

UNIVERSITY OF MINNESOTA ACADEMIC HEALTH

The three primary roles of academic health are to provide comprehensive, hands-on training to future health care professionals, create health care breakthroughs through basic and translational research, and provide the highest-quality, innovative patient care.

WHAT ARE THE BENEFITS OF ACADEMIC HEALTH?

Academic health takes the toughest problems from the patient's perspective and looks for solutions in the laboratory.

For patients & their communities, academic health offers:

- Multidisciplinary care by highly-trained specialists
- Care innovations: new discoveries, treatments & technology
- Access to clinical trials and research
- Improving the standard of care for healthier communities
- Health care advancements for future generations

SERVING MINNESOTA

As one of America's leading research universities, we continue to be committed to bringing life-changing innovations and life-saving care to Minnesotans in ways only academic health can.

UNIVERSITY OF MINNESOTA HEALTH SCIENCES

The University of Minnesota is unique in the state and nation for the range of health professionals we train, the legacy and impact of our research, and integration of these into the care we deliver.

With all six health sciences schools (dentistry, medicine, nursing, pharmacy, public health, and veterinary medicine), interdisciplinary centers, and affiliated programs working together in this University, we have unique opportunities to explore interprofessional health care models.
