SF404

Dear Health and Human Service Committee Members:

My husband and I are requesting that you please vote to support the Medicaid Freedom to Choose bill, SF404.

Our son has a very complicated health situation and there are only certain doctors and hospitals that can attend to him. We have a constant worry that, in the future, he may have a medical need that would not be covered with our Medicaid managed -care plan. If we were allowed the Freedom to Choose, we would no longer need to worry about this issue.

For all the families that have similar needs, please sign on to SF404 soon. We should all have the **Freedom to Choose** our doctors and health care providers.

Thank you for your attention.
