

100% E-WASTE RECYCLING

A BILL TO IMPROVE ELECTRONIC WASTE COLLECTION

METALS FOR ENERGY TRANSITION

Minnesota's annual electronic waste stream contains \$3 billion dollars worth of precious metals.

By recycling our e-waste, we can create 1700 direct jobs, and get back on track for supplying metals for the energy transition.

MN State Legislation: a Path to 100%

Expand the definition

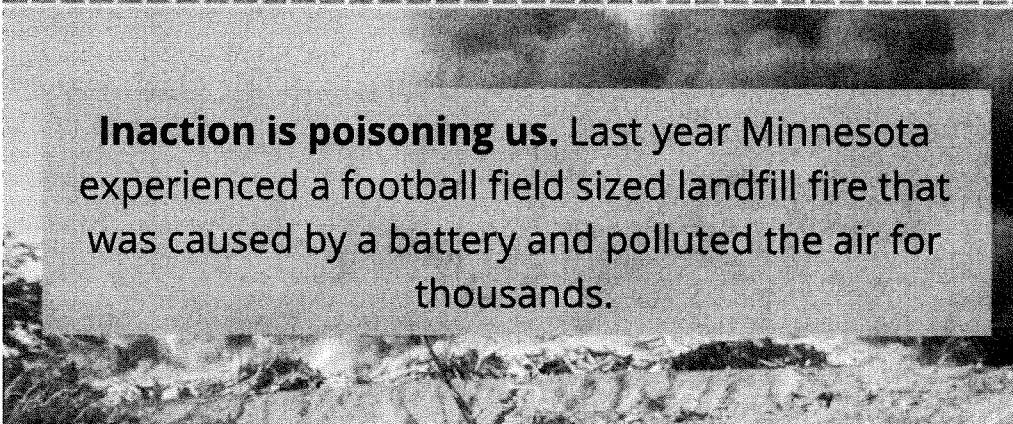

By creating a comprehensive definition of electronic waste to enable 100% collection

Provide free collection for all

Removing the financial barrier for all Minnesotans
Funded by manufacturers

Incentives for waste diversion.

Directly reimburse collection sites for the electronics recycled

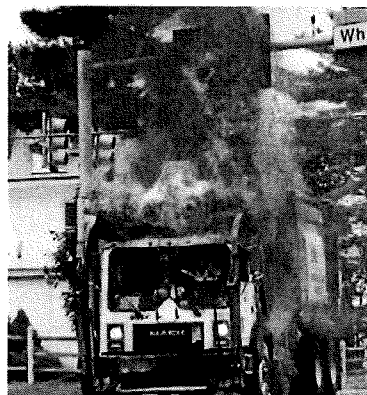

Inaction is poisoning us. Last year Minnesota experienced a football field sized landfill fire that was caused by a battery and polluted the air for thousands.

it is time to replace
our program from 2007
that fails to properly fund
collection efforts.

! WORKERS AT RISK !

Weekly U.S. hauling truck fires are caused by batteries from electronic devices,

70%
Of landfill lead pollution is
from discarded electronics
