

Minnesota Bioincentive Program Reimbursements Through Q1 FY 2023

Minnesota Bioincentive claimed vs. received reimbursements

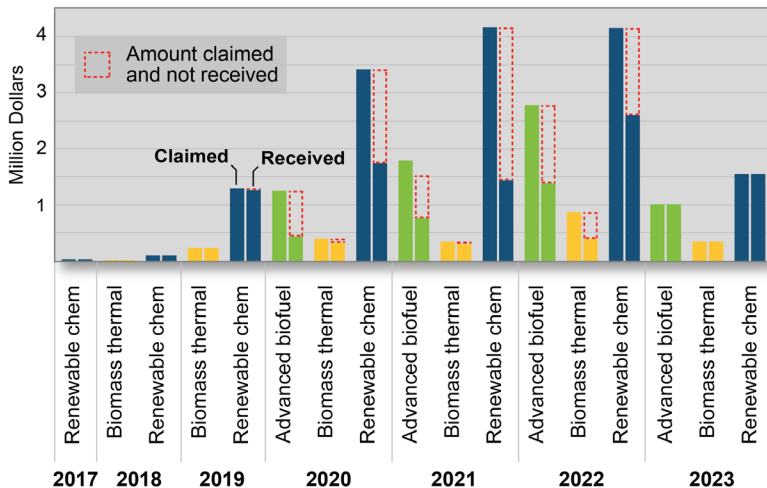

Claims operated on a first-come, first-served basis through FY2019. Beginning in FY2020, claims are reimbursed pro-rata, meaning that in any quarter where allocated funds are less than the total of eligible claims, the funds remaining in that quarter are awarded proportionally to projects. Once funds have been depleted in a given fiscal year, additional payments are not made until the next fiscal year.
