RE: HF 4008/SF 4293 – Support

To members of the Minnesota Legislature:

On behalf of the Smart Heart Sports Coalition, I write to express our strong support for HF 4008/SF 4293, companion legislation currently being considered by the Minnesota Legislature. If enacted, this crucial legislation will advance best-practice, evidence-based policies that will help to save the lives of young people who experience sudden cardiac arrest (SCA) and similar cardiac emergencies throughout the state.

Launched in March of 2023, the Smart Heart Sports Coalition is comprised of leading health and patient advocacy groups, as well as major professional and college sports organizations – nearly 40 stakeholders in all. We have come together for a nationwide advocacy campaign to raise awareness and drive adoption of policies proven to prevent fatalities from SCA within school communities. These core, life-saving policies are as follows:

1. Require high schools to have in place athletic emergency action plans (EAPs) that are venue-specific, widely distributed, posted, rehearsed, and updated annually.
2. Require clearly marked automated external defibrillators (AEDs) at or in close proximity to each venue where high school practices and competitions are held.
3. Require coaches to receive cardiopulmonary resuscitation (CPR) training and education, including in the use of AEDs.

Adopting these policies is critical, especially given that sudden cardiac arrest is the leading cause of sudden death among young athletes.

If enacted, HF 4008/SF 4293 will ensure that Minnesota is a leader in protecting young athletes from a preventable fatal injury. Specifically, these bills require every public school to adopt and rehearse a cardiac emergency response plan (CERP) that specifies in writing the steps school personnel must take to immediately respond to a student or other individual who experiences a sudden cardiac arrest or similar life-threatening emergency while on school grounds or at a school-sponsored activity.

These plans will ensure that Minnesota's school communities are better equipped and prepared to respond to a SCA when they occur in school communities.

We, therefore, urge the legislature to approve this important legislation as soon as possible. Doing so will expand and support a community of lifesavers in Minnesota and represent a major victory for students throughout the state.

Sincerely,

Kenneth Edmonds
Vice President of Public Policy and Government Affairs
