SF404

Dear Health and Human Services Committee Members:

I am strongly urge you to support the much-needed bill SF404, **Freedom to Choose**, which will give my family member on Medical Assistance the ability to choose their doctors and health care providers. I strongly support this **Freedom to Choose bill** and hope you will also.

Many families may find themselves in the position of needing a doctor or prefer a doctor that is not in a managed care network. My grandson, who was born with cancer 30 some years, may be one of these people someday.

Please support, **Vote for the Freedom to Choose bill.**

Thank you.
