SENATE STATE OF MINNESOTA NINETY-THIRD SESSION

S.F. No. 4

| (SENATE AUT | HORS: FREN | TZ, Mohamed, Maye Quade, Xiong and Mitchell) |
|-------------|------------|---|
| DATE | D-PG | OFFICIAL STATUS |
| 01/04/2023 | 71 | Introduction and first reading |
| | | Referred to Energy, Utilities, Environment, and Climate |
| 01/05/2023 | 83 | Author added Maye Quade |
| 01/09/2023 | 116 | Author added Xiong |
| 01/17/2023 | 209 | Author added Port |
| 01/25/2023 | 381 | Author stricken Port |
| | 382 | Author added Mitchell |
| 01/27/2023 | 428a | Comm report: To pass as amended |
| | 457 | Second reading |
| | | Referred to for comparison to HF7 |
| 02/01/2023 | 552a | Rule 45-amend, subst. General Orders HF7, SF indefinitely postponed |

A bill for an act

| 1.2 | relating to energy; modifying electric utility renewable energy standard obligations; |
|------|---|
| 1.3 | providing for certain utility cost recovery; exempting certain wind projects from |
| 1.4 | certificate of need proceedings; including low-voltage transmission lines in the |
| 1.5 | definition of "solar energy generating system" for siting purposes; adding provisions |
| 1.6 | supporting local energy-related employment; modifying Public Utility Commission |
| 1.7 | authority to issue site permits for electric generation facilities; making technical |
| 1.8 | changes; amending Minnesota Statutes 2022, sections 216B.16, subdivision 13; |
| 1.9 | 216B.1645, subdivision 2; 216B.1691, subdivisions 1, 2a, 2b, 2d, 2e, 2f, 3, 4, 5, |
| 1.10 | 7, 9, 10, by adding subdivisions; 216B.2422, subdivisions 1, 3, 5, by adding |
| 1.11 | subdivisions; 216B.243, subdivision 8; 216E.01, subdivision 9a; 216E.03, |
| 1.12 | subdivisions 5, 7, 10, 11; 216E.04, subdivision 2; 216F.04; repealing Minnesota |
| 1.13 | Statutes 2022, section 216B.1691, subdivision 2. |
| | |

1.14 BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF MINNESOTA:

| 1.15 | Section 1. Minnesota | Statutes 2022, secti | on 216B.16, subdivis | ion 13, is amended to read: |
|------|----------------------|----------------------|----------------------|-----------------------------|
|------|----------------------|----------------------|----------------------|-----------------------------|

1.16 Subd. 13. Economic and community development. The commission may allow a

- 1.17 public utility to recover from ratepayers the <u>reasonable</u> expenses incurred (1) for economic
- 1.18 and community development, and (2) to employ local workers, as defined in section
- 1.19 <u>216B.2422</u>, subdivision 1, to construct and maintain generation facilities that supply power
- 1.20 <u>to the public utility's customers</u>.

1.21 **EFFECTIVE DATE.** This section is effective the day following final enactment.

- 1.22 Sec. 2. Minnesota Statutes 2022, section 216B.1645, subdivision 2, is amended to read:
- 1.23 Subd. 2. Cost recovery. The (a) The following expenses are recoverable from utility
- 1.24 ratepayers:

| | SF4 | REVISOR | RSI | S0004-1 | 1st Engrossment |
|------|------------------|---|---------------------------------|-----------------------------------|---------------------------------|
| 2.1 | (1) exp | enses incurred to empl | loy local workers | s, as defined in section | n 216B.2422, |
| 2.2 | | n 1, to construct and ma | | | |
| 2.3 | customers; | and | | | |
| 2.4 | <u>(2)</u> exp | enses incurred by the u | utility over the du | aration of the an appr | oved contract or the |
| 2.5 | useful life | of the an investment a | nd expenditures | made pursuant to sec | tion 116C.779 shall |
| 2.6 | be recover | able from the ratepaye | rs of the utility, t | o the extent, provided | <u>d</u> they are not offset |
| 2.7 | by utility r | evenues attributable to | the contracts, in | vestments, or expend | litures. |
| 2.8 | <u>(b)</u> Upc | on petition by a public u | tility, the commis | ssion shall approve or | approve as modified |
| 2.9 | a rate sche | dule providing for the | automatic adjust | ment of charges to re | cover the expenses |
| 2.10 | or costs ap | proved by the commiss | ion under subdiv | ision 1, which, in the | case of transmission |
| 2.11 | expenditur | es, are limited to the po | ortion of actual tra | nsmission costs that a | are directly allocable |
| 2.12 | to the need | l to transmit power from | m the renewable | sources of energy. The | he commission may |
| 2.13 | not approv | e recovery of the costs | s for that portion | of the power generate | ed from sources |
| 2.14 | governed b | by this section that the | utility sells into | the wholesale market | |
| 2.15 | EFFEC | C TIVE DATE. This se | ection is effective | e the day following fi | nal enactment. |
| 2.16 | Sec. 3. N | linnesota Statutes 2022 | 2, section 216B.1 | 691, subdivision 1, i | s amended to read: |
| 2.17 | Subdiv | ision 1. Definitions. <u>(</u> a | a) For purposes o | of this section, the fol | lowing terms have |
| 2.18 | the meanin | ng given them. | | | |
| 2.19 | <u>(b) "Ca</u> | rbon-free" means a tec | hnology that gen | erates electricity with | out emitting carbon |
| 2.20 | dioxide. | | | | |
| 2.21 | <u>(a) (c)</u> l | Unless otherwise speci | fied in law, "elig | ible energy technolog | y" means an energy |
| 2.22 | technology | that generates electric | city from the foll | owing renewable ene | rgy sources: |
| 2.23 | (1) sola | ır; | | | |
| 2.24 | (2) win | ıd; | | | |
| 2.25 | (3) hyd | roelectric with a capac | city of <u>: (i)</u> less the | an 100 megawatts <u>; or</u> | · (ii) 100 megawatts |
| 2.26 | or more, p | rovided that the facility | y is in operation | as of the effective dat | te of this act; |
| 2.27 | (4) hyd | rogen , provided that af | fter January 1, 20 | 10, the hydrogen mus | st be generated from |
| 2.28 | the resourc | ces listed in this paragr | aph; or | | |
| 2.29 | (5) bio | mass, which includes, | without limitatio | n, landfill gas; an ana | aerobic digester |
| 2.30 | system; the | e predominantly organ | ic components of | f wastewater effluent | , sludge, or related |
| 2.31 | by-product | ts from publicly owned | d treatment work | s, but not including in | ncineration of |
| 2.32 | wastewate | r sludge to produce ele | ectricity; and <u>, exc</u> | cept as provided in su | bdivision 1a, an |

| | SF4 | REVISOR | RSI | S0004-1 | 1st Engrossment |

|-----|---------|-----|---------|-----------------|
|-----|---------|-----|---------|-----------------|

renewable energy credits for electricity generated by eligible energy technology. The credits 11.1 must represent energy produced by an eligible energy technology, as defined in subdivision 11.2 1. Each kilowatt-hour of renewable energy credits must be treated the same as a kilowatt-hour 11.3 of eligible energy technology generated or procured by an electric utility if it is produced 11.4 by an eligible energy technology. The program must permit a credit to be used only once, 11.5 except that a credit may be used to satisfy both the carbon-free energy standard obligation 11.6 under subdivision 2g and either the renewable energy standard obligation under subdivision 11.7 2a or the solar energy standard obligation under subdivision 2f, if the credit meets the 11.8 requirements of each subdivision. The program must treat all eligible energy technology 11.9 equally and shall not give more or less credit to energy based on the state where the energy 11.10 was generated or the technology with which the energy was generated. The commission 11.11 must determine the period in which the credits may be used for purposes of the program. 11.12

(b) In lieu of generating or procuring energy directly to satisfy the eligible energy
technology objective or a standard of this section obligation under subdivision 2a, 2f, or
<u>2g</u>, an electric utility may utilize renewable energy credits allowed under the program to
satisfy the objective or standard.

11.17 (c) The commission shall facilitate the trading of renewable energy credits between11.18 states.

11.19 (d) The commission shall require all electric utilities to participate in a

11.20 commission-approved credit-tracking system or systems. Once a credit-tracking system is11.21 in operation, the commission shall issue an order establishing protocols for trading credits.

(e) An electric utility subject to subdivision 2a, paragraph (b), may not sell renewable
 energy credits to an electric utility subject to subdivision 2a, paragraph (a), until 2021.

11.24 **E**

EFFECTIVE DATE. This section is effective the day following final enactment.

11.25 Sec. 13. Minnesota Statutes 2022, section 216B.1691, subdivision 5, is amended to read:

Subd. 5. Technology based on fuel combustion. (a) Electricity produced by fuel
combustion through fuel blending or co-firing under paragraph (b) may only count toward
a utility's objectives or standards standard obligation under subdivision 2a if the generation
facility:

(1) was constructed in compliance with new source performance standards promulgated
under the federal Clean Air Act, United States Code, title 42, section 7401 et seq., for a
generation facility of that type; or

(2) employs the maximum achievable or best available control technology available fora generation facility of that type.

(b) An eligible energy technology may blend or co-fire a fuel listed in subdivision 1,
paragraph (a) (c), clause (5), with other fuels in the generation facility, but only the percentage
of electricity that is attributable to a fuel listed in that clause can be counted toward an
electric utility's renewable energy objectives standard obligation under subdivision 2a.

12.7

EFFECTIVE DATE. This section is effective the day following final enactment.

Sec. 14. Minnesota Statutes 2022, section 216B.1691, subdivision 7, is amended to read: 12.8 12.9 Subd. 7. **Compliance.** The commission must regularly investigate whether an electric utility is in compliance with its good faith objective under subdivision 2 and the electric 12.10 utility's standard obligation under subdivision subdivisions 2a, 2f, and 2g. If the commission 12.11 finds noncompliance, it may order the electric utility to construct facilities, purchase energy 12.12 generated by eligible energy technology, purchase renewable energy credits, or engage in 12.13 other activities to achieve compliance. If an electric utility fails to comply with an order 12.14 under this subdivision, the commission may impose a financial penalty on the electric utility 12.15 12.16 in an amount not to exceed the estimated cost of the electric utility to achieve compliance. The penalty may not exceed the lesser of the cost of constructing facilities or purchasing 12.17 credits. The commission must deposit financial penalties imposed under this subdivision 12.18 in the energy and conservation account established in the special revenue fund under section 12.19 216B.241, subdivision 2a. This subdivision is in addition to and does not limit any other 12.20 authority of the commission to enforce this section. 12.21

12.22

EFFECTIVE DATE. This section is effective the day following final enactment.

Sec. 15. Minnesota Statutes 2022, section 216B.1691, subdivision 9, is amended to read:
Subd. 9. Local benefits. (a) The commission shall take all reasonable actions within its
the commission's statutory authority to ensure this section is implemented to maximize in
a manner that maximizes net benefits to all Minnesota citizens, balancing. Reasonable
actions the commission must take and benefits that must be maximized include but are not
limited to:

12.29 (1) the creation of high-quality jobs in Minnesota paying wages that support families;

12.30 (2) recognition of the rights of workers to organize and unionize;

16.1 conjunction with other external factors, including socioeconomic costs, when evaluating
16.2 and selecting resource options in all proceedings before the commission, including resource
16.3 plan and certificate of need proceedings.

(b) The commission shall provisionally adopt and apply the draft cost of greenhouse gas 16.4 emissions valuations presented in the United States Environmental Protection Agency's 16.5 EPA External Review Draft of Report on the Social Cost of Greenhouse Gases: Estimates 16.6 16.7 Incorporating Recent Scientific Advances, released in September 2022, including the time horizon, global estimates of damages, and the full range of discount rates from 2.5 to 1.5 16.8 percent, with two percent as the central estimate. The commission shall adopt the estimates 16.9 contained in the final version of the external review draft report when it becomes available. 16.10 16.11 (c) If, at any time, the estimates adopted by the commission under paragraph (a) are exceeded by estimates released by the federal Interagency Working Group on the Social 16.12 Cost of Greenhouse Gases or its successors, the commission shall adopt the working group 16.13 estimates. 16.14 16.15 (d) The commission shall establish interim environmental cost values associated with each method of electricity generation by March 1, 1994. These values expire on the date 16.16 the commission establishes environmental cost values under paragraph (a). 16.17 **EFFECTIVE DATE.** This section is effective the day following final enactment. 16.18 Sec. 19. Minnesota Statutes 2022, section 216B.2422, is amended by adding a subdivision 16.19 to read: 16.20 Subd. 4a. Preference for local job creation. As part of a resource plan filing, a utility 16.21 must report on associated local job impacts and the steps the utility and the utility's energy 16.22 suppliers and contractors are taking to maximize the availability of construction employment 16.23 opportunities for local workers. The commission must consider local job impacts and give 16.24 16.25 preference to proposals that maximize the creation of construction employment opportunities for local workers, consistent with the public interest, when evaluating any utility proposal 16.26 that involves the selection or construction of facilities used to generate or deliver energy to 16.27 serve the utility's customers, including but not limited to an integrated resource plan, a 16.28

16.29 <u>certificate of need, a power purchase agreement, or commission approval of a new or</u>

16.30 refurbished electric generation facility. The commission must, to the maximum extent

16.31 possible, prioritize the hiring of workers from communities hosting retiring electric generation

16.32 <u>facilities</u>, including workers previously employed at the retiring facilities.

| or | anization and are wholly owned by a public utility required to file a resource plan under |
| 1 | section. The order may: |
| | (1) require the public utility to develop and implement a plan to operate such units only |
| 11 | ing the months of June, July, August, December, January, and February, other than for |
| | ergency or reliability purposes; or |
| | (2) establish an annual limit on the carbon dioxide emissions from such units. |
| | (b) Nothing in this subdivision affects a public utility's obligation to comply with the |
| | visions of section 216B.1691. |
| | EFFECTIVE DATE. This section is effective the day following final enactment. |
| | ec. 23. Minnesota Statutes 2022, section 216B.243, subdivision 8, is amended to read: |
| | Subd. 8. Exemptions. (a) This section does not apply to: |
| | (1) cogeneration or small power production facilities as defined in the Federal Power |
| | , United States Code, title 16, section 796, paragraph (17), subparagraph (A), and |
| а | agraph (18), subparagraph (A), and having a combined capacity at a single site of less |
| 1 | n 80,000 kilowatts; plants or facilities for the production of ethanol or fuel alcohol; or |
| n | case where the commission has determined after being advised by the attorney general |
| 1 | its application has been preempted by federal law; |
| | (2) a high-voltage transmission line proposed primarily to distribute electricity to serve |
| ŀ | demand of a single customer at a single location, unless the applicant opts to request |
| 1 | the commission determine need under this section or section 216B.2425; |
| | (3) the upgrade to a higher voltage of an existing transmission line that serves the demand |
| f | single customer that primarily uses existing rights-of-way, unless the applicant opts to |
| e | uest that the commission determine need under this section or section 216B.2425; |
| | (4) a high-voltage transmission line of one mile or less required to connect a new or |
| p | raded substation to an existing, new, or upgraded high-voltage transmission line; |
| | (5) conversion of the fuel source of an existing electric generating plant to using natural |
| ga | • ? |
| | (6) the modification of an existing electric generating plant to increase efficiency, as |
| 0 | g as the capacity of the plant is not increased more than ten percent or more than 100 |
| | gawatts, whichever is greater; |

|-----|---------|-----|---------|-----------------|
|-----|---------|-----|---------|-----------------|

(7) a <u>large wind energy conversion system, as defined in section 216F.01, subdivision</u>
<u>2</u>, or <u>a solar electric generation facility energy generating system, as defined in section</u>
<u>216E.01, subdivision 9a, if the system or facility is owned and operated by an independent</u>
power producer and the electric output of the system or facility:

(i) is not sold to an entity that provides retail service in Minnesota or wholesale electric
 service to another entity in Minnesota other than an entity that is a federally recognized
 regional transmission organization or independent system operator; or

(ii) is sold to an entity that provides retail service in Minnesota or wholesale electric
service to another entity in Minnesota other than an entity that is a federally recognized
regional transmission organization or independent system operator, provided that the system
represents solar or wind capacity that the entity purchasing the system's electric output was
ordered by the commission to develop in the entity's most recent integrated resource plan
approved under section 216B.2422; or

19.14 (8) a large wind energy conversion system, as defined in section 216F.01, subdivision
19.15 2, or a solar energy generating system that is a large energy facility, as defined in section
19.16 216B.2421, subdivision 2, engaging in a repowering project that:

19.17 (i) will not result in the <u>facility system</u> exceeding the nameplate capacity under its most
19.18 recent interconnection agreement; or

(ii) will result in the <u>facility system</u> exceeding the nameplate capacity under its most
recent interconnection agreement, provided that the Midcontinent Independent System
Operator has provided a signed generator interconnection agreement that reflects the expected
net power increase.

19.23 (b) For the purpose of this subdivision, "repowering project" means:

(1) modifying a large wind energy conversion system or a solar energy generating system
 that is a large energy facility to increase its efficiency without increasing its nameplate
 capacity;

19.27 (2) replacing turbines in a large wind energy conversion system without increasing the19.28 nameplate capacity of the system; or

19.29 (3) increasing the nameplate capacity of a large wind energy conversion system.

19.30 **EFFECTIVE DATE.** This section is effective the day following final enactment and

19.31 applies to a large wind energy conversion system or a solar energy generating system whose

19.32 owner has filed an application for a certificate of need with the Public Utilities Commission

19.33 on or after that date.

Sec. 23.

20.1 Sec. 24. Minnesota Statutes 2022, section 216E.01, subdivision 9a, is amended to read:

20.2 Subd. 9a. **Solar energy generating system.** "Solar energy generating system" means a 20.3 set of devices whose primary purpose is to produce electricity by means of any combination 20.4 of collecting, transferring, or converting solar-generated energy, and may include 20.5 transmission lines designed for and capable of operating at 100 kilovolts or less that

20.6 interconnect a solar energy generating system with a high-voltage transmission line.

20.7

EFFECTIVE DATE. This section is effective the day following final enactment.

20.8 Sec. 25. Minnesota Statutes 2022, section 216E.03, subdivision 5, is amended to read:

Subd. 5. Environmental review. (a) The commissioner of the Department of Commerce 20.9 shall prepare for the commission an environmental impact statement on each proposed large 20.10 electric power generating plant or high-voltage transmission line for which a complete 20.11 application has been submitted. The commissioner shall not consider whether or not the 20.12 project is needed. No other state environmental review documents shall be required. The 20.13 commissioner shall study and evaluate any site or route proposed by an applicant and any 20.14 other site or route the commission deems necessary that was proposed in a manner consistent 20.15 20.16 with rules concerning the form, content, and timeliness of proposals for alternate sites or routes, excluding any alternate site for a solar energy generating system that was not proposed 20.17 by an applicant. 20.18

(b) For a cogeneration facility as defined in section 216H.01, subdivision 1a, that is a large electric power generating plant and is not proposed by a utility, the commissioner must make a finding in the environmental impact statement whether the project is likely to result in a net reduction of carbon dioxide emissions, considering both the utility providing electric service to the proposed cogeneration facility and any reduction in carbon dioxide emissions as a result of increased efficiency from the production of thermal energy on the part of the customer operating or owning the proposed cogeneration facility.

20.26

EFFECTIVE DATE. This section is effective the day following final enactment.

20.27

Sec. 26. Minnesota Statutes 2022, section 216E.03, subdivision 7, is amended to read:

Subd. 7. Considerations in designating sites and routes. (a) The commission's site and route permit determinations must be guided by the state's goals to conserve resources, minimize environmental impacts, minimize human settlement and other land use conflicts, and ensure the state's electric energy security through efficient, cost-effective power supply and electric transmission infrastructure. (b) To facilitate the study, research, evaluation, and designation of sites and routes, the
commission shall be guided by, but not limited to, the following considerations:

(1) evaluation of research and investigations relating to the effects on land, water and
air resources of large electric power generating plants and high-voltage transmission lines
and the effects of water and air discharges and electric and magnetic fields resulting from
such facilities on public health and welfare, vegetation, animals, materials and aesthetic
values, including baseline studies, predictive modeling, and evaluation of new or improved
methods for minimizing adverse impacts of water and air discharges and other matters
pertaining to the effects of power plants on the water and air environment;

21.10 (2) environmental evaluation of sites and routes proposed for future development and 21.11 expansion and their relationship to the land, water, air and human resources of the state;

(3) evaluation of the effects of new electric power generation and transmission
technologies and systems related to power plants designed to minimize adverse environmental
effects;

(4) evaluation of the potential for beneficial uses of waste energy from proposed large
electric power generating plants;

(5) analysis of the direct and indirect economic impact of proposed sites and routes
including, but not limited to, productive agricultural land lost or impaired;

21.19 (6) evaluation of adverse direct and indirect environmental effects that cannot be avoided
21.20 should the proposed site and route be accepted;

(7) evaluation of alternatives to the applicant's proposed site or route proposed pursuant
to subdivisions 1 and 2;

21.23 (8) evaluation of potential routes that would use or parallel existing railroad and highway
21.24 rights-of-way;

(9) evaluation of governmental survey lines and other natural division lines of agricultural
land so as to minimize interference with agricultural operations;

(10) evaluation of the future needs for additional high-voltage transmission lines in the
same general area as any proposed route, and the advisability of ordering the construction
of structures capable of expansion in transmission capacity through multiple circuiting or
design modifications;

(11) evaluation of irreversible and irretrievable commitments of resources should the
proposed site or route be approved; and

| SF4 | REVISOR | RSI | S0004-1 | 1st Engrossment |
|-----|---------|-----|---------|-----------------|
|-----|---------|-----|---------|-----------------|

(12) when appropriate, consideration of problems raised by other state and federal
agencies and local entities-;

(13) evaluation of the benefits of the proposed facility with respect to the protection and
 enhancement of environmental quality and the reliability of state and regional energy

22.5 supplies;

22.6 (14) evaluation of the proposed facility's impact on socioeconomic factors; and

22.7 (15) evaluation of the proposed facility's employment and economic impacts in the

22.8 vicinity of the facility site and throughout the state, including the quantity and quality of

22.9 construction and permanent jobs and their compensation levels. The commission must

22.10 consider a facility's local employment and economic impacts, and may reject or place

22.11 <u>conditions on a site or route permit based on these factors.</u>

(c) If the commission's rules are substantially similar to existing regulations of a federal
agency to which the utility in the state is subject, the federal regulations must be applied by
the commission.

22.15 (d) No site or route shall be designated which violates state agency rules.

(e) The commission must make specific findings that it has considered locating a route for a high-voltage transmission line on an existing high-voltage transmission route and the use of parallel existing highway right-of-way and, to the extent those are not used for the route, the commission must state the reasons.

22.20

EFFECTIVE DATE. This section is effective the day following final enactment.

22.21 Sec. 27. Minnesota Statutes 2022, section 216E.03, subdivision 10, is amended to read:

Subd. 10. **Final decision.** (a) No site permit shall be issued in violation of the site selection standards and criteria established in this section and in rules adopted by the commission. When the commission designates a site, it shall issue a site permit to the applicant with any appropriate conditions. The commission shall publish a notice of its decision in the State Register within 30 days of issuance of the site permit.

(b) No route permit shall be issued in violation of the route selection standards and
criteria established in this section and in rules adopted by the commission. When the
commission designates a route, it shall issue a permit for the construction of a high-voltage
transmission line specifying the design, routing, right-of-way preparation, and facility
construction it deems necessary, and with any other appropriate conditions. The commission
may order the construction of high-voltage transmission line facilities that are capable of

| SF4 | REVISOR | RSI | S0004-1 | 1st Engrossment |
|-----|---------|-----|---------|-----------------|
|-----|---------|-----|---------|-----------------|

expansion in transmission capacity through multiple circuiting or design modifications. The
commission shall publish a notice of its decision in the State Register within 30 days of
issuance of the permit.

(c) The commission must require as a condition of permit issuance, including issuance
of a modified permit for a repowering project, as defined in section 216B.243, subdivision
8, paragraph (b), that the recipient of a site permit to construct a large electric power
generating plant, including all of the permit recipient's construction contractors and
subcontractors on the project:

- 23.9 (1) pay no less than the prevailing wage rate, as defined in section 177.42; and
- 23.10 (2) be subject to the requirements and enforcement provisions of sections 177.27, 177.30,
- 23.11 <u>177.32</u>, 177.41 to 177.435, and 177.45.

23.12 **EFFECTIVE DATE.** This section is effective the day following final enactment.

23.13 Sec. 28. Minnesota Statutes 2022, section 216E.03, subdivision 11, is amended to read:

Subd. 11. Department of Commerce to provide technical expertise and other 23.14 assistance. (a) The commissioner of the Department of Commerce shall consult with other 23.15 state agencies and provide technical expertise and other assistance to the commission or to 23.16 individual members of the commission for activities and proceedings under this chapter 23.17 23.18 and chapters 216F and 216G. This assistance shall include the sharing of power plant siting and routing staff and other resources as necessary. The commissioner shall periodically 23.19 report to the commission concerning the Department of Commerce's costs of providing 23.20 assistance. The report shall conform to the schedule and include the required contents 23.21 specified by the commission. The commission shall include the costs of the assistance in 23.22 23.23 assessments for activities and proceedings under those sections and reimburse the special revenue fund for those costs. If either the commissioner or the commission deems it 23.24 necessary, the department and the commission shall enter into an interagency agreement 23.25 establishing terms and conditions for the provision of assistance and sharing of resources 23.26 under this subdivision. 23.27

(b) Notwithstanding the requirements of section 216B.33, the commissioner may take
 any action required or requested by the commission related to the environmental review
 requirements under chapter 216E or 216F immediately following a hearing and vote by the
 commission, prior to issuing a written order, finding, authorization, or certificate.

23.32 **EFFECTIVE DATE.** This section is effective the day following final enactment.

SF4

REVISOR

APPENDIX Repealed Minnesota Statutes: S0004-1

216B.1691 RENEWABLE ENERGY OBJECTIVES.

Subd. 2. Eligible energy objectives. Each electric utility shall make a good faith effort to generate or procure sufficient electricity generated by an eligible energy technology to provide its retail consumers, or the retail customers of a distribution utility to which the electric utility provides wholesale electric service, so that commencing in 2005, at least one percent of the electric utility's total retail electric sales to retail customers in Minnesota is generated by eligible energy technologies and seven percent of the electric utility's total retail electric sales to retail customers in Minnesota is generated by eligible energy technologies by 2010 is generated by eligible energy technologies.
