 245.

The figure consists of seven vertical panels, each containing a black-and-white micrograph of an embryo at different stages of development. The panels are labeled as follows:

- A**: Shows a very early stage, likely a zygote or cleavage stage.
- B**: Shows a slightly more developed stage with visible cellular structures.
- C**: Shows a stage where the embryo's form is becoming more distinct.
- D**: Shows a stage with more pronounced internal structures and possibly some yolk.
- E**: Shows a stage where the embryo appears more elongated and complex.
- F**: Shows a stage where the embryo is clearly defined against its background.
- G**: Shows the final stage, which appears to be a hatched larva with a more complete body structure.

In the bottom right corner of the entire figure, there is a horizontal scale bar labeled "0.1 mm".
