March 23, 2022

The Honorable Carla Nelson
Chair, Senate Committee on Taxes

Re: S.F. 3692 Nelson - Individual income and corporate franchise taxes, sales taxes, property taxes, local government aids, and other miscellaneous tax provisions modification.

Chair Nelson and Committee Members,

On behalf of the Minnesota Association of Soil and Water Conservation Districts (MASWCD), thank you for the opportunity to express our support for the Soil and Water Conservation District Aid provisions included in S.F. 3692. These provisions would establish a standing, statutory appropriation of general funds from the Department of Revenue to Soil and Water Conservation Districts (SWCDs) statewide, in the amount of \$22 million per year.

SWCDs are the technical experts and “boots on the ground.” Our staff and elected board members have the trust of their community members and are able to help landowners work through conservation programs from start to finish.

Funding for SWCDs is a shared obligation of both state and local resources. Counties are a strong local partner for the local share of funding and we greatly appreciate their support. State funding the past several years has been a struggle, though.

While we’re truly grateful for the past several years of Clean Water Fund appropriations for funding our boots on the ground across the state, each two years poses challenges and uncertainty around that funding. The funding proposed in SWCD Aid would provide a more efficient and longer-term funding mechanism that would allow SWCDs across the state to support implementation of “on-the-ground” conservation projects that protect and improve Minnesota’s natural resources. This would also allow us to more adequately leverage federal conservation resources, and it would allow more of the Clean Water Funds to go to on-the-ground implementation in the future.

MASWCD represents the state’s 88 soil and water conservation districts, including their 440 elected supervisors and their more than 460 employees. Soil and Water Conservation Districts are political subdivisions of the State established under Minnesota Statute Chapter 103C. Each SWCD is governed by a board of elected supervisors. SWCD law is implemented across 100% of the state.

As water quality and soil health issues are prioritized in Minnesota, SWCDs' roles have expanded and now include helping landowners navigate programs and policies that are increasing in complexity. To face these challenges and increase our pace of progress toward cleaner water and healthier soils, SWCDs need more predictable and more adequate state funding. SWCD Aid will help meet those funding needs. A few examples of how SWCD Aid would benefit districts across the state include:

Olmsted SWCD would be able to enhance staffing and expand technical services to help meet the growing needs of their constituents in both urban and rural settings.

Carver SWCD would expand upon two new programs: their Pollinator Cost-Share program, and their Soil Health/Cover Crop program which provides technical assistance and cost-share program. SWCD aid would also enable the district to retain the qualified staff needed for providing these public services in a rapidly growing county.

Rock SWCD would be able to train and retain qualified staff who have earned the trust of the agricultural producers in the county, providing these local cooperators with the technical services need to get needed conservation practices implemented on their farm fields.

Lake SWCD would enhance their capacity to address critical water quality and soil erosion issues along Lake Superior and its tributaries, collaborating with neighboring SWCDs and other agencies on work as part of the Great Lakes Restoration Initiative.

Crow Wing SWCD would be able to devote staff time and resources to projects like re-routing an ATV trail to mitigate soil erosion into a nearby lake, which they currently do not have the capacity to address in a timely fashion.

Dakota SWCD would be able to hire a conservation technician for one-on-one landowner outreach and project implementation. Recent survey results have shown that SWCD staff are well respected and trusted and that landowners prefer one-on-one discussions about conservation opportunities rather than larger workshops and events.

These are just a few examples of how SWCDs across the state would use this funding to boost their capacity in getting conservation projects implemented, and they showcase the important work that could be accomplished, but where we're currently falling short.

Thank you for your consideration of SWCD Aid and how important it is to Minnesota's conservation delivery system.

Sincerely,

A handwritten signature in black ink, appearing to read "Paul A. Krabbenhoft".

Paul Krabbenhoft
