Cultivating home with the homeless

*through a community-led, community-built
and community-funded approach.*

Each resident has their own tiny home, built to residential standards appropriate for Minnesota weather.

Six different congregations built the homes seen here. They provide housing to five individuals who were previously unsheltered.

The homes are located at Mosaic Christian Community in St. Paul.

Residents of the community share facilities and amenities such as kitchen and dining spaces, bathrooms, laundry, gardens, workshops, and gathering areas with the church building at Mosaic.
