Section 1. Minnesota Statutes 2023 Supplement, section 356.215, subdivision 11, isamended to read:

Subd. 11. Amortization contributions. (a) In addition to the exhibit indicating the level 100.6 normal cost, the actuarial valuation of the retirement plan must contain an exhibit for financial 100.7 reporting purposes indicating the additional annual contribution sufficient to amortize the 100.8 unfunded actuarial accrued liability and must contain an exhibit indicating the additional 100.9 contribution sufficient to amortize the unfunded actuarial accrued liability. For the retirement 100.10 plans listed in subdivision 8, paragraph (a), but excluding the legislators retirement plan, 100.11 100.12 the Bloomington Fire Department Relief Association, and the local monthly benefit volunteer firefighter relief associations, the additional contribution must be calculated on a level 100.13 percentage of covered payroll basis by the established date for full funding in effect when 100.14 the valuation is prepared, assuming annual payroll growth at the applicable percentage rate 100.15 set forth in the appendix described in subdivision 8, paragraph (c). For the legislators 100.16 100.17 retirement plan, the additional annual contribution must be calculated on a level annual dollar amount basis. 100.18

(b) For any retirement plan other than a retirement plan governed by paragraph (d), (e), 100.19 (f), (g), (h), (i), or (j), if there has not been a change in the actuarial assumptions used for 100.20 calculating the actuarial accrued liability of the fund, a change in the benefit plan governing 100.21 annuities and benefits payable from the fund, a change in the actuarial cost method used in 100.22 calculating the actuarial accrued liability of all or a portion of the fund, or a combination 100.23 of the three, which change or changes by itself or by themselves without inclusion of any 100.24 other items of increase or decrease produce a net increase in the unfunded actuarial accrued 100.25 liability of the fund, the established date for full funding is the first actuarial valuation date 100.26 occurring after June 1, 2020. 100.27

(c) (b) This paragraph applies only if the calculation under this paragraph for a retirement 100.28 plan results in an established date for full funding that is earlier than the established date 100.29 for full funding applicable to the retirement plan under paragraph (c). For any retirement 100.30 plan, if there has been a change in any or all of the actuarial assumptions used for calculating 100.31 the actuarial accrued liability of the fund, a change in the benefit plan governing annuities 100.32 100.33 and benefits payable from the fund, a change in the actuarial cost method used in calculating the actuarial accrued liability of all or a portion of the fund, or a combination of the three, 100.34 and the change or changes, by itself or by themselves and without inclusion of any other 100.35

items of increase or decrease, produce a net increase in the unfunded actuarial accrued
liability in the fund, the established date for full funding must be determined using the
following procedure:

(i) the unfunded actuarial accrued liability of the fund must be determined in accordance
with the plan provisions governing annuities and retirement benefits and the actuarial
assumptions in effect before an applicable change;

(ii) the level annual dollar contribution or level percentage, whichever is applicable,
needed to amortize the unfunded actuarial accrued liability amount determined under item
(i) by the established date for full funding in effect before the change must be calculated
using the investment return assumption specified in subdivision 8 in effect before the change;

(iii) the unfunded actuarial accrued liability of the fund must be determined in accordance
with any new plan provisions governing annuities and benefits payable from the fund and
any new actuarial assumptions and the remaining plan provisions governing annuities and
benefits payable from the fund and actuarial assumptions in effect before the change;

(iv) the level annual dollar contribution or level percentage, whichever is applicable,
needed to amortize the difference between the unfunded actuarial accrued liability amount
calculated under item (i) and the unfunded actuarial accrued liability amount calculated
under item (iii) over a period of 30 years from the end of the plan year in which the applicable
change is effective must be calculated using the applicable investment return assumption
specified in subdivision 8 in effect after any applicable change;

(v) the level annual dollar or level percentage amortization contribution under item (iv)
must be added to the level annual dollar amortization contribution or level percentage
calculated under item (ii);

(vi) the period in which the unfunded actuarial accrued liability amount determined in 101.24 item (iii) is amortized by the total level annual dollar or level percentage amortization 101.25 contribution computed under item (v) must be calculated using the investment return 101.26 assumption specified in subdivision 8 in effect after any applicable change, rounded to the 101.27 nearest integral number of years, but not to exceed 30 years from the end of the plan year 101.28 in which the determination of the established date for full funding using the procedure set 101.29 forth in this clause is made and not to be less than the period of years beginning in the plan 101.30 year in which the determination of the established date for full funding using the procedure 101.31 set forth in this clause is made and ending by the date for full funding in effect before the 101.32 change; and 101.33

102.1 (vii) the period determined under item (vi) must be added to the date as of which the 102.2 actuarial valuation was prepared and the date obtained is the new established date for full

102.3 funding.

102.4 (c) The established date for full funding is the date provided for each of the following
102.5 plans:

102.6 (d) (i) for the general employees retirement plan of the Public Employees Retirement 102.7 Association, the established date for full funding is June 30, 2048-;

102.23 (k) (d) For the retirement plans for which the annual actuarial valuation indicates an 102.24 excess of valuation assets over the actuarial accrued liability, the valuation assets in excess 102.25 of the actuarial accrued liability must be recognized as a reduction in the current contribution 102.26 requirements by an amount equal to the amortization of the excess expressed as a level 102.27 percentage of pay over a 30-year period beginning anew with each annual actuarial valuation 102.28 of the plan.
