MEMORANDUM

The board notes with concern that a number of residences immediately adjacent to the area proposed for annexation within the City of Vergas have not received sanitary sewer service from the city. The board further notes that the petitioner seeks annexation so as to receive municipal sanitary sewer, which the City of Vergas has capacity to provide.

The board takes this opportunity to urge the city to address as rapidly as possible the servicing of these areas given their proximity to Long Lake. Further, the annexation area has heavy clay soil. One of the property owners within the city had his drainfield disrupted by the pressure line to the waste water treatment facility. The property owners within the city adjacent to the annexation area, as well as the owners of the annexation area, have indicated a desire to receive city sanitary sewer. Since there is no central water system, the protection of the wells which provide drinking water for these homes is best done by extension of municipal sewer service.

The board urges the parties, the property owners, and the city to work together to expedite the extension of municipal sanitary sewer service.

The board also takes this opportunity to urge the Town of Candor and the City of Vergas to build on the working relationship they have, so as to be able to address any future problems that may arise should lakeshore development continue in the area.
