<u>S</u>	bubd. 20. Publicly available information. (a) "Publicly available information" means

8.27	institution, an affiliate, or a service provider.
8.28	(b) If a financial institution designates an individual employed by an affiliate or service
8.29	provider as the financial institution's qualified individual, the financial institution must:
8.30	(1) retain responsibility for complying with this chapter;

03/20/24	SENATEE	LB	SS4157R-1

institution faces;	
(2) criteria to assess the confidentiality, integrity, and availability of the financial	
institution's information systems and customer information, including the adequacy of	
existing controls in the context of the identified risks or threats the financial institution	
faces; and	_
(3) requirements describing how:	
(i) identified risks are mitigated or accepted based on the risk assessment; and	
(ii) the information security program addresses the risks.	
(c) A financial institution must periodically perform additional risk assessments that	at:
(1) reexamine the reasonably foreseeable internal and external risks to the security,	<u>,</u>
confidentiality, and integrity of customer information that might result in the unauthori	izec
disclosure, misuse, alteration, destruction, or other compromise of customer information	on;
<u>and</u>	
(2) reassess the sufficiency of any safeguards in place to control the risks identified	<u>1</u>
under clause (1).

10.7	unauthorized acquisition of customer information; and
10.8	(ii) limit an authorized user's access to only customer information that the authorized
10.9	user needs to perform the authorized user's duties and functions or, in the case of a customer,
10.10	to limit access to the customer's own information;
10.11	(2) identifying and managing the data, personnel, devices, systems, and facilities that

10.14	strategy;
10.15	(3) protecting by encryption all customer information held or transmitted by the financial
10.16	institution both in transit over external networks and at rest. To the extent a financial
10.17	institution determines that encryption of customer information either in transit over external
10.18	networks or at rest is infeasible, the financial institution may secure the customer information
10.19	using effective alternative compensating controls that have been reviewed and approved by
10.20	the financial institution's qualified individual;
10.21	(4) adopting: (i) secure development practices for in-house developed applications
10.22	utilized by the financial institution to transmit, access, or store customer information; and

10.24	the financial institution uses to transmit, access, or store customer information;
10.25	(5) implementing multifactor authentication for any individual that accesses any
10.26	information system, unless the financial institution's qualified individual has approved in
10.27	writing the use of a reasonably equivalent or more secure access control;
10.28	(6) developing, implementing, and maintaining procedures to securely dispose of
10.29	customer information in any format no later than two years after the last date the information

11.11	(b) For information systems, monitoring and testing must include continuous monitoring
11.12	or periodic penetration testing and vulnerability assessments. Absent effective continuous
