RE Health and Human Services
S.F. 4235

Sen. Fateh
Sen. Draheim

I'm writing about the committee that is considering modification to certain jobs
My request is to write a bill modify
The Trained Medication Aide in
Long term care
Allow the Trained Medication Aide to give
Scheduled Insulin
Not emergency insulin, Nurse should continue to give emergency insulin
Allow Trained Medication to give
Scheduled Liquid Narcotics,
not as needed called PRN
Allow Trained Medication Aide
First Aid, not wound care
Trained Medication Aide, should only work out of one Medication Cart to one hall.
Unless the facility has declared a staffing shortage

This is not alot to ask, the assisted living is has been doing this, and most cases they have less
training than what's allowed in a Nursing Home
