The day treatment program must stabilize the client's mental health status while developing and improving the client's independent living and socialization skills. The goal of the day treatment program must be to reduce or relieve the effects of mental illness and provide training to enable the client to live in the community. Day treatment programs are not part of inpatient or residential treatment services. When a day treatment group that meets the minimum group size requirement temporarily falls below the minimum group size because of a member's temporary absence, medical assistance covers a group session conducted for the group members in attendance. A day treatment program may provide fewer than the minimally required hours for a particular child during a billing period in which the child is transitioning into, or out of, the program.

(b) To be eligible for medical assistance payment, a provider entity must deliver the service components of children's therapeutic services and supports in compliance with the following requirements:

(1) psychotherapy to address the child's underlying mental health disorder must be documented as part of the child's ongoing treatment. A provider must deliver, or arrange for, medically necessary psychotherapy, unless the child's parent or caregiver chooses not to receive it or the provider determines that psychotherapy is no longer medically necessary. When a provider determines that psychotherapy is no longer medically necessary, the provider must update required documentation, including but not limited to the individual treatment plan, the child's medical record, or other authorizations, to include the determination. When a provider determines that a child needs psychotherapy but psychotherapy cannot be delivered due to a shortage of licensed mental health professionals in the child's community, the provider must document the lack of access in the child's medical record;

(2) individual, family, or group skills training is subject to the following requirements:

(i) a mental health professional, clinical trainee, or mental health practitioner shall provide skills training;

The written plan must document actions that the family 9.20 should be prepared to take to resolve or stabilize a crisis, such as advance arrangements for 9.21 direct intervention and support services to the child and the child's family. Crisis planning 9.22 must include preparing resources designed to address abrupt or substantial changes in the 9.23 functioning of the child or the child's family when sudden change in behavior or a loss of 9.24 usual coping mechanisms is observed, or the child begins to present a danger to self or 9.25 9.26 others; (4) mental health behavioral aide services must be medically necessary treatment services, 9.27 identified in the child's individual treatment plan. To be eligible for medical assistance 9.28 payment, mental health behavioral aide services must be delivered to a child who has been 9.29 9.30 diagnosed with an emotional disturbance or a mental illness, as provided in subdivision 1, paragraph (m). The mental health behavioral aide must document the delivery of services 9.31 in written progress notes.
