

Wolves have wrecked deer hunting in Northern MN. We used to rifle hunt by Black Duck but there are no deer there anymore. The Moose is disappearing also. It's not even a hunt anymore. Luckily, we own land west of Long Prairie, MN with lots of deer. The last 5 years we have been getting pictures of wolves on our land by Long Prairie, more and more every year. We see their tracks on the gravel roads in the winter also.

I work in agriculture and have had customers as south as Grey Eagle, MN loose calves to wolves. I have a customer near Sebeka, MN that loses 10-15 calves a year with them running donkeys. We need a wolf hunt to get the wolf population back to 1250 that was first recommended for MN. I support Bill SF2720. Please do something before the entire State is lost.

Thank you,

Josh
