

To the Chairs and Committee;

I write in **support of SF 107** and appreciate the bill's support for local governance.

I agree, MN Statute 2024, Sec. 97B.318 should be repealed.

MN is blessed to have a rich variety of population, resources, and landscapes. Every County is unique. Since the shot gun zone issue does not affect areas uniformly this issue is best handled by the **LOCAL** officials. With varying topography and population density **The shot gun hunting issues is best handled by local officials, namely the county commissioners, where they can more effectively hear from those individuals directly affected.** I encourage you to uphold local influence and empower county commissioners to better serve their constituents.

Thank you,

Sara B.

Pine Island, MN
