

The SAT Suite of Assessments

SAT at a Glance

The SAT® Suite of Assessments, which includes the SAT, the Preliminary SAT/National Merit Scholarship Qualifying Test (PSAT/NMSQT®), PSAT™ 10, and PSAT™ 8/9, is an important way for students to move along the path toward a successful future. When students take the assessments, they can use their scores to be seen by colleges and scholarship programs, and they get personalized career insights to help them understand all their options after high school.

1.9 million students in the Class of 2023 took the SAT at least once during high school, up from 1.7 million in the Class of 2022. Most students now take the SAT through SAT School Day, which research shows leads to higher college-going rates for low-income and underrepresented students.

Help Your Students Get Where They Want to Go

As your students navigate their academic journey, they'll find that the SAT is an important tool they can leverage to help them plan for college and a career. With your students' results, you can:

Show What They Know: Each assessment measures the knowledge and skills that students are learning in high school and that matter most for college and career readiness.

Get Actionable Data: Evaluate each student's results using the **online reporting portal**. Identify knowledge and skill gaps and use data from previous SAT Suite assessments to support students and inform instructional planning.

Broaden Access to AP: The **AP Potential™** tool is designed to help schools expand access to their AP® programs by helping identify students who are ready for AP based on their performance on the assessments.

Help Students Gain Career Insights: The score report maps the math and reading and writing skills measured by the SAT Suite to knowledge, skills, and abilities for occupations in the U.S. Department of Labor's O*NET database. Developed with experts, the personalized career information on the report and in the mobile app aims to spark an interest in careers.

Help Students Connect to Colleges and Scholarships: Through Connections™, students can opt to hear from nonprofit colleges, scholarship providers, and government agencies offering education programs that are interested in students like them—without having to share any personal information. Messages are delivered to them through the BigFuture School app and, when available, by mail.

THE SAT SUITE: CHARTING THE PATH TO SUCCESS

The SAT Suite of Assessments is a powerful tool for both students and educators. Whether your students are interested in a two- or four-year college, a job training program, or aren't sure what they want to do after high school, the tests will help you guide them along a clearer path, ensuring equal access to opportunities for all.

NEW DIGITAL FORMAT

Going digital means a shorter test—closer to two hours than three—and an easier testing experience for students on **Bluebook™**, College Board's new digital testing app.

The change is good news for educators too. Shorter tests mean shorter test days, and no more packing, sorting, or shipping test materials. In addition, going digital means much more flexibility for where and when the test can be administered.
