

To Whom It may Concen

When I'm at golden eagles I normally be myself when it comes to a spot or a moment I think to myself "who should I talk to ~~to~~ start the group off with me"? When I'm done with my decision I like to check-in on who I sit with. Once I'm done chatting I'd like to think what I'd start with to start my turn in the circle and feel my space around me a safe space. When I pick a spot somewhere in my personal safe space that's when I know a safe space around me in the area is something I'd get use to and happen to use it more often. When I was with golden eagles to a south dakota retreat, I'd likely wanted to learn what's outside the state of MN. When we were passing by cliffs, plains, and rivers, we stopped by a few of them to take pictures of views on top of the cliffs and also took a picture of dignity the fancy shawl dancer statue. When we got to the airbnb we unpacked and explore the backyard and the airbnb too. When it was the next day we ate breakfast and got ready for a theatre. ~~Once~~ We got there, we waited for the ~~show~~ movie to start and we saw what happened in the past from the mountain and went outside when the movie was done and they showed the byant on the walls and went back from there.
