

Policy Statements

1. Only the Task Force as a body, or its members (articulating previously taken Task Force positions) can speak for the Task Force. Any issues, concerns or proposed media statements regarding pilot parameters, standards interpretation and use or Task Force policy should be directed to the Task Force via Beth McInerney, Task Force Project Coordinator.
2. Communications regarding cost savings and effectiveness of e-recording prior to knowledge of pilot results is premature and will not be supported by the Task Force.
3. Trusted Submitters working with any pilot county are included as a specific pilot participant who also sign agreements with pilot counties as part of their contracts with the Task Force.
4. Since this is a controlled pilot study, only those private sector Trusted Submitters, who have signed an agreement with the officially established pilot counties, are included in the ability to file electronically. Other private sector submitters will have to wait until the pilots are over and enabling legislation is accomplished.
