I. Introduction

This report contains data on the number and dollar amounts of Minnesota State Grants received by Minnesota undergraduates for Fiscal Years 1978 through 2002. Combined Pell and State Grant awards are also reported.

The report also includes a table showing the parameters used in the State Grant Program from Fiscal Year 1984 through 2002. The Design for Shared Responsibility policy became effective in Fiscal Year 1984. The Design for Shared Responsibility states that paying for college is a shared responsibility among students, families and taxpayers. It is the basis for the State Grant Program.

As part of the Design for Shared Responsibility, ability to pay is calculated based on income and assets. Many of the tables and graphs in this report include information that is reported by the adjusted gross income¹ of the student's family. This information is provided for the recent past – Fiscal Years 1995 through 2002.

The report also includes information on family status for 1995 through 2002. Each category of family has its ability to pay assessed differently:

- a. Dependent students (usually students less than 24 years old who were not married and not supporting their own children)
- b. Married independent students with children
- c. Unmarried independent students with children
- d. Married independent students without children
- e. Unmarried independent students without children

II. Sources of Data

The data in this report summarize what has been reported in prior annual reports such as the *Minnesota State Grant Program End of Year Statistics* and the *Report to the Governor and Legislature*. The statistics for Minnesota State Grants and Combined Federal Pell and Minnesota State Grants were derived for the end of year reports using data collected for the Minnesota State Grant Program. The values of *All Federal Pell plus Minnesota State Grants* were collected as part of the biennial survey of campus financial aid offices.

The data in this report are based on the Minnesota State Grant research data file which is compiled in the autumn of each year, following the end of the previous fiscal year on June 30. These totals may differ slightly from other documents published by the Minnesota Higher Education Services Office which are based on data captured at different dates.

1 Adjusted gross income is the amount reported for federal income tax purposes. For many tax filers, it is the amount reported on IRS Form 1040, line 33. Applicants for Minnesota State Grants report this income on the Free Application for Federal Student Aid (FAFSA). The FAFSA is used to apply for federal aid and for Minnesota State Grants.

2003	\$5,405	46%	\$6,913*	\$8,983*	\$4,000

*Beginning in Fiscal Year 2003, the MN State Grant Program recognized actual tuition and fees charged to individual students and the tuition maximum was extended to apply to students attending public institutions as well as those attending private institutions. Before 2003, in calculating State Grants, each institution participating in the program calculated one tuition and fee value that was used for all State Grant applicants attending that institution.
