2107 Minnesota Senate Building  
95 University Ave W.  
St. Paul, MN 55103

March 16, 2023

Dear Chair Wiklund and Members of the Senate Health and Human Services Committee,

Thank you for the opportunity to share The Nature Conservancy's support for SF30, which would fund a grant program to replace lead service lines and establish a state goal to remove all lead services lines by 2033.

The Nature Conservancy's mission is to protect the lands and waters on which all life depends so that nature and people can thrive. Clean drinking water is fundamental to people, communities and public health. While our organization works to address water quality and quantity issues around the state, those efforts must be matched by ensuring water at Minnesotans' taps is safe to drink. The health impacts of lead in drinking water are well-known and fall disproportionately on low-income children and communities.

While the Infrastructure Investment and Jobs Act (IIJA) made funds available for inventories, mapping, and replacement of lead pipes, the need exceeds current federal funding. The State has an opportunity to match federal investments and act to address the problem quickly and at scale.

Thank you for considering SF30 and your work on behalf of Minnesotans.

Sincerely,

Stephanie Pinkalla  
Government Relations Director  
The Nature Conservancy in Minnesota

Molly Jansen  
Government Relations Specialist
