S.F. No. 4982 – Solid waste management tax; modification of dedication to resource management account

Author: Senator D. Scott Dibble

Prepared by: Nora Pollock, Senate Counsel (651/297-8066)

Date: March 25, 2024

Under current law, 70 percent of solid waste tax revenue is credited to the environmental fund for natural resource management purposes. In fiscal year 2024 and thereafter, three percent of solid waste tax revenue is deposited to the resource management account in the environmental fund and appropriated to the commissioner of the Pollution Control Agency for distribution to counties. The remainder is deposited to the general fund.

This bill modifies the distribution to the resource management account:

- FY 2025: seven percent;
- FY 2026: 20 percent; and
- FY 2027: 30 percent.

Effective July 1, 2024.
