33.23	readily accessible on the Internet and
33.24	identified as having received funding from the
33.25	environment and natural resources trust fund.
33.26	Subd. 14. Project Requirements

34.23	management plan that, to the degree
34.24	practicable, is consistent with the
34.25	highest-quality conservation and ecological
34.26	goals for the restoration site. Consideration
34.27	should be given to soil, geology, topography,
34.28	and other relevant factors that would provide
34.29	the best chance for long-term success and
34.30	durability of the restoration project. The plan
34.31	must include the proposed timetable for
34.32	implementing the restoration, including site
34.33	preparation, establishment of diverse plant
34.34	species, maintenance, and additional
34.35	enhancement to establish the restoration;

35.1	identify long-term maintenance and
35.2	management needs of the restoration and how
35.2	the maintenance, management, and
	enhancement will be financed; and take
35.4	i
35.5	advantage of the best-available science and

35.13	the expenditure. Restorations must be
35.14	evaluated relative to the stated goals and
35.15	standards in the restoration plan, current
35.16	science, and, when applicable, the Board of
35.17	Water and Soil Resources' native vegetation
35.18	establishment and enhancement guidelines.
35.19	The evaluation must determine whether the
35.20	restorations are meeting planned goals,
35.21	identify any problems with implementing the
35.22	restorations, and, if necessary, give
35.23	recommendations on improving restorations.
35.24	The evaluation must be focused on improving
35.25	future restorations.
35.26	(e) All restoration and enhancement projects
35.27	funded with money appropriated in this section
35.28	must be on land permanently protected by a
35.29	conservation easement or public ownership.
35.30	(f) A recipient of money from an appropriation
35.31	under this section must give consideration to
35.32	contracting with Conservation Corps
35.33	Minnesota for contract restoration and

37.8	must prepare an ecological restoration and				
37.9	management plan in compliance with				
37.10	paragraph (c), including sufficient funding for				
37.11	implementation unless the work plan addresses				
37.12	why a portion of the money is not necessary				
37.13	to achieve a high-quality restoration.
