Capital Investment Drives Our Economic Future

Completing a robust capital funding bill that includes both design-ready and shovel-worthy projects is essential to sustaining Minnesota's economy in times of instability.

Capital Investment Drives Our Economic Future

A predictable, reliable cycle of capital budget bills allows the design and construction industry to remain a healthy, stable contributor to Minnesota's economy while addressing chronic inequities in our infrastructure network, creating family-sustaining careers.

Last session's failure to complete a capital budget bill was a significant blow to our industries and its impacts are being felt in all corners of the state.

Capital Investment Drives Our Economic Future

A significant portion of the projects proposed for capital investment in 2025 are deferred maintenance to existing buildings and upgrades to infrastructure.

Delaying these essential tasks puts communities at greater risk of physical and financial harm if buildings and infrastructure continue to deteriorate.

The BJC is Ready to Work

Our skilled workforce is ready to put our pencils, our shovels, and all our skills to work to help you create better communities around Minnesota.

Please pass a robust capital investment package and help us get back on track for a better economic future for our state and all its communities.
