

We would like to take the time to send a message of gratitude for the improvements that we've been able to make due to this grant. Being able to afford updating our child care centers, making the necessary changes to maintain compliance with correction orders from the state of MN, and creating a safer environment that's conducive to what our children need in this community has been such a blessing. A number of our parents have expressed their satisfaction of the improvements via emails, cards, etc. If there's any way that we can continue to receive your support, the SRLA staff and advisory board have a number of additional aspirations for our centers that require funding. For example we would like to update our dramatic play areas, get new chairs for the students, and continue to support our staff with learning materials.

Best regards,

Monique Stumon
