)

In order of the severity of the problem and the need for corrective action

Retirement Plans With Current Funding Problems:

		Contribution
Plan	Funding Ratio ¹	Deficiency (Sufficiency) ²
Minneapolis Teachers Retirement Fund Association	58.97%	9.47%
Public Employees Police and Fire Plan	111.10%	4.02%
St. Paul Teachers Retirement Fund Association	79.00%	3.46%
MSRS-Correctional State Employees Retirement Plan	105.62%	2.16%
MSRS-General State Employees Retirement Plan	105.49%	1.43%
PERA-General Employees Retirement Plan	86.94%	1.24%

Retirement Plans Without Current Funding Problems:

	/1	Contribution 1/2
Plan	Funding Ratio ^{/1}	Deficiency (Sufficiency) ^{/2}
Minneapolis Employees Retirement Fund	93.44%	(0.01%)
Duluth Teachers Retirement Fund Association	99.65%	(0.02%)
PERA-Local Correctional Retirement Plan	101.05%	(0.45%)
Teachers Retirement Association	110.59%	(1.63%)
Judges Retirement Plan	79.85%	(1.69%)
State Patrol	119.01%	(3.19%)

Source: 7/1/2003 Actuarial Valuations and Summary of 2003 Valuations, Milliman USA

Notes:

- ¹ The actuarial value of plan assets expressed as a percentage of the actuarial accrued liability of the plan.
- ² The difference between the total actuarial requirements of the plan and the total contributions and other remaining support, expressed as a percentage of covered payroll.

The State of Minnesota has established 16 different aid programs dedicated to or specifically applicable to public employee retirement plans.

The aid programs are:

- 1. Fire State Aid;
- 2. Minimum Volunteer Firefighter Fire State Aid;
- 3. First Class City Fire Insurance Premium Tax Surcharge;
- 4. Police State Aid;
- 5. Local Police and Paid Fire Relief Association Amortization Aid;
- 6. Supplemental Police and Paid Fire Amortization State Aid;
- 7. Additional Amortization State Aid;
- 8. Minneapolis Employees Retirement Fund (MERF) State Contribution;
- 9. Volunteer Fire Lump Sum Supplemental Benefit State Reimbursement;
- 10. Pre-1974 Retiree MERF Special Post Retirement Adjustment Aid;
- 11. Teacher Retirement Plan State Categorized Aid and State Funding;
- 12. 1993 State Supplemental MTRFA/SPTRFA Contributions;
- 13. 1996 State Supplementary MTRFA/SPTRFA Contributions;
- 4. 1997 State Supplemental First Class City Teacher Retirement Fund Association Funding;
- 15. 1997 State Aid for the PERA-General Employer Contribution Rate Increase; and
- 16. Ambulance Service Personnel Longevity Award and Incentive State Aid.

The following summarizes these aid programs, specifying their governing statutes, the establishment year, the source of the aid, the aid recipient or recipients, and the recent total aid amounts:

State Aid Program	Governing Statute	Year In Which Aid Program Established	Aid Source	Aid Recipient(s)		ecent Total id Amounts
1. Fire State Aid	Minnesota Statutes, Sections 69.011 to 69.051	1885	State General Fund (Dedicated proceeds of equivalent to two percent insurance premium tax)	Municipalities and nonprofit firefighting corporations with fire department with at least 10 firefighters	2000: 2001: 2002:	\$16,055,136 \$16,899,053 \$18,066,489
2. Minimum Volunteer Firefighter Fire State Aid	Minnesota Statutes, Sections 69.021, Subdivision 7, Paragraph (d), and 423A.02, Subdivision 3, Paragraph (e)	1996	30 percent of excess amortization and supplemental amortization state aid freed up by fully funded relief associations or consolidation accounts	Municipalities and nonprofit firefighting corporations eligible to receive fire state aid	2000: 2001: 2002:	\$1,210,366 \$1,065,323 \$1,846,119

Public Pension Plan State Aid

	State Aid Program	Governing Statute	Year In Which Aid Program Established	Aid Source	Aid Recipient(s)		Recent Total Aid Amounts
3.	First Class City Fire Insurance Premium Tax Surcharge	Minnesota Statutes, Section 297I.10	1934	State General Fund (Dedicated proceeds of two percent of fire insurance premium amount in Duluth, Minneapolis, and St. Paul)	Duluth (approx. 13%) Mpls. (approx. 55%) St. Paul (approx. 32%)	2000: 2001: 2002:	\$1,092,207 \$1,321,161 \$1,382,374

Minnesota

- Minnesota has had financially distressed pension plans in the past and has taken various actions to address those funding problems.
- Approaches to address public pension plan funding problems have included:
 - 1. Benefit reductions;
 - 2. Closing off benefit plans to new hirees;
 - 3. Employer contribution increases;
 - 4. State assistance; and
 - 5. Consolidations/mergers.
- An outright benefit reduction was part of the aftermath of the 1931 default of the 1915 Law Teacher Retirement Plan (predecessor to TRA), when retiree benefits were reduced by one-half and the reduction was not reversed until 1957.
- Benefit plans have been closed to new members in a number of instances (TRA-Basic in 1957; PERA-Basic in 1967; MTRFA-Basic in 1978; SPTRFA-Basic in 1978; MERF in 1979; DTRFA Old Law Plan in 1979; 46 local police and paid firefighter relief associations over the period 1969-1980).
- Employer contributions have been increased in a number of instances (PERA employer contribution increase in 1957; local police and paid firefighter relief associations financing Guidelines Act in 1969; additional school district and/or city funding for MTRFA in 1993 and 1996).
- State aid for public pension plans has been added or augmented on several occasions (State funding of TRA and first class city teacher plans from sales tax proceeds in 1967; Police State Aid in 1971; State aid to MERF in 1979; local police and paid fire relief association amortization aids in 1980, 1984, and 1996; volunteer fire lump sum supplement in 1987; MTRFA and SPTRFA State aids in 1993, 1996, and 1997; minimum volunteer fire state aid in 1996; PERA-General State aid in 1997).
- Public pension plans with problematic funding have been consolidated or merged on various occasions (St. Paul Bureau of Health Retirement Plan consolidation into PERA-General in 1967; State Police Retirement Plan and Game Wardens Retirement Plan consolidation into the State Patrol Retirement Plan in 1969; Supreme Court Justices Retirement Plan, District Court Judges Retirement Plan, and Probate and County Court Judges Retirement Plan consolidation into the Uniform Judicial Retirement Plan in 1973-1978; local police and paid firefighter relief associations consolidated into PERA-P&F 1973-1999).

Other States

Hawaii (2002): Amortization Requirement Change

- Problem: Large increase in Hawaii Employees Retirement System employer contributions from increasing unfunded actuarial accrued liabilities.
- Legislation: The amortization period for the plan was extended by 13 years.

Illinois (2003): Bonding for Employer Contributions

- Problem: The State Employees Retirement System unfunded actuarial accrued liability increasing.
- Legislation: \$10 billion in pension obligations bonds issued to pay the annual state contribution and to reduce the plan unfunded actuarial accrued liability.

Kansas (2003): Bonding to Reduce Unfunded Liabilities

- Problem: Large unfunded actuarial accrued liabilities increased from the transfer of higher education employees to the Public Employees Retirement System and from a converted "13th check" benefit.
- Legislation: \$540 million in revenue bonds issued to reduce unfunded actuarial accrued liabilities.

Maine (2001): Minimum Employer Contribution

- Problem: Variable employer amortization contributions to the Maine State Retirement System.
- Legislation: State contribution to amortize the unfunded actuarial accrued liability in the previous year is minimum amount for successive year.

New Jersey (2003): Bonding for Unfunded Liabilities

- Problem: Unfunded actuarial accrued liabilities in the State Retirement System for 1991 and 1993 local government early retirement incentives causing large local government contributions.
- Legislation: Local governments participating in the statewide retirement plan are allowed to refinance their unfunded actuarial accrued liabilities from early retirement incentives by issuing refunding bonds.

New York (2003): Bonding for Employer Contributions

- Problem: State and Local Retirement Plan employer contributions were variable and growing in recent years.
- Legislation: A minimum employer contribution rate was established, without ability to be suspended during good investment performance periods, and bonding for employer contributions in excess of 7 percent of pay was permitted.

Oregon (2003): Pension Plan Restructuring

- Problem: Public Employee Retirement System unfunded actuarial accrued liability grew from \$1 billion to \$15 billion in three years due to outdated actuarial assumptions and Variable Annuity guaranteed investment return.
- Legislation: Old plan was closed to new entrants, who were covered by a new benefit tier, the Variable Annuity program was closed to additional contributions, and more current actuarial assumptions implemented.

Approaches to Address Public Pension Plan Funding Problems

<u>'ennsylvania (1984): Financially Distressed Municipal Pension System Recovery Program</u>

- Problem: Over 2,200 local government pension plans with various funding levels, including the Pittsburgh Public Pension Plan with a 0.09 percent funded ratio and the Pittsburgh Fire Pension Plan with a 0.16 percent funded ratio in 1982.
- Legislation: For local government plans, comparable actuarial reporting was required, minimum funding requirements were based on the actuarial reporting, an existing state aid program was revised to allocate amounts more consistent with plan cost, and a recovery program was established for plans and municipalities determined to be financially distressed that involved an aggregation of pension trusts, increasing member contributions to a minimum level, exempting employers from statutory contribution limits, requiring the establishment of a new benefit plan for new employees, adding additional special taxing authority, phasing-in the implementation of the funding standards, extending the amortization period, requiring the formulation of a plan for administrative improvements, a \$35 million assistance account was established for allocation on the basis of relative distress, and providing emergency loans from the assistance account to avoid defaults.

Pennsylvania (2002): Variable Employer Contributions

Problem: State Employees Retirement System employer contributions became too variable.

Legislation: Employer contribution set based on system funding experience, but with a minimum contribution amount.

Virginia (2004 Proposal): Consolidated Contribution Rates

Problem: Virginia Retirement System employer contribution rates for teachers doubled after period of decrease.

Proposal: Permit local governments to consolidate higher teacher and lower general employee contribution rates.

West Virginia (1991): Teacher Retirement Coverage Restructuring

Problem: The unfunded actuarial accrued liability and the cost of the Teachers Retirement Plan were growing.

Legislation: The defined benefit plan was closed to new entrants and a defined contribution was created, with existing members allowed to transfer to the new plan, the amortization period was extended to 40 years, an additional state contribution was provided, and the issuance of pension obligation bonds were authorized.

West Virginia (2003): Retirement Liability Bonding

Problem: Unfunded actuarial accrued liabilities growing in teacher, state trooper, and judges retirement plans.

Legislation: \$3.9 billion in bonding authorized (not implemented pending the result of litigation over its constitutionality).

Sources: Except for the information on the Pennsylvania 1984 legislation, the summaries presented were derived from information provided by Ron Snell of the National Conference of State Legislatures.

Information on the Pennsylvania 1984 legislation was provided by the Pennsylvania Public Employee Retirement Commission.

This list provides definitions relevant for Minnesota public pension plans and funds. The first section identifies the systems which administer Minnesota's larger pension plans. The second section lists terms relevant for a basic understanding of the types of plans, the financing, and the operation of these plans. This is followed by a section with more general terms that one would encounter in a study of these systems.

Minnesota Major Pension Systems

- DTRFA Duluth Teachers Retirement Fund Association. DTRFA administers the pension plan and invests assets for Duluth public school teachers.
- IRAP Individual Retirement Account Plan. IRAP is a defined contribution plan primarily covering many recently hired Minnesota State Colleges and Universities System (MnSCU) state university, community college, and technical college personnel.
- MERF Minneapolis Employees Retirement Fund. The MERF administers the pension plan and invests assets for certain Minneapolis employees hired before July 1, 1978. The plan includes some non-teaching employees of the Minneapolis School District as well as some employees of various Metropolitan Council agencies and entities.
- MPRIF Minnesota Post Retirement Investment Fund. The MPRIF is the joint postretirement adjustment mechanism and retiree asset investment fund for the various statewide pension plans, administered by the SBI. The mechanism provides postretirement increases based in part on increases in the federal Consumer Price Index (CPI) and in part on investment performance in excess of 8.5 percent.
- MSRS Minnesota State Retirement System. MSRS administers the various pension plans that cover state employees. The MSRS General Plan covers most executive branch employees as well as employees of the State Historical Society, employees of the Metropolitan Council, and administrative and clerical employees of the University of Minnesota. The Unclassified Plan covers legislative staff employees and various unclassified employees in state service. The Legislators Plan and the Judges Plan cover legislators who took office before July 1, 1997, and judges, respectively, while the Elected State Officers Plan covers constitutional officers who took office before July 1, 1997. The Correctional Plan covers various employees in state correctional institutions who have sufficient inmate contact. The State Patrol Plan covers peace officers employed by the State Patrol, the Bureau of Criminal Apprehension, the Department of Natural Resources Enforcement Division, and the Department of Public Safety Gambling Enforcement Division.
- MTRFA Minneapolis Teachers Retirement Fund Association. The MTRFA administers the pension plan and invests assets for Minneapolis public school teachers.
- PERA Public Employees Retirement Association. PERA administers various plans covering local, county, and school district nonteaching employees. The PERA General Plan covers non-public safety employees in these districts. The PERA Police and Fire Plan provides coverage for many police officers and paid firefighters throughout the state. The PERA Defined Contribution Plan provides coverage to certain local elected officials, certain local government physicians, and to certain basic and advanced emergency medical service personnel.
- SBI State Board of Investment. The SBI is the constitutionally established board composed of the Governor, Secretary of State, State Auditor, State Treasurer, and Attorney General and is charged with investing state assets, including the pension fund assets of TRA, MSRS, and PERA.
- SPTRFA St. Paul Teachers Retirement Fund Association. The SPTRFA administers the pension plan and invests assets for St. Paul public school teachers.
- TRA Teachers Retirement Association. TRA provides coverage for public school teachers throughout the state, except for teachers in the first class cities, and for some teachers in community colleges, state universities, and technical colleges.

<u>_ssential Terms</u>

Types of Plans. Primary pension plans can be categorized into two broad types, as follows:

Defined Benefit Plans	Under a defined benefit plan, the eventual pension benefit is defined, or determinable, by formulas. These formulas indicate that the benefit an individual will receive at retirement is a portion of the high- five average salary. The high-five average salary is generally the average salary in the highest five consecutive salary years. The portion of the high-five average salary that the individual will receive is determined by the benefit accrual rate (the percentage of the high-five the individual will receive per year of service provided to the employer) times years of service. Most Minnesota public pension plans are defined benefit plans.
Defined Contribution Plans	No specific benefit is specified. Rather, the contributions that must be paid to the fund are specified, with the eventual pension benefit being a function of the overall magnitude of contributions, pre- retirement investment earnings, the age at retirement, and the expected mortality of the recipient. MSRS Unclassified and IRAP are examples of defined contribution plans.

Common Funding Terms

Considerable attention is given to the funding of defined benefit plans to ensure that sufficient assets are being contributed and invested to meet the eventual plan obligations. Terms commonly encountered in studying plan funding are:

Actuarial Accrued Liability	The pension plan liability recognized to date, as determined by the actuarial method used, or alternatively, that portion of the actuarial present value of pension benefits and expenses which are not provided for by future normal costs.
Actuarial Report	A study performed periodically (annually in Minnesota) by an actuary to examine whether the contributions made to a defined benefit plan are likely to be adequate, given the benefits offered, the mortality and other demographic factors of the membership, member terminations and turnover, and pension fund investment performance.
Actuarial Value of Assets	The value of assets used for actuarial valuation purposes, defined for most Minnesota public pension plans as the value of assets at cost plus one third of the difference between the cost value and the market value. Also referred to as "current assets."
Amortization Requirement	The contribution, expressed as a percentage of payroll, which must be made to pay off the unfunded actuarial accrued liability by the full funding date.
Contribution Deficiency	A comparison of required contributions to statutory contributions indicating that current contribution rates are not sufficient to cover expenses, normal cost, and make necessary payments to retire the unfunded actuarial accrued liability by the full funding date.
Contribution Sufficiency	A comparison of required contributions to statutory contributions indicating that current contribution rates are more than sufficient to cover expenses, normal cost, and make necessary payments to retire the unfunded actuarial accrued liability by the full funding date.
Full Funding Date	The target date established for fully amortizing the pension plan unfunded actuarial accrued liability, usually June 30, 2020 for Minnesota public pension plans.

Common Funding Terms

Funding Ratio	Current assets expressed as a percentage of the actuarial accrued liability. A funding ratio of one hundred percent indicates current assets are equal to actuarial accrued liabilities. A funding ratio of less than one hundred percent indicates that the plan has unfunded actuarial accrued liabilities.
Normal Cost	The cost, or additional liability, incurred by covering employees for the current year's operations.
Required Contributions	The level of contributions, often expressed as a percentage of covered salary, determined by the actuary to be necessary to fully fund a pension plan by the full funding date.
Statutory Contributions	Contributions to be paid to a defined benefit plan, generally specified in statute in Minnesota.
Unfunded Actuarial Accrued Liability	Any amount of pension plan accrued liability in excess of the current assets (the actuarial value of assets) of the pension plan.

Plan and Member Definitions

Active Member	Current public employees with pension benefit coverage by the plan.
Deferred Retirees	Employees who terminated service, who are eligible based on the length of their public service for pension benefits other than a refund, but who are not yet receiving benefits, usually because they have not reached the pension plan retirement age.
Pension Fund	The vehicle that receives contributions, and accumulates the assets due to these contributions and the investment income from investing the assets, for purposes of paying the benefits specified by the pension plan.
Pension Plan	The collection of provisions, generally found in state law or nonprofit corporation bylaw which specify: (1) membership eligibility requirements; (2) the contributions required by law from covered employees and employing units; and (3) the level, conditions, and nature of benefits payable at termination, retirement, death, or date of disability.
Retirees	A former public employee and former active member who is currently receiving pension benefits.

General Terms

Active Fund; Active Employee Assets	The portion of TRA, PERA, or MSRS assets that has not been transferred to the Minnesota Post Retirement Investment Fund (MPRIF) and that represents the assets accumulated on behalf of active plan participants. Sometimes referred to as the Basic Retirement Funds.
Asset Allocation	The investment practice of determining what portion of an investment fund ought to be invested in various types of investment securities (e.g., stocks, bonds, cash equivalents, etc.).
Balanced Portfolio	An asset allocation practice emphasizing the investment of significant portions of a fund in the two major asset classes (e.g., debt (bonds) and equity (stocks)).

Jeneral Terms

Bonds	A debt-related investment security, representing a loan of money in return for an enforceable promise by the debtor to repay the principal amount of the loan and interest on the unpaid principal balance at a stated percentage rate on or before a stated date.
Consumer Price Index	A calculation of the apparent rate of inflation as derived from the comparative costs over time for a group of goods and services which is computed and published by the Bureau of Labor Standards of the U.S. Department of Labor.
Debt Securities	An investment security that represents a loan from the investment fund to some other entity, frequently a corporation, in order to obtain the interest payments on the loan principal balance, rather than to obtain an ownership interest in the entity.
Dedicated Bond Portfolio	An investment strategy where corporate and governmental bonds with various maturity lengths are purchased to match an actuarially determined future stream of retirement annuity payments, including any expected post-retirement increases.
Derivatives	Securities whose price is linked to, or derived from, other assets, such as stocks, bonds, currencies, or commodities.
arnings Potential	The predictable pattern of likely future investment gain attributable to a particular investment security.
Equities	Investment securities that represent an ownership interest in the entity issuing the security, that are expected to produce income in the form of shared profits, typically referred to as dividends, and to produce appreciation in value, typically referred to as capital appreciation or capital gain.
Full Funding or Fully Funded Reserves	A practice in the Minnesota Post Retirement Investment Fund (MPRIF) whereby the entire actuarial present value of a retiree's future pension through death, at a five percent post-retirement interest rate, is transferred in cash from the active fund (Basic Fund) to the MPRIF.
Inflation	The economic impact of increases in the prices of goods and services on the purchasing power of money.
Interest Assumption or Actuarial Interest Assumption	The interest rate used by the actuarial valuation process to discount the amount of future pension or benefit payments in determining its present value.
Investment Performance	The measurement of the net gain or loss produced by an investment portfolio. The measurement can be restricted to realized investment results only (yield) or inclusive of unrealized changes in market value (total rate of return) and can ignore the impact of cash flow (dollar-weighted rate of return) or can attempt to correct for cash flow changes (time-weighted rate of return).
vestment Strategy	The plan of an investment fund for purchasing various types of investment securities, attempting to take advantage of the earnings potential of the various types of investment securities, to emphasize safety from risk through diversification, and to accommodate future liquidity and cash flow needs.
Minnesota Adjustable Fixed Benefit Fund	The predecessor to the current Minnesota Post Retirement Investment Fund (MPRIF), that was created in 1969, that functioned in some respects like a variable annuity program, but with a guaranteed benefit floor, and that emphasized stock investments.

<u>General Terms</u>

Minnesota Post Retirement Investment Fund	The fund which receives the fully funded actuarial reserves for a new retiree's pension benefit at the time of retirement from the Basic Fund, and which generates the funding for and pays post-retirement adjustments.	
Mortality Gain or Loss	An actuarially calculated change in the required reserves in the Minnesota Post Retirement Investment Fund (MPRIF) or the Basic Retirement Funds resulting from a greater number or a fewer number of deaths when compared to the mortality actuarial assumptions.	
Participation in the Minnesota Post Retirement Investment Fund	The share of the total assets of the Minnesota Post Retirement Investment Fund (MPRIF) attributable to each statewide Minnesota public pension plan (TRA, PERA, or MSRS) based on the amount of fully funded MPRIF reserves attributable to retirees of the respective plan.	
Portfolio	The collection of investment securities owned by a pension fund.	
Post Fund	The Minnesota Post Retirement Investment Fund (MPRIF).	
Post-Retirement Increases or Adjustments	The practice of granting additional benefits for retired persons during the course of their retired lifetimes, generally intended to replace all or a portion of inflation.	
Post-Retirement Interest Actuarial Assumption	The established rate of expected future investment earnings on invested assets attributable to retirees during the period of their retirement for use in actuarial determination.	
Pre-Retirement Interest Actuarial Assumption	The established rate of expected future investment earnings on invested assets attributable to active members during their active working lifetime for use in actuarial determinations.	
Realized Investment Income	The proceeds obtained from investment securities of the pension plan, derived from interest paid on bonds, dividends paid on stocks, and net realized gains or losses on the sale of investments.	
Realized Gains or Losses	The positive or negative difference between the cost (purchase price) of an investment security and the sale price of that security.	
Required Reserves	The actuarially determined present value of a stream of future benefit payments that is transferred from the active fund of a statewide Minnesota public pension plan to the Minnesota Post Retirement Investment Fund (MPRIF) upon retirement.	
Stocks	The equity or ownership interest in a corporation, issued by the corporation in the form of shares, and traded on an exchange or otherwise.	
Unrealized Gain or Loss	The positive or negative difference between the cost (purchase price) of an investment security and the current fair market value of that security, which would be obtainable in the event of sale, but without actually selling the security.	1
Volatility	The tendency for the fair market value of investment securities, especially equity investments, to vary positively or negatively over a short period of time and within a considerable range.	1
Yield	The investment income obtained or obtainable from an investment security in the form of interest on bonds, dividends on equities, and any net realized gain upon security sale.	

Coordinated Plan Contribution Rate Increases

Increase contributions to the Coordinated Plan incrementally until projected required contributions are met.

Effective Date	Employee Rate	Employer Rate	
Current	5.10 %	5.53 %	
January 1, 2006	5.50 %	6.00 % (\$19.8M)	
January 1, 2007	5.75 %	6.25 % (\$10.5M)	
January 1, 2008	6.00 %	6.50 % (\$10.5M)	
January 1, 2009	6.00 %	6.75 % (\$10.5M)	
January 1, 2010	6.00 %	7.00 % (\$10.5M)	
Total Change	0.9	1.47 (\$61.8M)	

Study by consulting actuaries shows incrementally adjusting rates to 13 percent of covered salaries by 2010 is what is needed to fully fund the plan by 2031.

Cost to employees:

The chart below shows the annual cost to an employee at various salary levels as a result of the proposed contribution rate increases. The reduction in take-home pay will be less than shown since the contribution is tax-deferred. For example, an employee earning \$30,000, with a total contribution increase after three years of 0.9 percent of pay, will see about a \$181 reduction in take home pay, assuming the person has a federal and state tax liability of 33 percent ($$270 \times 67\% = 181 net pay reduction).

		Annual Cost To Employee Based on proposed contribution rate increases			
Annual	0.40	0.25	0.25	Total after	Total net pay
Salary	01/01/06	01/01/07	01/01/08	fully implemented	reduction after tax-deferral
\$20,000	\$80	\$50	\$50	\$180	\$120.60
\$30,000	\$120	\$75	\$75	\$270	\$180.90
\$40,000	\$160	\$100	\$100	\$360	\$241.20
\$50,000	\$200	\$125	\$125	\$450	\$301.50
\$60,000	\$240	\$150	\$150	\$540	\$361.80

Why is this increase needed?

Coordinated Plan contribution deficiency has persisted for 12 out of last 14 years.

- Funded ratio has declined from 90 percent as of 7/1/99 to about 77 percent on 7/1/04.
- Market declines between fiscal years 2000 2003 worsened funded percentage and compounded contribution shortfalls.
- The Board considered lower benefits for future PERA members, but found no measurable contribution relief from this approach.

Police and Fire Fund Contribution Rate Increases

For over a decade, the contributions to the Police and Fire Plan have been less than what was needed to cover the ongoing cost of the benefits being earned by the members (Normal Cost). The ongoing cost of the Police and Fire Plan benefits, plus administrative expenses, is about 22.5 percent of the salaries of the covered members. We have been collecting only 15.5 percent of salaries since 1999. Normal cost has risen from about 20 percent of pay to over 22 percent pay as a result of earlier retirements, more disability benefits awarded and longer life expectancies. (*Police and Fire members do not contribute to Social Security.*)

The Police and Fire Fund was over 100 percent funded for many years, so collecting contributions at a lower rate did not harm the fund. We could draw on the assets over 100 percent funding to make up the difference between what we had been collecting and what the benefits cost. The Police and Fire Fund has now dropped to about 101 percent funding and is expected to drop below 100 percent next year.

	Employee	Employer
Current Rates	6.2	9.3
Proposed Rates	9.0	13.5

The increased rates will result in additional cost to the employers of about \$25 million annually.

Cost	to	employees	000000 000000	2.8	percent	of	salary	
------	----	-----------	------------------	-----	---------	----	--------	--

Salary	Increased contribution before taxes	Savings from tax- deferred status of contributions*	Net reduction in pay
\$30,000	\$840	\$277.20	\$562.80
\$40,000	\$1,120	\$369.60	\$750.40
\$50,000	\$1,400	\$462.00	\$938.00
\$60,000	\$1,680	\$554.40	\$1,125.60
\$70,000	\$1,960	\$646.80	\$1,313.20
	federal and state tax rate of 33		

Benefit Change - reduced augmentation - all plans

The Board is considering a proposal to **modify augmentation** (interest) paid on the benefits of those who terminate public employment after the effective date of the change (proposed to be 01/01/06). The proposed augmentation rate will be equal to 2.5 percent per year from date of termination to age 55. The current augmentation feature provides 3 percent per year to age 55 and 5 percent thereafter until the person chooses to start drawing a retirement benefit. Projected cost savings for Coordinated Plan is 0.35 percent of pay (equals about \$14.8 million per year).

Mary Vanek, Executive Director (651) 296-8358
