

Kerry Park Masterplan

The Kerry Park Masterplan is a fully remodeled and improved park that would be monumental for the park system and residents of International Falls. Kerry park is the center of the city which makes it the best location for a brand new park. The masterplan focuses on three main issues: connectivity/ safety, an updated hockey arena, added health and wellness center, and new amenities introduced to the city of International Falls as well as updating and improving the ones that are already there.

The new layout of the road and parking lot pushes the traffic flow around the outside perimeter of the recreational areas of the park. Once in the park, one does not have to ever cross traffic in order to get from one amenity to the other creating a safe and relaxing environment.

The hockey stadium structurally is in need of repair. Due to the costs of the repair and demands the city needs for its residents, a new building is proposed with added amenities. The new 49,000SF facility will add community space, a large commercial kitchen, possible daycare, basketball courts, concessions, Zamboni storage, and a running track above and around the basketball courts.

After a full comprehensive masterplan study of the International Falls park system, we were able to determine the amenities Kerry Park needs. It was also determine what could be removed in order to make room for more amenities the city of International Falls is missing. A few of the focal points are the ~33' sledding hill, splash park, rotated softball field, dog park, and ice skating trail. These amenities are ones most people will typically travel to, and with Kerry Park being so centrally located creates a great opportunity for all of the residents of International Falls to enjoy.

- A** PLAYGROUND AND SPLASH PARK
- B** ROTATED SOFTBALL FIELD
- C** SLEDDING HILL
- D** PARK ENTRY SIGN OR SCULPTURE
- E** ROLLERBLADE AND SCOOTER/ SKATING TRAIL
