S.F. No. 4526 - Long-term safety net insulin program sunset repealer (as amended by the A-1 Amendment)

Author: Senator Melissa H. Wiklund

Prepared by: Nolan Hudalla, Senate Counsel (651/296-6401)

Date: March 7, 2024

Section Summaries

Section 1 (amends Laws 2020, chapter 73, section 8; Appropriations) This section extends the availability of a previously enacted appropriation to MNsure through June 30, 2027. The appropriation is currently for navigator training and compensation related to the insulin safety net program; this section would allow the funding to be used for the insulin safety net program generally.

Section 2 (Repealer; section 151.74, subdivision 16) Existing law sunsets, on December 31, 2024, Minnesota's long-term insulin safety net program. This program was enacted in 2020 and requires insulin manufacturers to maintain a patient assistance program available to patients if they meet certain eligibility criteria. This section of the bill repeals the subdivision of statutory section 151.74 that sunsets the long-term safety net program.
