Senator ..... moves to amend S.F. No. 4100 as follows:

Page 1, line 6, delete "SOCIAL MEDIA"

Page 1, after line 10, insert:

"(b) "Artificial intelligence system" means a machine-based system that can, for a given set of human-defined objectives, make predictions, recommendations, or decisions influencing real or virtual environments. Artificial intelligence systems use machine and human-based inputs to:

(1) perceive real and virtual environments;

(2) abstract such perceptions into models through analysis in an automated manner; and

(3) use model inference to formulate options for information or action.

(c) "Contextual data" means any information provided by a user to an artificial intelligence system over multiple sessions and any context associated with such user's interactions with such system, including prompts, conversational histories, files, preferences, or metadata. Contextual data does not include the trade secrets associated with an artificial intelligence system.

(d) "Deployer" means a controller that makes an artificial intelligence system available to the public."
