

To those who support this bill SF 610

Why are you supporting this? Is it because you care about children? Is it about adults and families? If so, your bill will do the opposite. It will hurt the families who depend on daycare to support their children while they make a living. They will be forced to seek alternatives rather than disobey their consciences injecting some vaccines into their children. What problem are you trying to solve? The data that children who are not vaccinated and still exist in our schools and day care is limited and sketchy. Please make an informed decision, not a idealistic one. My thoughts are with that you that you will respect human life and the rights of parents to make the most informed and intelligent decisions for their child, including what gets injected in their bodies (un-reversible) and what location of care they are attending when the parent is not able to care for them. Please vote No to SF 610 and the subsequent government overreach and yes to empowering families.
