January 10, 2023

Madam Chairwoman and members of the Senate Health and Human Services committee,

I am writing to give a voice to the 10,136 murdered babies in our state in 2021. Using data recorded by the state, of those 10,136 executed babies, only 2% were reported for medical reasons, incest or rape. The number one reason given by women for killing their unborn child was “inconvenience.”

Think about that. Inconvenience. So, when Planned Parenthood sits here and tell us that we need abortion to help women in “extreme” situations, what they’re actually protecting is murder for the sake of convenience and Planned Parenthood’s bottom line!

With Senate File 1 there are no limitations on abortion. None whatsoever. This is absurdly extreme!

To those listening, when these abortion-loving politicians tell you that they are listening to Minnesotans wishes on abortion, it’s a total lie.

The voters didn’t say they supported full term abortions on 8lb babies. The voters didn’t say they support delivering a baby half-way, snipping its spinal cord and crushing its skull.

This is Planned Parenthood wanting to stuff money in their pockets at the expense of dead babies and pro-abortion politicians looking for campaign donations.

Pro-life voters demand you vote NO on Senate File 1, and Minnesota Right to Life will make sure the most vulnerable members of your caucus answer for their votes in the 2026 elections.

For the Babies,

Ben Dorr
Executive Director
Minnesota Right to Life
