Re: Requiring the allocation of certain incarcerated persons based on their last known address in Minnesota

Dear Elections Committee,

The Minnesota Council on Foundations is a statewide association of grantmakers focused on ensuring Minnesota has a strong charitable sector and an inclusive democracy where everyone can be seen, counted, and heard. We are committed to strengthening democratic systems and civic participation. As part of this, we support state decisions and investments that will prepare Minnesota for a full 2030 census count and redistricting processes that put people first through fair representation.

The Minnesota Council on Foundations fully supports SF3878 which promotes a more inclusive democracy by ensuring that all residents, including those who are incarcerated, have a voice in shaping the policies and laws that affect their lives. Counting incarcerated persons at their last known address in the census allows for more accurate representation in legislative districting. Counting incarcerated individuals at their home addresses helps empower their home communities and ensures the needs and interests of these communities can effectively be represented. Lastly, we emphasize the critical need to make all efforts to allow for incarcerated folks to be able to self-report their last residential addresses so that they may be accurately represented in their home district.

Thank you to the committee for your leadership in issues of democracy and fair representation and for the opportunity to submit testimony. I am happy to answer any questions or provide further information.

Sincerely,
May Yang
Senior Policy and Partnerships Manager
