Re: SF1548/HF1276

Support for Modification to Northstar Care for Children Benefits for Children Under the Age of Six

Dear Legislators:

The Metropolitan Urban Indian Directors (MUID) group strongly supports the modification to the Northstar Care for Children Pre-School Entry Alternate Rate for children who reach permanency with relatives or within the Minnesota Indian Family Preservation Act (MIFPA) placement preferences. MUID promotes the wellbeing, growth, and mutual interests of Minnesota's urban American Indian organizations.

Under the Northstar Care for Children program foster children who reach permanency while under the age of 6 receive approximately 50% of the financial support older children receive. This alternate rate negatively impacts younger children in the foster care system by creating financial barriers for their relative care providers.

This is particularly important in cases involving American Indian children, who are at greater risk of child protection involvement. As of 2022, American Indian children are sixteen times more likely than white children to be in out-of-home care. This disproportionately high rate does not allow for American Indian children to foster their familial, community, and cultural ties. It is vital for American Indian children to remain with family and within their community when reunification with their parents is not an option. Lack of financial resources should not be a barrier for a child to reach permanency with relatives.

This modification to the Northstar Care for Children program ensures that children can grow up in supportive, stable homes and maintain connections to their families and Tribal communities.

Thank you for considering this important piece of legislation.

Ryan Salmon
Chair - MUID

*MUID promotes the well-being, growth and mutual interests of metropolitan American Indian organizations.
