

My name is Andrew Betker I have a disability and I've been urinary incontinent and bowel incontinence. ever since I was a little baby and when I'm out and about in public, I have no place to change my diaper or a clean place to change. So I have to change in the car or a family restroom where I can't lay down and also it would be really nice to provide gloves to at adult size change tables for people that have disabilities so it's clean and sanitary for them and making it a lot more comfortable for whoever is changing in a high adjustable changing table. If I want to go out and have fun, I have very few places to go where I can change in a clean, safe environment and also a place where I can have a sanitary place to lay down. And it would also be really nice to provide sanitary wipes, so I can clean down the changing table to.
