S.F. No. 3952 - Modifying matching requirements for the lower population density broadband grant program

Author: Senator Grant Hauschild

Prepared by: Laura Paynter, Legislative Analyst, (651/296-5079)

Date: February 23, 2024

S.F. 3952 increases the maximum grant awards for the lower population density broadband grant program so up to 90 percent of a project's costs may be funded. The program supports broadband service to unserved and underserved areas of the state where a 50 percent match is not sufficient to encourage a provider to install services.
