55.21 priority of each mode.

55.22 (b) Before finalization of any scoping document or draft scoping document for a project,
55.23 the commissioner must require a coordination field visit and walking audit of the project
55.24 corridor. To implement the requirements of this paragraph, the commissioner must develop
55.25 guidance on coordinated field visits to:

55.26 (1) begin the initial engagement process with stakeholders for projects;

55.27 (2) provide guidance on what staff should identify in observing current conditions for

73.30 (i) Vehicular traffic facing a circular green signal may proceed straight through or turn
73.31 right or left unless a sign prohibits either turn. But vehicular traffic, including vehicles

74.1 turning right or left, ~~shall~~ must yield the right-of-way to other vehicles and to pedestrians
74.2 lawfully within the intersection or adjacent crosswalk at the time this signal is exhibited.
74.3 Vehicular traffic turning left or making a U-turn to the left ~~shall~~ must yield the right-of-way
74.4 to other vehicles approaching from the opposite direction so closely as to constitute an
74.5 immediate hazard.

74.6 (ii) Vehicular traffic facing a green arrow signal, shown alone or in combination with
74.7 another indication, may cautiously enter the intersection only to make the movement indicated
74.8 by the arrow, or other movement as permitted by other indications shown at the same time.
74.9 Vehicular traffic ~~shall~~ must yield the right-of-way to pedestrians lawfully within an adjacent
74.10 crosswalk and to other traffic lawfully using the intersection.

74.11 (iii) Unless otherwise directed by a pedestrian-control signal as provided in subdivision
74.12 6, pedestrians facing any green signal, except when the sole green signal is a turn arrow,
74.13 may proceed across the roadway within any marked or unmarked crosswalk. Every driver
74.14 of a vehicle ~~shall~~ must yield the right-of-way to such pedestrian, except that the pedestrian
74.15 ~~shall~~ must yield the right-of-way to vehicles lawfully within the intersection at the time that
74.16 the green signal indication is first shown.

74.17 (2) Steady yellow indication:

74.18 (i) Vehicular traffic facing a steady circular yellow or yellow arrow signal is thereby
74.19 warned that the related green movement or flashing yellow movement is being terminated
74.20 or that a red indication will be exhibited immediately thereafter when vehicular traffic must
74.21 not enter the intersection, except for the continued movement allowed by any green arrow
74.22 indication simultaneously exhibited.

74.23 (ii) Pedestrians facing a circular yellow signal, unless otherwise directed by a
74.24 pedestrian-control signal as provided in subdivision 6, are thereby advised that there is
74.25 insufficient time to cross the roadway before a red indication is shown and ~~no~~ a pedestrian
74.26 ~~shall~~ must not then start to cross the roadway.

74.27 (3) Steady red indication:

74.28 (i) Vehicular traffic facing a circular red signal alone must stop at a clearly marked stop
74.29 line but, if none, before entering the crosswalk on the near side of the intersection or, if
74.30 none, then before entering the intersection and ~~shall~~ must remain standing until a green
74.31 indication is shown, except as follows:

74.32 (A) the driver of a vehicle stopped as close as practicable at the entrance to the crosswalk
74.33 on the near side of the intersection or, if none, then at the entrance to the intersection in

obedience to a red or stop signal, and with the intention of making a right turn may make the right turn, after stopping, unless an official sign has been erected prohibiting such movement, but ~~shall~~ must yield the right-of-way to pedestrians and other traffic lawfully proceeding as directed by the signal at that intersection; or

(B) the driver of a vehicle on a one-way street intersecting another one-way street on which traffic moves to the left ~~shall~~ must stop in obedience to a red or stop signal and may then make a left turn into the one-way street, unless an official sign has been erected prohibiting the movement, but ~~shall~~ must yield the right-of-way to pedestrians and other traffic lawfully proceeding as directed by the signal at that intersection.

(ii) Unless otherwise directed by a pedestrian-control signal as provided in subdivision 6, pedestrians facing a steady red signal alone ~~shall~~ must not enter the roadway.

(iii) Vehicular traffic facing a steady red arrow signal, with the intention of making a movement indicated by the arrow, must stop at a clearly marked stop line but, if none, before entering the crosswalk on the near side of the intersection or, if none, then before entering the intersection and must remain standing until a permissive signal indication permitting the movement indicated by the red arrow is displayed, except as follows: when an official sign has been erected permitting a turn on a red arrow signal, the vehicular traffic facing a red arrow signal indication is permitted to enter the intersection to turn right, or to turn left from a one-way street into a one-way street on which traffic moves to the left, after stopping, but must yield the right-of-way to pedestrians and other traffic lawfully proceeding as directed by the signal at that intersection.

(b) In the event an official traffic-control signal is erected and maintained at a place other than an intersection, the provisions of this section are applicable except those which can have no application. Any stop required must be made at a sign or marking on the pavement indicating where the stop must be made, but in the absence of any such sign or marking the stop must be made at the signal.

(c) When a traffic-control signal indication or indications placed to control a certain movement or lane are so identified by placing a sign near the indication or indications, no other traffic-control signal indication or indications within the intersection controls vehicular traffic for that movement or lane.

(d) A peace officer is prohibited from stopping, detaining, or issuing a citation to a pedestrian for a violation of paragraph (a), clause (2), item (ii), or (3), item (ii), unless:

(1) the officer lawfully stops or detains the pedestrian for an unrelated violation or offense; or

Every driver of a vehicle ~~shall~~ must yield the right-of-way to such pedestrian except that the pedestrian ~~shall~~ must yield the right-of-way to vehicles lawfully within the intersection at the time that either signal indication is first shown.

(2) A "Don't Walk" signal or the symbol of an "upraised hand," flashing or steady, indicates that a pedestrian ~~shall~~ must not start to cross the roadway in the direction of either signal, but any pedestrian who has partially crossed on the "Walk" or "walking person" signal indication ~~shall~~ must proceed to a sidewalk or safety island while the signal is showing.

(b) A pedestrian crossing a roadway in conformity with this section is lawfully within the intersection and, when in a crosswalk, is lawfully within the crosswalk.

117.5 (d) "Department" means the Minnesota Department of Transportation.

117.6 Subd. 2. **Research and development authorized.** (a) The commissioner must conduct

117.15 or vegetation management by other states or government entities. The research conducted
117.16 under this section must analyze different configurations and types of autonomous mowers,
117.17 including mowers that require different levels of human intervention, to research for future
117.18 statewide deployment at rest areas, at or along the trunk highway system, or on other property
117.19 owned by the department.

117.20 (c) The commissioner must research the current and potential commercial availability

117.30 signposts, other barriers, and unexpected debris that may be found on or alongside a highway
117.31 right-of-way. The research must examine the potential impact of autonomous mowing
117.32 technology on worker safety and maintenance staffing needs.

(f) The commissioner must propose an autonomous mower pilot project to further study and examine the challenges to implementing autonomous mower technology into roadside vegetation management activities. The proposed pilot project must include the proposed location for the pilot project, the autonomous mower activities examined, and the anticipated timeline for implementation of the proposed pilot project.

(5) an analysis of whether the operation of autonomous mowing technology by the department would yield improvements compared to traditional mowing methods in worker safety, congestion, environmental impact outcomes, cost savings, maintenance scheduling, or any other factor deemed relevant by the commissioner; and

(6) an analysis of the costs and any other short-term or long-term challenges posed by the pilot project or the future operation of autonomous mowing technology on property owned by the department.

Subd. 2. **Policy update.** By March 1, 2026, the commissioner, in consultation with representatives of local units of government, must update and adopt the department's cost participation policy. The updated policy must identify the circumstances where local units of government will not be responsible for any trunk highway fund eligible construction project costs to deliver the project scope the department deems necessary. The policy may consider a local unit of government's ability to pay as a factor in determining the amount of local contribution, if any.

Subd. 3. **Report.** By February 1, 2026, the commissioner must submit a report to the chairs and ranking minority members of the legislative committees with jurisdiction over transportation finance and policy. The report must:

126.19 transportation network driver under either city or state law;
- 126.20 (10) determine whether the state could develop the required digital network to host the
126.21 state-operated TNC or whether a contract with a third-party would be appropriate to build
126.22 and maintain the digital infrastructure necessary to operate the TNC; and
- 126.23 (11) highlight key user-friendly features for a state-operated TNC for both passengers
126.24 and drivers and develop a plan to promote the availability and accessibility of the
