MINNESOTA
CRAFT BREWERS GUILD

February 23, 2026

The Honorable Matt Klein, Chair
2105 Minnesota Senate Bldg.
St. Paul, MN 55155

Re: Minnesota Craft Brewers Support for SF 3670

Chair Klein and Members of the Senate Commerce Committee,

The Minnesota Craft Brewers Guild asks for your support of SF 3670, which would delay the implementation of certain testing requirements for Lower Potency Hemp Edible (LPHE) products until May 31, 2027. Although we understand the spirit of the original statute passed in HF 100, the reality of building the first fully regulated market for these products is incredibly complex and changing.

As producers and sellers of LPHE products, we have always maintained strong support in the necessity of accurate testing and labeling so as to ensure the safety and comfort of those who consume these products. However the current implementation deadline stands to halt the currently successful market. As more buisnesses become operational, the number of current testing labs that meet requirments is grossly insufficent.

Since the beginning of the current hemp market, we have always been champions that testing be required so long as it was affordable, accessable, and available. As statute is currently written, those goals are unachievable and SF 3670 allows the market time to make those goals possible. We thank Senator Port, and many other stakeholders for listening to our concerns. We ask for the support of this committee on SF 3670. Thank you for your time and consideration.
