Re: Public Utilities Commission Application

President of the Senate

Governor Walz and Lieutenant Governor Flanagan:

I'm writing to volunteer to serve another term on the Minnesota Public Utilities Commission. Six years ago, I was both humbled and honored by the trust Governor Dayton placed in me to give a voice to the people of Minnesota on the Commission. I would be equally humbled and honored if you would give me the opportunity to continue to represent them for another 6 years.

I am available to talk with you and your office on the full range of topics related to the Commission's important work at this very exciting time of utility transition. Nonetheless, for this letter of introduction I wanted to emphasize three themes for your consideration: the experience I bring to continued service, my common sense-collaborative-get things done approach and what I believe is a strong policy alignment with your administration's vision on energy transition.

Experience — When first asked 6 years ago to consider seeking appointment on the PUC I felt I had a pretty solid understanding of the Commission. I was one of the lead lobbyists on the passage of the Renewable Energy Standard, Mercury Emissions Reduction legislation and many other policies related to the Commission's work. Soon after starting on the Commission I learned how little I actually did know. I have had a significant education on

the work we do and have gained a substantial institutional knowledge on so many fronts. I feel it's my duty to offer my services to give you the option of keeping that institutional knowledge at the table as we seek to make positive changes in our energy future.

In addition to gaining a deep institutional knowledge of the big issues we are facing I have not been afraid to dive into the every day work of the Commission. In a lot of ways telecommunications policy is often forgotten about, but I've delved into finding ways to improve our 911 system, service quality, fight against spoofing and much more in this field. One thing I'm most proud of is working to improve several of the telecommunications programs to help the disabled and low-income that were forgotten and needed a fresh look. I worked hard to build coalitions within state agencies and nonprofits to help bring about improvements to those programs.

Collaboration — When I first started in public service while in high school back in the 1980s volunteering for State Senator Bob Schmitz from Jordan Minnesota, it was a time when working across political divides to find common ground to get things done was the highest compliment. A collaborative get things done style is what I learned from my father who served on the local school board and my uncle Robert Tuma who served as a County Commissioner in our home county of Rice. Despite the pressures of these times I have held fast to this tried and true collaborative approach.

With that in mind, as we go through the major transition we are facing in the energy field it is important to have a Commission that is viewed as collaborative and not easily divided. I try hard to create a collaborative atmosphere with my fellow Commissioners and stakeholders. In particular, I cannot praise you enough for your first two appointments of Commissioners Means and Sullivan. I have enjoyed working with them and have worked hard to help them succeed by providing my institutional knowledge as much as I can. Chair Sieben and I have a solid working relationship and our visions for the Commission are strongly aligned. This positive working environment that I try to help foster with these wonderful colleagues is a big reason I would enjoy the opportunity to continue to serve.

Policy Alignment - As someone who has long worked in the policy arena and now serves in a position steeped in the energy transition I am very confident we have a very strong alignment regarding that transition here in our home state. As a Commissioner I am bound by the duty to uphold the law in this quasi-judicial institution where I must remain neutral and objective.

Nonetheless, the Commission has also been given broad legislative style duties in various areas. Therefore, my views on energy policy are important for you to understand in making the decision about my application. I can assure you that I hold the belief that Minnesota can and should succeed in meaningful decarbonization and create a stronger economy because of it. I believe for this to be truly successful it needs to be a collaborative bipartisan effort.

My Republican credentials are strong with the work I've done as a 4 term Republican legislator, as a lobbyist who has championed conservative initiatives in the area of education and my long continued involvement in my local Republican Party, Therefore, I do maintain a unique position as a strong Republican who has not been afraid to work hard for a decarbonized clean energy future.

Your Administration has an historic opportunity to decarbonize our energy and transportation systems and build a strong Minnesota economy in the process. A big part of making this legacy a reality is the individuals you appoint to the Commission. I have a proven track record as a leader in the energy community and am proud to occupy a unique space as a Republican who unabashedly supports a decarbonized clean energy future. A future that is not only

RECEIVED
government will make your

built on a clean energy backbone but is also just and equitable for communities and workers. One that equitably shares the burdens and benefits of the clean energy transition. I strongly support the mission of the PUC within our regulatory compact between our state and regulated utilities and recognize that it is our responsibility as regulators to ensure universal access to utility services, and fair and reasonable rates in addition to this clean energy future.

I hope my experience, my collaborative approach and our policy will make decision easier. Again, I truly would be honored and humbled by your trust in me to serve the people of Minnesota for another 6 years on the Commission and I promise if I am given 110% to make Minnesota's energy transition a reality.

Please let me know if you need any additional information. Thank you for your consideration.

President of the Senate

Sincerely,

John A. Tuma
