

1.1 Senator moves to amend S.F. No. 769 as follows:

1.2 Page 5, after line 32, insert:

1.3 "(q) Within one year after being placed in service, a qualified large-scale data center
1.4 must provide the commissioner of employment and economic development the following
1.5 information regarding metals used in the construction of the qualified large-scale data center:

1.6 (1) a full description of the amount and type of metals used, including available
1.7 information about the metals' country of origin; and

1.8 (2) the percentage of metals used that were recycled.

1.9 (r) Within three years after being placed in service, a qualified large-scale data center
1.10 must submit the following to the commissioner of employment and economic development:

1.11 (1) certification from the public utilities commission that the power demand for the
1.12 qualified large-scale data center can be met and will not increase electricity costs or decrease
1.13 electrical reliability for existing consumers. The certification must also include a statement
1.14 that the public utilities commission finds that the electricity needs of the qualified large-scale
1.15 data center will not slow or prevent an electric utility from meeting the requirements set in
1.16 section 216B.1691, subdivision 2g;

1.17 (2) certification from the Environmental Quality Board that the qualified large-scale
1.18 data center has completed environmental review, including any mandatory category reviews
1.19 under Minnesota Rules, part 4410.4400, with the completed environmental review indicating
1.20 the amount of electricity and water used by the proposed qualified large-scale data center;

1.21 (3) certification from the Department of Natural Resources that the qualified large-scale
1.22 data center has an individual permit for any needed water appropriation, which must include
1.23 a statement that the permit is sustainable under the requirements of section 103G.287,
1.24 subdivision 5, and that any water appropriation permit over 60 million gallons per year
1.25 given to a qualified large-scale data center has completed an aquifer test as required under
1.26 section 103G.287, subdivision 1, paragraph (a), clause (4), to ensure the appropriation does
1.27 not negatively affect public and private water supply wells and ecosystems connected to
1.28 groundwater baseflow;

1.29 (4) certification of the quantity of metals used in the construction of the qualified
1.30 large-scale data center; and

1.31 (5) certification from a local unit of government that the qualified large-scale data center
1.32 is sited in an industrial district. For purposes of this clause, "industrial district" means an

- 2.1 area of land that a municipality has defined by law, rule, or ordinance to allow manufacturing
- 2.2 facilities."
- 2.3 Reletter the paragraphs in sequence
- 2.4 Page 6, line 4, delete "paragraph (p)" and insert "paragraphs (p) and (r)"
