## **Description of the Office of the State Auditor**

The Office of the State Auditor serves as a watchdog for Minnesota taxpayers by helping to ensure financial integrity, accountability, and cost-effectiveness in local governments throughout the state.

Through financial, compliance, and special audits, the State Auditor oversees and ensures that local government funds are used for the purposes intended by law and that local governments hold themselves to the highest standards of financial accountability.

The State Auditor performs approximately 250 financial and compliance audits per year and has oversight responsibilities for over 4,300 local units of government throughout the state. The office currently maintains five divisions:

**Audit Practice** - conducts financial and legal compliance audits for local governments;

**Government Information** - collects and analyzes financial information for cities, towns, counties, and special districts;

**Legal/Special Investigations** - provides legal analysis and counsel to the Office and responds to outside inquiries about Minnesota local government law; as well as investigates allegations of misfeasance, malfeasance, and nonfeasance in local government.

**Pension Oversight** - monitors investment, financial, and actuarial reporting for over 700 public pension funds;

**Tax Increment Financing (TIF)** - promotes compliance and accountability in local governments' use of TIF through financial and compliance audits;

The State Auditor serves on the State Executive Council, State Board of Investment, Land Exchange Board, Public Employee's Retirement Association Board, Minnesota Housing Finance Agency, and the Rural Finance Authority Board.

# Scope of Report

This publication is intended to facilitate the understanding of city financial operations by citizens, local government officials, and other policy makers. The report summarizes, through data tables and charts, the financial operations of Minnesota cities for calendar year 2003. These cities are required to annually submit annual financial reports to the Office of the State Auditor.

For the second year, this publication combines both cities over and under 2,500 in population. The return to this format should allow readers to examine the trends in all cities rather than just for those over or under 2,500 in population.

The data presented in this report is divided into governmental funds and proprietary funds. The governmental funds consist of the General, Special Revenue, Capital Projects, and Debt Service Funds. The first section provides an overview of all cities and compares cities over and under 2,500 in population. The second section of the report presents a detailed overview of the financial operations of cities over 2,500 in population. The third section provides a detailed overview of the financial operations of cities under 2,500 in population.

Following the overviews, Tables 4 through 7 present a summary of the activities in the governmental funds of cities over 2,500 in population. Tables 8 through 10 present a summary of the activities in the governmental funds of cities under 2,500 in population. Tables 11 through 13 present the data by individual city.

The enterprise or proprietary funds of cities are presented separately from the governmental funds. Minnesota cities operate many types of public service enterprises. The enterprises furnish a variety of services and operate wholly or in large part with revenues derived from the sale of goods or services. The financial operations of the municipal public service enterprises (excluding municipal liquor stores) are presented in tables 14 through 22. Footnotes used in the analysis of the enterprise operations are described at the end of the enterprise fund section. Table 23 details the financial operations of municipal liquor operations.<sup>1</sup>

Table 24 lists the bonded and other long-term debt outstanding as of December 31, 2003, by individual city. Other long-term debt refers to liabilities such as long-term lease agreements, installment purchase contracts, and notes.

Tables 25 and 26 present an analysis of the 2002 and 2003 unreserved fund balances in the General and Special Revenue Funds of all cities reporting on a modified accrual basis. Table 25 details the actual unreserved fund balances, the percentage change in unreserved fund balances from 2002 to 2003, and a comparison to 2003 total current expenditures. Table 26 presents the fund balance data sorted by unreserved fund balances as a percent of total current expenditures. This table also classifies the fund balances based on standards set by the Office of the State Auditor. An analysis of unreserved fund balances for cities using a cash basis of accounting is not provided. Those cities

---

<sup>1</sup> A separate and more detailed analysis of municipal liquor operations is available in the Office of the State Auditor's publication, *An Analysis of Minnesota's Municipal Liquor Store Operations in 2003*.

using a cash basis of accounting report a single cash balance for all governmental funds at the end of the fiscal year. Cities using a modified accrual basis of accounting report separate fund balances for all of their governmental funds and denote the amounts that are reserved and unreserved. Because of the accounting differences, a comparative analysis of unreserved fund balances is not appropriate for cities that use a cash basis of accounting. Appendix B provides a more detailed discussion of fund balances.

## **Accounting Difference for Cities Over and Under 2,500 in Population**

For cities in Minnesota, the classification as over or under 2,500 in population helps to determine the type of governmental accounting to which they must adhere. All cities over 2,500 in population must have an annual audit that follows Generally Accepted Accounting Principals (GAAP), which is a modified accrual basis of accounting. Modified Accrual Basis Accounting recognizes an economic transaction or event as revenues in the operating statement when the revenues are both measurable and available to liquidate liabilities of the current period. Available means collectible in the current period or soon enough thereafter to be used to pay liabilities of the current period. Similarly, expenditures are generally recognized when an event or transaction is expected to draw on current spendable resources.

Cities under 2,500 may opt to use a cash basis of accounting. In 2003, 345 of the 644 small cities (54 percent) opted to use a cash basis of accounting. Cash basis accounting provides for the recording of revenues when received in cash and the recording of expenditures when paid in cash. While cash basis accounting may be allowed under Minnesota Statutes, it does not facilitate as accurate a reporting of financial position as generally accepted accounting principals.

The 2000 census decreased the number of cities classified as under 2,500 in population from 668 to 646. From 1991 to 2000, cities were classified as over or under 2,500 in population based on the 1990 census. This was true even if their estimated population changed. From 2001 through 2011, cities will be classified based on the 2000 census. Due to population growth, the following cities are no longer classified as under 2,500 in population: Albertville, Annandale, Appleton, Becker, Byron, Centerville, Chisago City, Cokato, Cold Spring, Greenfield, Lindstrom, Milaca, Montgomery, Perham, Rogers, Roseau, Spring Valley, St. Francis, Victoria, Wabasha, Watertown, Wyoming, Zimmerman, and Zumbrota. Two cities, Lauderdale and Osseo, lost population between the 1990 and 2000 census and are now included with the group of cities under 2,500 in population. Tables that present data for 1999 through 2000 were not adjusted to reflect the change in the number of cities classified as under 2,500 in population.

In June of 2002, the city of Pleasant Lake and the town of Rockville merged with the city of Rockville. The merger between the local governments increased the city of Rockville's population from 810 to 2,585. Because of the change in population, the city of Rockville is now classified as over 2,500.

In addition to this publication, an enhanced version of the report is available on the State Auditor's web site. The enhanced version provides additional tables and analysis of the data that were not included in the printed copy to save money. Also, the Office of the State Auditor maintains an interactive database containing several years of data that can be accessed through the State Auditor's

web site. The database allows users to customize the presentation of data to their individual needs. For example, a user can select a group of cities they want to compare, the criteria on which to compare them, and the time frame in which to compare them. The query can then be viewed on screen or saved to a file for downloading. The State Auditor's web site address is [www.auditor.state.mn.us](http://www.auditor.state.mn.us).

## **Comparison and Overview**

### **2003 Finances for Cities Under and Over 2,500 in Population**

#### **Revenues**

Total revenues of the governmental funds for all Minnesota cities totaled \$3.84 billion in 2003. This represents a decrease of 1.7 percent from 2002 revenues. Total revenues of cities over 2,500 in population decreased 2.0 percent, while revenues of cities under 2,500 in population increased 1.0 percent.

There are significant differences in how city services are funded between the two city types. Cities under 2,500 are much more dependent on intergovernmental revenues than cities over 2,500. In 2003, intergovernmental revenues accounted for 39.3 percent of total revenues for cities less than 2,500 in population compared to 29.2 percent for cities over 2,500 in population. Among all cities, intergovernmental revenues accounted for 30.1 percent of total revenues.

Large cities make up for the difference in intergovernmental revenues by taking advantage of other tax revenue streams such as tax increments from tax increment financing (TIF) districts, franchise, lodging, and local sales taxes. As a whole, tax revenue from all sources accounted for 40.1 percent of large city revenues in 2003, compared to 28.5 percent of small city revenues. Large cities also utilize tax increment financing to a much greater extent than small cities. Revenue derived from TIF districts accounted for 2.6 percent of small city total revenues compared to 6.8 percent for large cities.

Property taxes account for a similar share of total revenues for these two groups of cities. For large cities, property taxes accounted for 28.0 percent of total revenues compared to 25.5 percent for small cities. For all cities, property taxes accounted for 27.8 percent of total revenues.

On a per capita basis, large cities had total revenues of about \$78 more than small cities (\$945 to \$867).

#### **Expenditures**

Total expenditures of the governmental funds for all cities totaled \$4.64 billion in 2003. This represented an increase of 2.0 percent over 2002 and reflects an increase of 1.3 percent among large cities and 8.8 percent among small cities.

The spending priorities of cities under 2,500 in population differ from those cities over 2,500 in population. For example, cities under 2,500 tend to direct a greater percentage of their resources to general government (13.9 %) and less to culture and recreation (7.2 %) than cities over 2,500 (10.6% and 11.8 % respectively). In addition, streets and highways are the largest category of spending for cities under 2,500 (22.9 %) compared to public safety for those cities over 2,500 (22.1 %).

## **Long-Term Debt**

Another area where small and large cities differ is in their use of debt. Overall, small cities tend to carry a greater debt burden than large cities. In 2003, small cities carried long-term debt of \$859.5 million, or \$2,127 per capita, compared to \$6.89 billion, or \$1,865 per capita for large cities.

## **Unreserved Fund Balances of the General and Special Revenue Funds**

A clear difference between the two city types is in the level of unreserved fund balances for the 508 cities using a modified accrual basis of accounting. Small cities maintain significantly higher fund balances than large cities. In 2003, unreserved fund balances as a percent of current expenditures averaged 98.7 percent for small cities compared to 52.9 percent for large cities. The State Auditor's Office recommends that most cities keep their fund balance at between 30 and 50 percent of total current expenditures. Under the Auditor's guidelines, the average fund balance of small cities would be classified as "High" and that of large cities as "Moderately High."

For cities in Minnesota, the classification "over or under 2,500 in population" helps to determine the type of governmental accounting to which cities must adhere. All cities over 2,500 must have an annual audit following Generally Accepted Accounting Principals (GAAP), a modified accrual basis of accounting. Cities under 2,500 may opt to use a cash basis of accounting. In 2003, 299 of the 644 small cities (47%) had a GAAP audit. This difference in accounting methods is most pronounced when reporting fund balances. Cities that use a modified accrual basis of accounting report their fund balances as reserved, unreserved designated, and unreserved undesignated for each fund they have. Cities that use a cash basis of accounting report a single cash balance for all funds. Because of this difference, this report only examines the fund balance of the 508 cities (both large and small) that use a modified accrual basis of accounting.

Among the 299 small cities that use a modified accrual basis of accounting, 168 (56.2%) had an unreserved fund balance greater than 100 percent of total current expenditures. Among the 209 large cities, 43 cities (20.6%) had an unreserved fund balance greater than 100 percent of total current expenditures. Unreserved fund balances as a percent of total current expenditures ranged from -194.8 percent to 508.2 percent among small cities. Among large cities, the range was from -84.8 percent to 572.5 percent.

The State Auditor has concerns about the financial health of cities maintaining a fund balance below 20 percent of total current expenditures. These cities may not have enough reserves to carry them through financial downturns or unexpected contingencies. The Auditor also has concerns about cities that maintain fund balances far exceeding what is needed to carry them through financial downturns. Taxpayers in cities that have either low or high unreserved fund balances should press their local officials to explain the city's fund balance policy. It is also important to note that this analysis does not include the unreserved fund balances of capital project or debt service funds. These are the funds where one might expect to see higher fund balances, because they should be used to account for future capital projects or proceeds from borrowing.

## **Accounting Difference for Cities Over and Under 2,500 in Population**

Cities using a Modified Accrual Basis of accounting recognize an economic transaction or event as revenue in the operating statement when the revenue is both measurable and *available* to liquidate liabilities of the current period. Available means collectible in the current period or soon enough thereafter to pay liabilities of the current period. Similarly, expenditures are generally recognized when an event or transaction is expected to draw on current spendable resources.

Cities under 2,500 may opt to use a cash basis of accounting. In 2003, 345 of the 644 small cities (53.6%) opted to use a cash basis of accounting. Cash basis accounting provides for the recording of revenues when received in cash and the recording of expenditures when paid in cash. While cash basis accounting may be allowed under Minnesota Statutes, it does not facilitate as accurate a reporting of financial position as generally accepted accounting principals.

# Overview of Cities Over 2,500 in Population

## Total Governmental Revenues

In 2003, cities over 2,500 in population raised total governmental revenues of \$3.49 billion to finance city services. This represents a decrease of 2.0 percent from the amount raised in 2002. The primary funding sources for cities were taxes and state aid. These two sources accounted for 63.0 percent of all city revenues.

The sources of large city revenue that grew at the greatest rate between 2002 and 2003 were: federal grants (24.1%), tax increments (10.9%), and special assessments (10.7%). Those sources of revenue showing the greatest declines were: interest earnings (-42.2%), hotel/motel taxes (-17.2%), and state aid (-16.1%). The decrease in interest earnings was widespread with 180 or 86.1 percent of large cities posting a drop in the category.

The shares of total governmental revenues generally change very little from year-to-year. Two exceptions are charges for services and “all other revenues.” Over the past five years, charges for services have steadily increased as a percent of total revenues, increasing from 8.2 percent in 1999 to 10.0 percent in 2003, while “all other revenues” decreased from 8.2 percent to 5.8 percent. To further examine five-year trends in revenues, refer to Table 4.

Figure 1 shows the relative shares of total governmental revenues by source. Underlying data for this figure is detailed in Table 4.

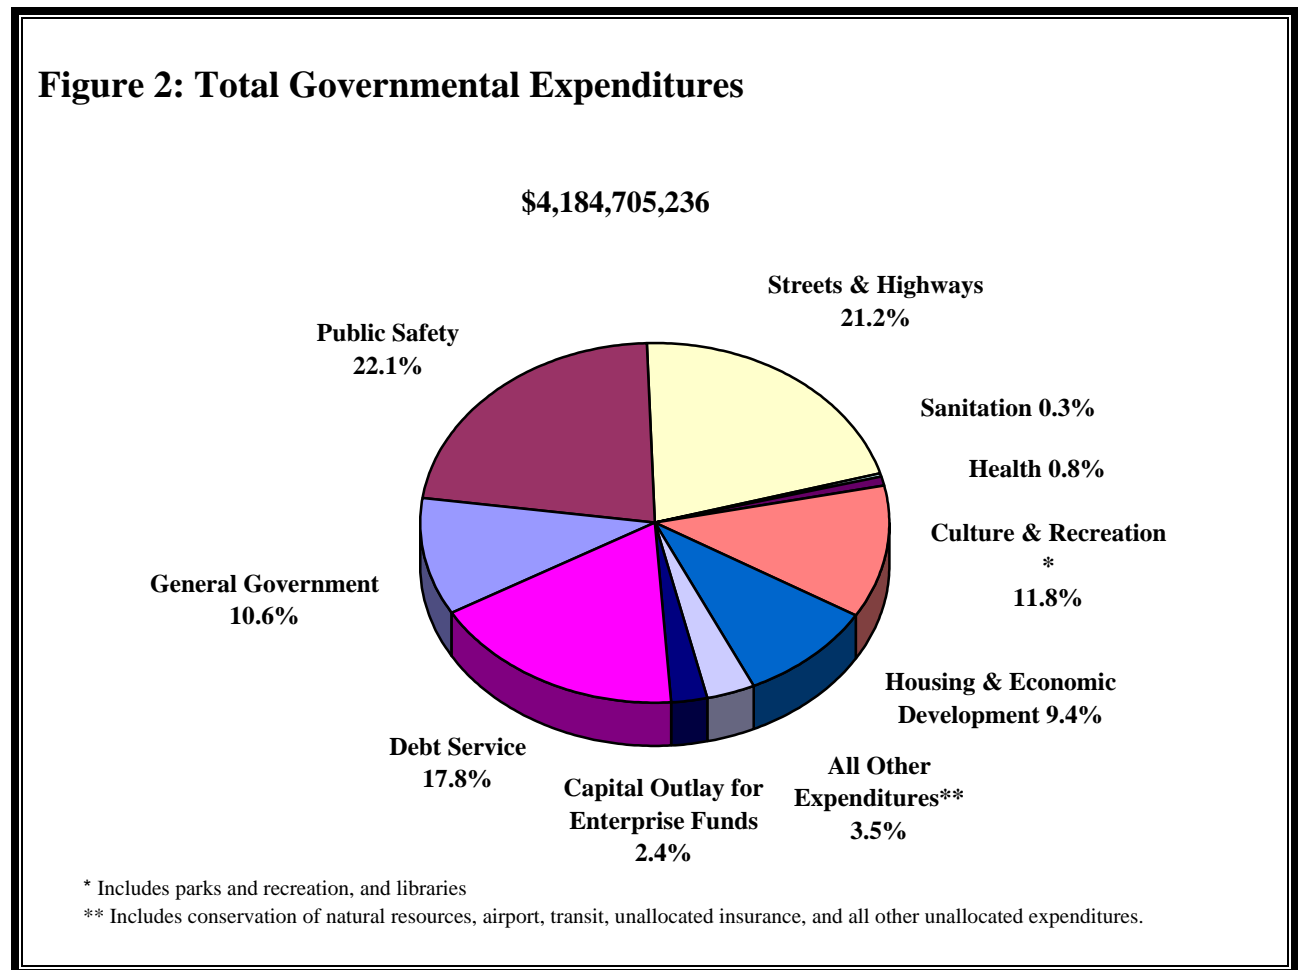

## Total Governmental Expenditures

Cities provide a variety of services to their citizens. Most expenditures for those services are accounted for in governmental funds. The governmental funds are classified as the General, Special Revenue, Capital Projects, and Debt Service funds. In 2003, cities over 2,500 in population expended \$4.18 billion from these various Governmental Funds to provide city services. This represents an increase of 1.3 percent over 2002 total governmental expenditures. Total governmental expenditures include current expenditures, capital outlays, and debt service. Current expenditures account for 54.4 percent of total government expenditures, while capital outlay accounts for 27.8 percent, and debt service accounts for 17.8 percent.

The largest category of current expenditures was public safety while streets and highways dominated capital outlay expenditures. Public safety current expenditures accounted for 36.8 percent of all current expenditures, more than double than any other category. Streets and highways accounted for 50.4 percent of all capital expenditures, almost 5 times greater than any other category of capital outlay.

Figure 2 shows the relative shares of total governmental expenditures by function. The underlying data for this figure is detailed in Table 5.

## Growth in Government

During the five-year period of 1999 to 2003, total governmental revenues increased every year but 2003. Total current expenditures increased every year. The rate of growth varied from -2.0 percent to 10.0 percent. To place this growth in perspective, Figure 3 below shows the yearly increases in revenues and expenditures set against the increases in per capita personal income for Minnesotans.<sup>1</sup> Per capita income is an indicator of the ability of citizens to pay for increased governmental spending. Generally, when expenditures grow faster than per capita personal income, citizens must spend a greater proportion of their income on governmental services.

Figure 3 compares the growth in total current expenditures and total governmental revenues of Minnesota's large cities to the change in Minnesota per capita personal income.<sup>2</sup> The growth in current expenditures of large cities outpaced both per capita personal income and total revenues growth from 2001 through 2003.

<sup>1</sup> The chart excludes capital outlays as this category is more prone to yearly fluctuations. The chart also excludes revenues derived from borrowing because cities are prohibited from borrowing for current expenditures. Most capital projects are funded through the issuance of bonds or other types of borrowing such as certificates of participation.

<sup>2</sup> Per capita income is calculated by dividing Minnesota total personal income by its total midyear population. The Bureau of Economic Analysis calculates this figure, which is a part of the U. S. Census Bureau.

## Capital Outlay Expenditures

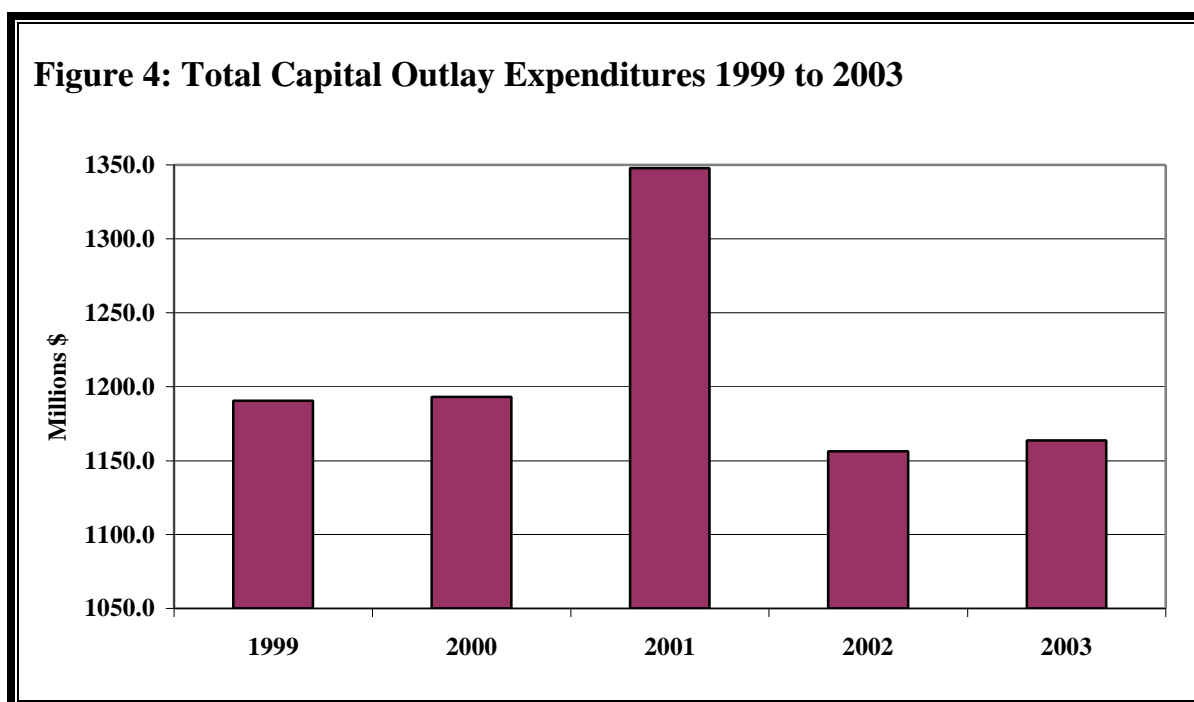

Cities over 2,500 in population expended \$1.16 billion on capital investments in 2003. This represents an increase of 0.6 percent from the level expended in 2002. Capital outlays are more likely than current expenditures to vary significantly from one year to the next. The reason for this is that capital projects tend to be large in size but the associated costs are short-term. Some of the factors that influence the level of capital investments include: demands for public meeting places and facilities, the need to replace aging infrastructure, public safety concerns, infrastructure improvements for new developments, and damage to public facilities caused by disasters.

Table 1 shows total capital outlays in dollars and per capita for large cities. Figure 4 illustrates the trend in capital spending for the years 1999 through 2003.

**Table 1: Total Capital Outlay Expenditures in Actual Dollars and Per Capita**

Year	Total Capital Outlay (actual dollars)	Per Capita *
1999	\$1,190,546,110	\$350
2000	\$1,193,100,841	\$343
2001	\$1,347,940,294	\$375
2002	\$1,156,396,425	\$317
2003	\$1,163,674,824	\$315

\* Per capita amounts are based on the total population of cities over 2,500 in population.

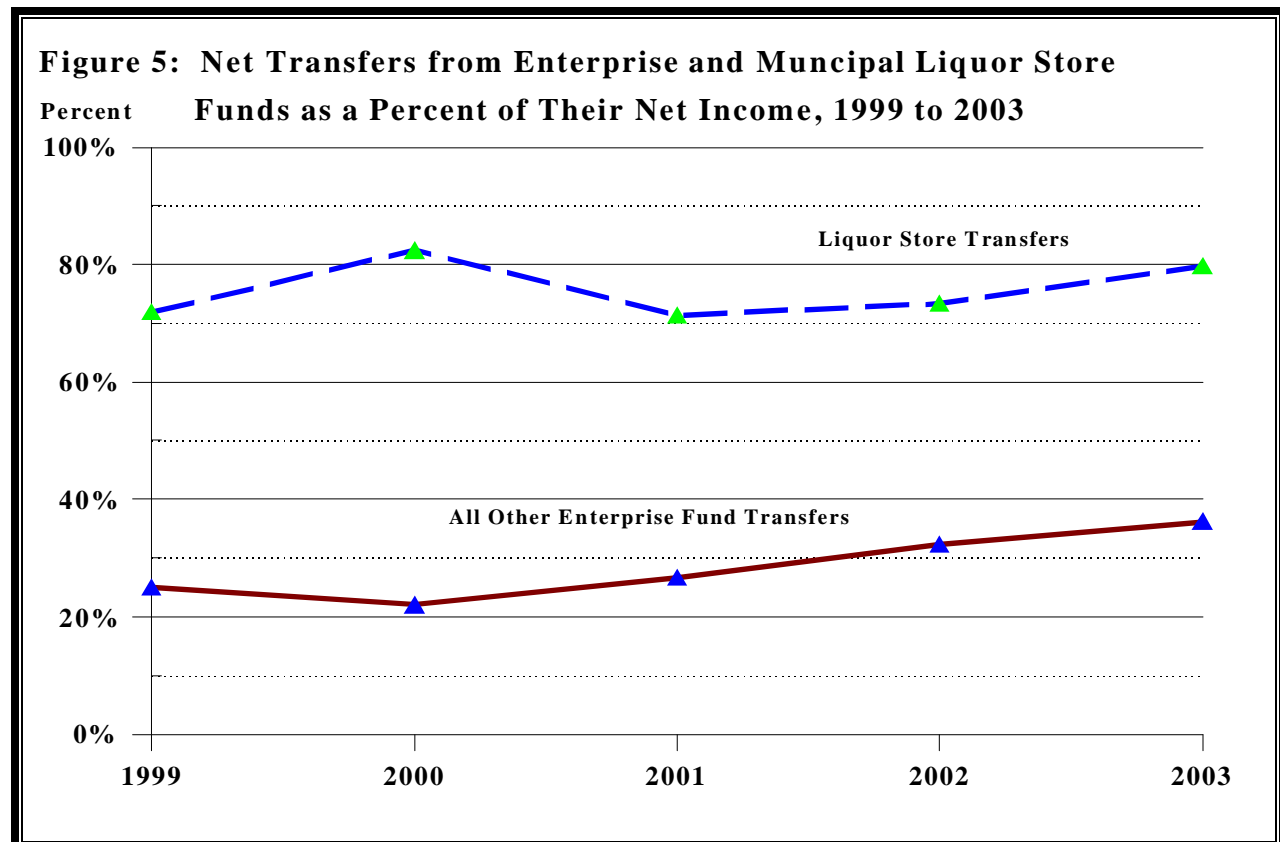

## Municipal Enterprises

In addition to Governmental Funds, many cities establish Enterprise Funds to account for services that are financed and operated in a manner similar to private business enterprises. These enterprises are intended to be self-sustaining through fees and user charges. Although some enterprises may earn a net profit, most have the objective of breaking even. Enterprise fund accounting is also used to provide more detailed financial information on operations where there are public policy, accountability, management control, and other concerns. The most common enterprises created by large cities are for recreation, sewer, and water activities.

In aggregate, large city municipal enterprises posted large decreases in both net income and net transfers between 2002 and 2003. The net income of large city municipal enterprises decreased 23.3 percent and transfers from enterprise funds to other governmental funds decreased 14.3 percent. An example of this type of transfer is when city officials transfer excess reserves from the water utility enterprise fund to the General Fund.

Municipal liquor stores, which are separated from other municipal enterprises because of accounting differences, saw an increase of 5.3 percent in profits between 2002 and 2003. In addition, 2003 net transfers from municipal liquor operations increased 14.3 percent over the level transferred in 2002.

Figure 5 examines the five-year trend for large cities in net transfers from Enterprise and Municipal Liquor Store Funds as a percent of their net income. The chart helps illustrate that the primary purpose of municipal liquor stores is to provide additional revenues to cities, whereas other types of municipal enterprises primarily exist to provide a particular service for the city and citizens.

## Outstanding Long-Term Indebtedness

Cities over 2,500 carried long-term debt of \$6.89 billion at the end of 2003. This represented an increase of 5.5 percent over the 2002 level. Cities incur long-term debt through the issuance of bonds and notes, certificates of indebtedness, and tax anticipation certificates. Long-term lease agreements are also classified as long-term debt. Cities may only borrow to finance capital projects and purchases; they are restricted by law from borrowing for current expenses. The amount of outstanding debt affects a city's current expenditures because cities must make principal and interest payments to service the debt.

Table 2 looks at outstanding bonded indebtedness for 2002 and 2003. Figure 6 shows the five-year trend of outstanding long-term debt for cities over 2,500 in population.

**Table 2: Two-Year Summary of Outstanding Bonded Indebtedness**

	2003 Amount		2002 Amount	
General Obligation	\$	776,424,187	\$	603,841,757
G.O. Tax Increment		918,035,443		937,317,271
Revenue Tax Increment		192,544,954		211,710,725
Special Assessment		1,400,332,912		1,349,210,154
G.O. Revenue		1,741,883,409		1,655,629,843
Revenue		991,673,904		966,654,884
All Other		28,665,498		20,984,300
<b>Total Bonded Indebtedness</b>	<b>\$</b>	<b>6,049,560,307</b>	<b>\$</b>	<b>5,745,348,934</b>

**Figure 6: Outstanding Long-Term Indebtedness 1999-2003**

## Unreserved Fund Balances of the General and Special Revenue Funds

The unreserved fund balances of large cities' General and Special Revenue Funds totaled \$1.20 billion in 2003.<sup>3</sup> This represents an increase of 6.4 percent over the level reported in 2002. Cities maintain cash reserves for several reasons. Cities should have relatively large fund balances at the end of the year because they must rely on them to meet expenditures during the first five months of the next fiscal year, until they receive the first property tax and state aid payments. Additional reasons include contingency funds for unforeseen needs and setting aside resources for future capital investments.

Comparing cities' unreserved fund balances to their total current expenditures helps put the fund balances into perspective and provides insight on the relative financial health of Minnesota's cities. City unreserved fund balances as a percent of total current expenditures averaged 52.9 percent in 2003 compared to 51.5 percent in 2002. If cities in this category are divided into their class number, it is interesting to note that the smaller the population becomes, there is an increase in the average. Table 7 illustrates the breakdown by class of city. Class 1 (first class) cities average 33.1 percent of their unreserved fund balances as a percent of total current expenditures, while class 4 cities average 82.4 percent.<sup>4</sup>

Figure 7 on the following page shows the five-year trend of unreserved fund balances as a percent of total current expenditures for large cities. Appendix B provides an in-depth discussion of city fund balances.

---

<sup>3</sup> Although this section discusses only two types of fund balances, Minnesota cities actually report three different classifications of fund balances in the General and Special Revenue Funds. The *unreserved, undesignated fund balances* include all funds remaining at the close of the fiscal year for which no legally binding commitment has been made, nor has the governing body passed a resolution designating those funds for a specific purpose. The *unreserved, designated fund balances* include all funds remaining at the close of the fiscal year for which no legally binding commitment has been made; however, these funds have been designated by the governing body for a specific future use. The *reserved fund balances* include all funds remaining at the close of the fiscal year for which there is a legally binding external commitment of those funds, such as a signed contract for services or equipment.

<sup>4</sup> There are only three first class cities in the state: Duluth, Minneapolis, and St. Paul.

**Figure 7: Unreserved Fund Balances of the General and Special Revenue Funds as a Percent of Total Current Expenditures 1999-2003**

Table 25 shows the following levels of city unreserved fund balances. The State Auditor recommends an acceptable unreserved fund balance of 35 to 50 percent of total current expenditures for the General Fund and Special Revenue Funds.

Levels of Fund Balance	Range of Unreserved Fund Balance as a Percentage of Total Current Expenditures	Number of Cities
Extremely Low Fund Balance	Below 20 %	10
Low Fund Balance	20% to 35%	20
Acceptable Fund Balance	35% to 50%	32
Moderately High Fund Balance	50% to 65%	35
High Fund Balance	65% to 100%	69
Very High Fund Balance	100% to 150%	27
Extremely High Fund Balance	Above 150%	16

# Overview of Cities Under 2,500 in Population

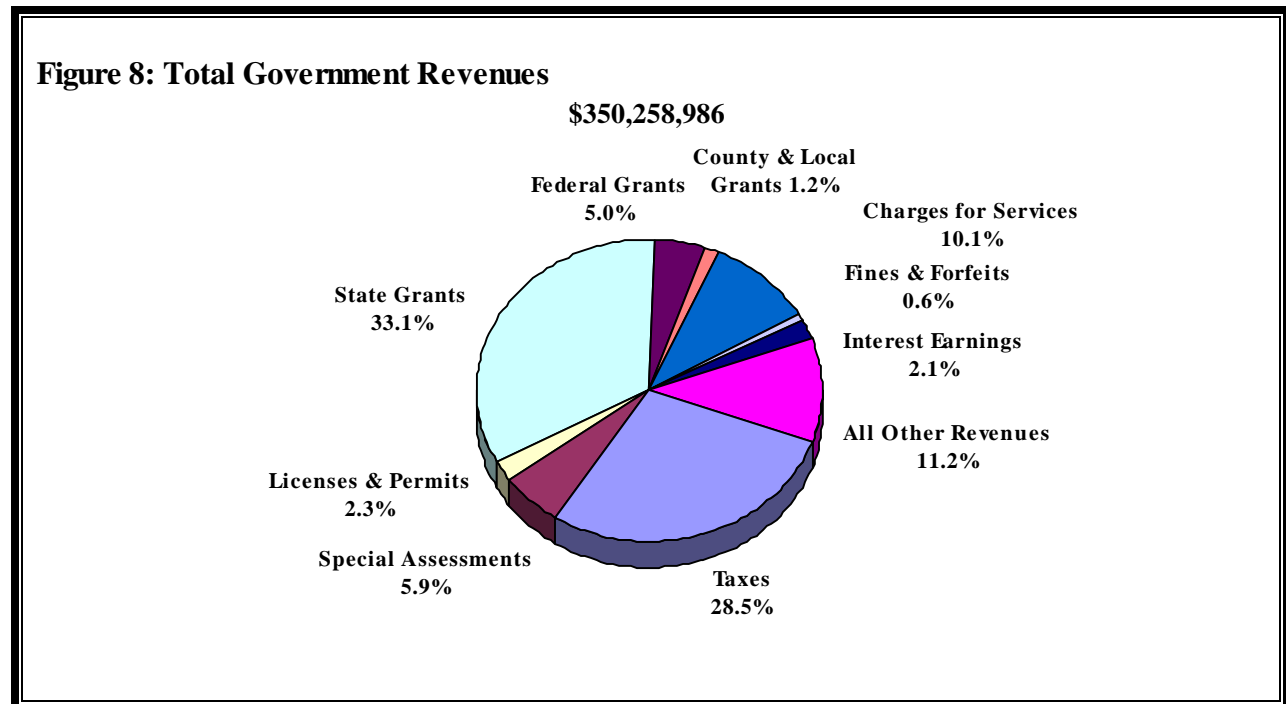

## Total Governmental Revenues

In 2003, cities under 2,500 in population raised total governmental revenues of \$350.3 million to finance city services. This represents a decrease of 1.0 percent from the amount raised in 2002.

The sources of revenue that grew at the fastest rate between 2002 and 2003 were: federal grants (41.9%), taxes (13.2%), and charges for services (12.8%). The categories showing the greatest decrease were: interest earnings (-30.3%), state grants (-9.9%), and all other revenues (-6.1%).

Between 2002 and 2003, the Legislature helped balance the state budget by reducing local government aid (LGA) and other aid programs to cities. The reductions in LGA resulted in a net loss of \$10.8 million or 12.6 percent in aid to small cities. In addition, there were other reductions to taconite aids that affected certain cities in the Iron Range. In all, state aid to Minnesota's smallest cities fell by 9.9 percent between 2002 and 2003.

The main sources of revenues for small cities in 2003 were state grants and taxes, which together accounted for 61.6 percent of all revenues. Taxes as a percent of total revenues increased from 25.5 percent in 2002 to 28.5 percent in 2003, while state grants as a percent of total revenues decreased from 37.1 percent in 2002 to 33.1 percent during the same period. Figure 8 shows the relative shares of total governmental revenues by source.

## Total Governmental Expenditures

Most city services are accounted for in governmental funds. The governmental funds are made up of the General, Special Revenue, Capital Projects, and Debt Service funds. In 2003, cities under 2,500 in population expended \$453.8 million from Governmental Funds to provide city services. This represents an increase of 8.8 percent over 2002 total governmental expenditures

Between 2002 and 2003, the categories of expenditures that grew at the fastest rate were: capital outlays for enterprise funds (71.3 %), streets and highways (16.3 %), and debt service (7.1%). The categories showing the greatest declines were: health (92.0%), “all other expenditures” (6.3%) and housing and economic development (4.3%). There was a large one-time capital outlay for health in 2002 that greatly inflated the figure for that year. The decline in health expenditures reflects a return to historical norms.

In 2003, the four largest expenditure categories for cities under 2,500 in population were streets and highways, public safety, debt service and general government. These four categories together accounted for 73.4 percent of all expenditures in 2003. Between 1999 and 2003, debt service as a percent of total expenditures decreased, while general government, public safety, and streets and highways increased.

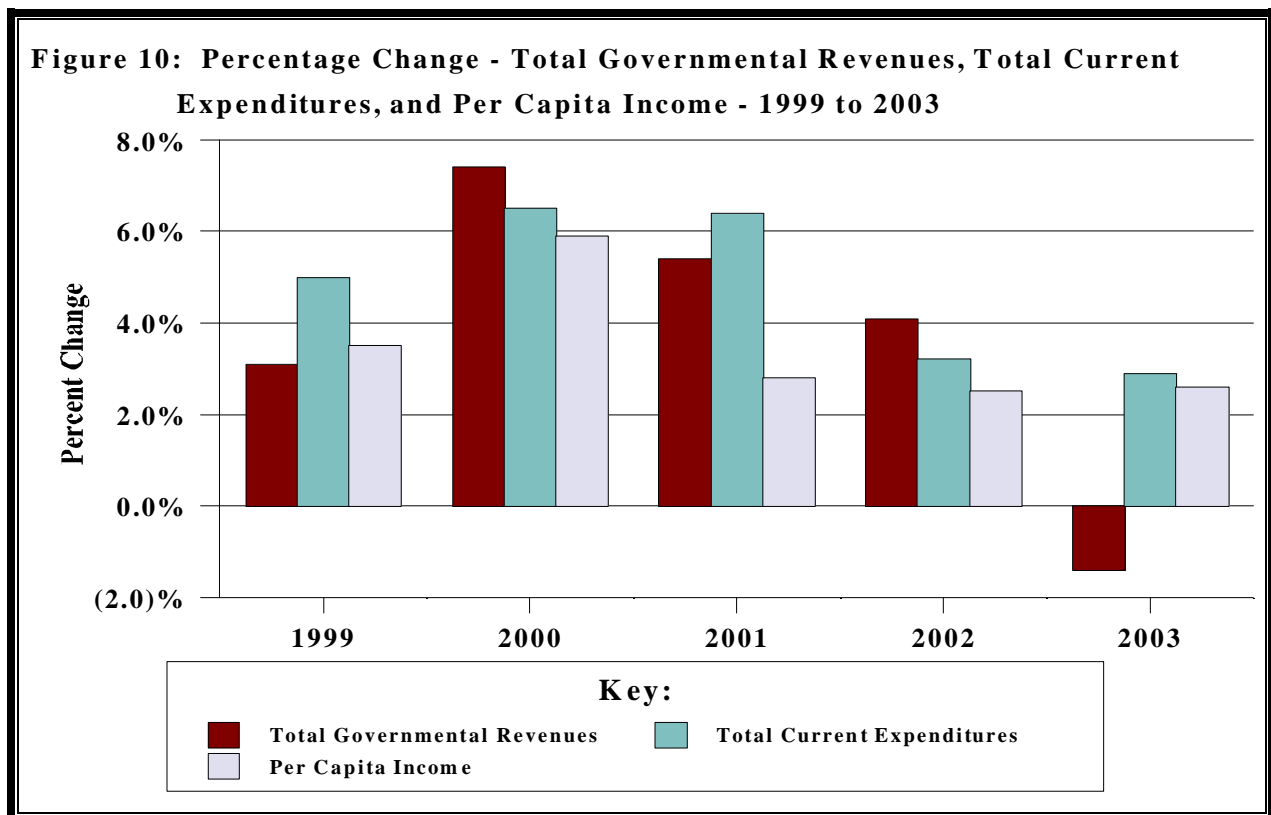

Figure 9 shows the relative shares of total governmental expenditures of small cities by function.

## Growth in Government

During the five-year period of 1999 to 2003, total current expenditures of small cities increased every year while total revenues increased every year but 2003.<sup>5</sup> The rate at which they grew varied from negative 1.4 percent to a positive 7.4 percent. To place this growth in perspective, Figure 10 below includes a bar showing the growth in per capita personal income for Minnesotans.<sup>6</sup> Per capita income is an indicator of the ability of citizens to pay for governmental spending. When expenditures grow faster than per capita personal income, citizens must spend a greater proportion of their income on governmental services.

Figure 10 compares the growth in total current expenditures and total governmental revenues to the change in Minnesota per capita personal income from 1999 to 2003. During this period, total current expenditures grew faster than per capita income every year.

<sup>5</sup> The chart excludes capital outlays, as this category is more prone to yearly fluctuations. The chart also excludes revenues derived from borrowing, because cities are prohibited from borrowing for current expenditures. Most capital projects are funded through the issuance of bonds or other types of borrowing, such as certificates of participation.

<sup>6</sup> Per capita income is calculated by dividing Minnesota total personal income by its total mid-year population. The figure is calculated by the Bureau of Economic Analysis, which is a part of the U. S. Census Bureau.

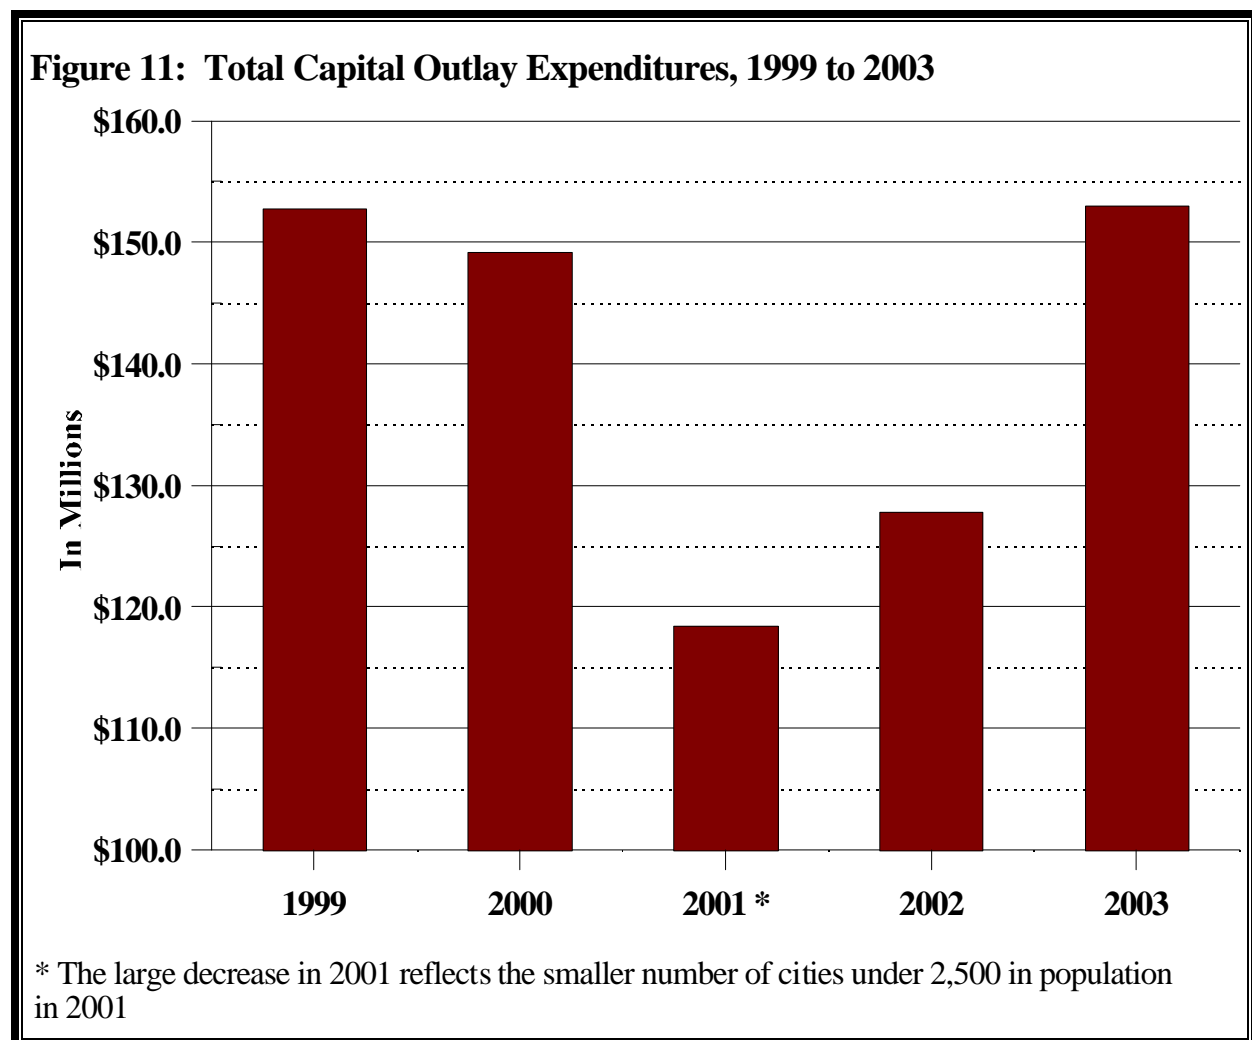

## Capital Outlay Expenditures

Capital outlay expenditures account for the purchase, construction, or permanent improvements of buildings, equipment, machinery, and land. Small cities expended \$153.0 million on capital investments in 2003. This represents an increase of 19.7 percent over the level expended in 2002.

Capital outlays are more likely than current expenditures to vary significantly from one year to the next. The reason for this is that capital projects tend to be large in size, but the associated costs are short-term. Some of the factors that influence the level of capital investments include: demands for public meeting places and facilities, the need to replace aging infrastructure, public safety concerns, infrastructure improvements for new developments, and damage to public facilities caused by fire, floods, and storms.

Figure 11 illustrates the trend in capital spending of cities under 2,500 in population for the years 1999 through 2003.

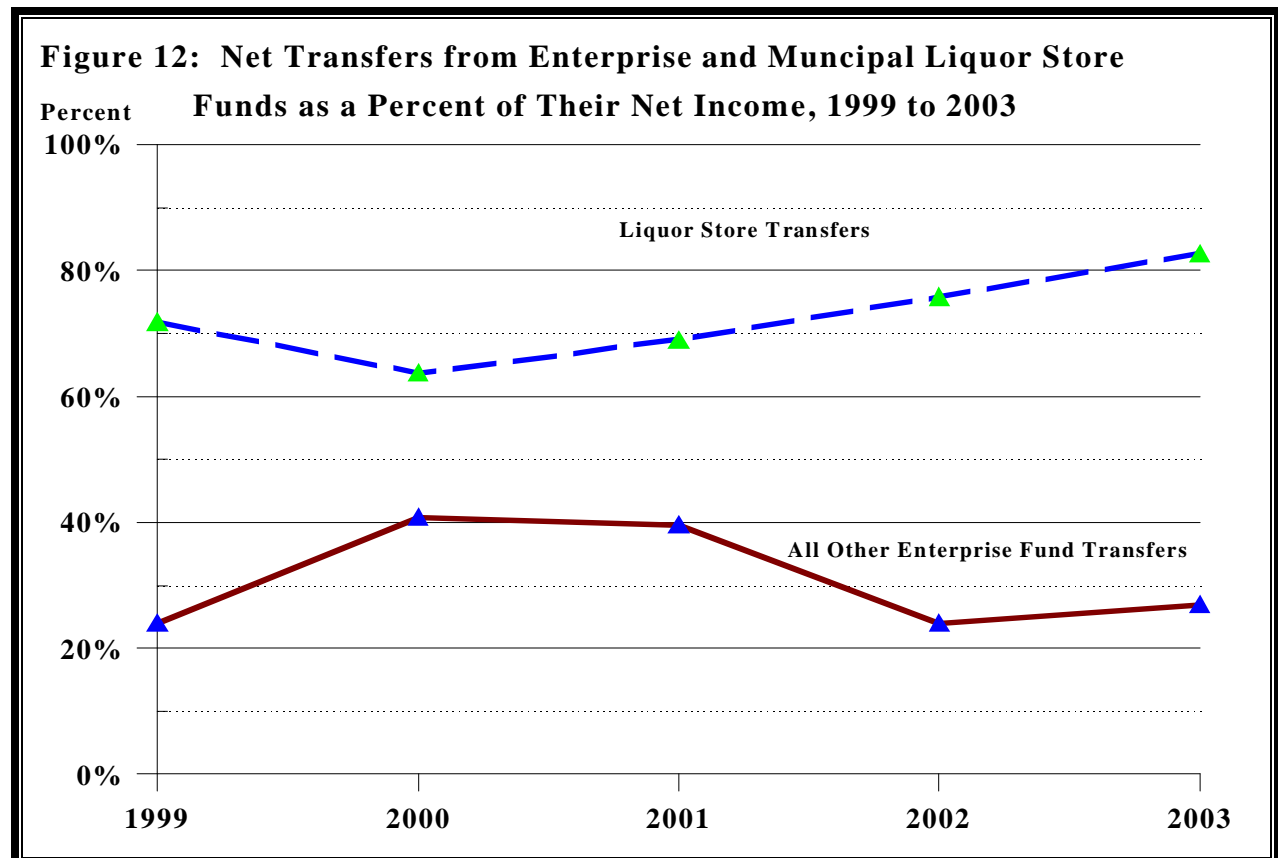

## Municipal Enterprises

In addition to Governmental Funds, many cities establish Enterprise Funds to account for services that are financed and operated in a manner similar to private business enterprises. These enterprises are intended to be self-sustaining through fees and user charges. Although some enterprises earn a net income, most have the objective of breaking even. The most common enterprises created by cities are electric, gas, sewer, water, and heat utilities.

The net income of municipal enterprises increased 19.2 percent between 2002 and 2003 while net transfers (transfers out minus transfers in) from Enterprise Funds increased 33.6 percent between 2002 and 2003. An example of this type of transfer is when a city transfers excess reserves from its water utility enterprise fund to the city's General Fund.

Municipal liquor stores, which are separated from other municipal enterprises because of accounting differences, showed a decrease of 13.5 percent in net income and a decrease of 5.0 percent in net transfers between 2002 and 2003. The primary purpose of municipal liquor stores is to provide additional revenues to cities, whereas other types of municipal enterprises primarily exist to provide a particular service for the city and citizens.

Figure 12 examines the five-year trend in net transfers from enterprise and municipal liquor store funds as a percent of net income. Tables 14 through 22 provide additional details on municipal enterprises.

## Outstanding Long-Term Indebtedness

Cities incur long-term debt through the issuance of bonds and notes, certificates of indebtedness, and tax anticipation certificates. Long-term lease agreements are also classified as long-term debt. Cities may only borrow to finance capital projects and purchases. Cities are restricted by law from borrowing for current expenditures. The amount of outstanding debt affects a city's current expenditures because cities must make principal and interest payments to service the debt.

Table 3 looks at outstanding bonded indebtedness for 2002 and 2003. Figure 13 shows the five-year trend of outstanding long-term debt for small cities.

**Table 3: Two-Year Summary of Outstanding Bonded Indebtedness**

	2003 Amount	2002 Amount
General Obligation	\$38,933,997	\$ 34,920,987

## **APPENDIX A**

### **FACTORS INFLUENCING CITY FINANCES**

This page left blank intentionally

# Appendix A

## Factors Influencing City Finances

The finances of cities are affected by many different factors. Some of the variation results from decisions made by city officials. Some is due to factors outside the control of the elected officials, such as a city's size, the economic status of its residents or the proximity of similar services provided elsewhere. The amount of revenue available may be influenced by rising or falling property values, the use of fee-based services, intergovernmental grants for projects, access to taconite aid, and many other factors. Expenditures may be affected by the demographic, geographic, historical or political landscape of the city. Large swings in expenditures may reflect demands caused by extraordinary weather events such as floods and tornados, high levels of snowfall, public safety events such as forest or brush fires, or large-scale investigations of high-profile crimes. Some factors have an on-going effect on city finances, while others might be one-time events.

### A. Demographics

**Age of Housing.** In the metropolitan area, the average age of housing in a city reflects not only the probable condition of the city's infrastructure, but several other conditions as well. The League of Minnesota Cities found the average age of housing to be indicative of a variety of characteristics, including a higher relative rate of poverty, more tax exempt property, more subsidized housing, and a declining population base. Each of these factors tends to contribute to a demand for public services.

**Population.** Cities with larger populations face certain challenges not encountered by smaller cities. Simply dealing with large amounts of traffic is one challenge that can become very costly, depending upon the burden carried by an area's streets and highways. Large populations may also indicate high population densities that in turn are associated with higher poverty and crime rates.

**Population Decline.** A large loss of population can have a very significant effect upon a city's spending. The costs of a city's infrastructure and many of its services do not go down immediately when a number of city residents move away. The city must then make decisions to do without certain services or to raise the property taxes on the remaining citizens to pay for the services.

**Income.** Income is indirectly related to a city's ability to raise revenues. Where incomes are lower, property values may also be depressed, reducing a city's tax capacity. Poverty rates, in turn, will be higher creating greater demand for public services.

**Crime Rate.** Higher crime rates require a correspondingly higher level of public safety services. Cities that host sporting and other entertainment events can draw large crowds of nonresidents and create unusual public safety service demands. In addition, higher levels of poverty are also associated with the crime rate of a city and contribute to an overall greater demand for police protection. In addition to these demands, expenditures can be affected by a number of different factors, which include the number, type and use of personnel, the scope of services, and amount of shared services. In addition, the demographics and mix of facilities within the city may affect expenditures for public safety.

## **B. Geographic Location**

Different areas of the state often operate within quite different economic environments. Just the presence of one large business or industry can impact an entire region. Declines in industries or companies that dominate local economies may result in a reduction of the tax capacity of the area. Trends in agriculture may result in lower property values and a decline in revenues for cities in regions whose economies are primarily based on agriculture. Cities located in these areas may experience difficulty raising revenues at the same time that they face higher demands for public services.

## **C. Revenue Sources**

**Tax Capacity.** The amount of money any individual or entity spends is directly related to the amount that is available to spend. Likewise, the costs of doing business are directly related to the amounts of revenue that can be generated to meet the costs.

**Taconite Aid.** Many cities located in the “Iron Range” are eligible to receive special funding in the form of taconite aid. For a number of years, revenues in these cities were greater than they might have been without the distribution of taconite aid, especially for cities without taconite processing plants. In addition, the availability of taconite aid enabled these cities to spend without raising property taxes.

**Enterprise Funds.** Services provided through enterprise funds allow cities to pass the costs of services directly onto the users of the services. By using this type of accounting mechanism, cities may be able to keep down the level of general property taxes needed to provide services.

## **D. Shared Services, Joint Powers Agreements**

A significant practice among cities is the sharing of services and the use of joint powers agreements to provide necessary services. "Joint exercise of powers" is defined in Minnesota Statutes § 471.59. Such arrangements allow cities to provide services jointly with other cities and thus pool their resources. For example, the metropolitan cities of Circle Pines, Lexington, and Centerville have a joint powers agreement to provide police protection services.

A number of cities share services through the use of contracts. For example, the City of St. Paul contracts with several other cities in Ramsey County for the provision of water. The City of St. Anthony contracts with Falcon Heights and Lauderdale to provide police protection. In Greater Minnesota, the City of Thief River Falls provides fire services to five townships on a contractual basis.

Shared service arrangements are not necessarily formal; some cities provide services to other jurisdictions on an informal basis. By sharing the costs of services, cities can achieve greater economies of scale and avoid duplicating services and capital investments. Cities that provide a service to a number of entities may show higher expenditures for that service, but will have these costs defrayed by fees provided by the other participating entities.

## **E. Proximity to County, Regional, or State-Run Programs/Facilities**

Cities that are located near county, regional or state-run facilities may decide to have their citizens take advantage of those facilities and services rather than provide them on their own. For example, the city that houses the county library probably won't build their own. Similarly, cities located close to a regional or state park may opt not to develop or expand their own park program. Smaller cities located near larger cities may do the same.

The degree of isolation experienced by a community, whether geographic or technological (e.g., lack of advanced telecommunications capability), can also affect service demands and costs. Cities that are remote from other communities may not have the opportunity to participate in joint powers arrangements or have access to urban amenities, and thus may need to provide a wider range of services out of their own budgets.

## **F. Types of Industry Present and Service Demands**

One factor that can have a significant effect on an individual city's situation is the type of industry present in the city. For example, industries such as paper mills may place particularly heavy burdens on the city's water supply, sewers, fire department, or streets. At the same time, the presence of these industries contributes to the property tax base of the city. Expenditures for these services may be higher than for other cities, but the cost is not necessarily borne by the residents of the city.

## **G. Source of Labor**

Numerous factors can impact local governments' levels of expenditures for labor. Use of part-time employees, reliance on volunteers, unionization of workers, retention of workers, and use of independent contractors for specific projects or general services can all effect the salary and fringe benefit costs paid by local governments.

## **H. Other Factors**

The effects of weather and natural disasters can significantly affect the expenditures for certain services over a period of time. Cities affected by floods and tornadoes may have higher public safety, streets and highways, and other infrastructure costs. During winters in which there is an unusually high snow fall, cities may have increased expenditures for snow removal. There are many other incidental factors not included in this list. Explanations of differences in city expenditures should be pursued with city officials.

## **APPENDIX B**

# **FACTORS INFLUENCING GENERAL AND SPECIAL REVENUE UNRESERVED FUND BALANCES**

This page left blank intentionally

## Appendix B

### Factors Influencing General and Special Revenue Unreserved Fund Balances

Minnesota cities report their fund balances at the close of their fiscal year (which runs concurrent with the calendar year). This creates an impression that cities have excessive amounts of revenue held in reserve. In reality, city fund balances should be relatively large at the end of the year because of local government cash-flow cycles. Cities must rely on their fund balances to meet expenses during the first five months of the next fiscal year, until they receive the first property tax payments (May) and aid payments from the state (July).

Unlike state government, which collects income tax withholding and sales tax receipts regularly throughout the year, Minnesota's cities do not have a constant flow of revenue from which they are able to fund local government operations. Property tax levies, state aid to local governments, and property tax credits comprise the majority of city discretionary revenues. Minnesota statutes govern the flow of these major revenue sources into city treasuries.

- Counties distribute the cities' share of the first-half property tax levies in late May and early June.
- Cities receive the first half of their state aid and property tax credits from the state in July of each year.
- Counties distribute the cities' share of the second-half property tax levies in late October and early November.
- Cities receive the second half of their state aid and property tax credits from the state in December of each year.

Given this state-controlled flow of revenue, city fund balances (which are measured on December 31) are the primary source of funds available to cities for their operating expenses during the first five months of the next fiscal year. An adequate fund balance will provide a local government with the cash flow required to finance expenditures without short-term borrowing.

### Unique Circumstances of Each Jurisdiction Determine the Size of Fund Balance Needed

While cities must rely on the fund balances for cash flow purposes during the first five months of a year, the unique circumstances of each local government will determine the size of a fund balance that must be maintained to avoid the need for short-term borrowing and to operate effectively.

Numerous factors must be considered in determining the size of a fund balance necessary for a city to avoid short-term borrowing.

- If cities receive relatively large amounts of revenue from sources such as fees, fines, charges for services, other intergovernmental grants and aids, or interest on investments during the first five months of the calendar year, then they will be less dependent on their fund balances for cash flow purposes.
- Cities are often able to delay certain purchases until after the initial property tax and state aid payments are received. While payments for employee salaries, wages, and most benefits cannot be delayed during the first five months of the year, purchases of supplies and capital equipment may be delayed.

The individual cash flow needs of a city will determine the minimum fund balance that is necessary for a city to operate effectively. Cities with the ability to generate significant revenues from sources other than property taxes and state aid payments are often able to minimize the need for large fund balances to support their cash flow requirements. Conversely, cities that rely heavily on property taxes and state aid for the majority of their revenues will need relatively large fund balances to meet their cash flow needs from January 1 through June 1 of every calendar year.

While there are many factors that help determine the minimum fund balance needed to maintain financial health, the State Auditor has set a standard of between 35 and 50 percent of current expenditures as an acceptable level. The Auditor has concerns about the financial health of cities maintaining an unreserved fund balance lower than this standard. These cities may not have enough reserves to carry them through financial downturns or unexpected contingencies. Conversely, the Auditor has concerns about cities that maintain unreserved fund balances exceeding what is needed to carry them through financial downturns. Taxpayers in cities that maintain a fund balance higher or lower than this standard should press their city official to explain their fund balance policy.

## **GLOSSARY**

This page left blank intentionally

## Glossary

**BORROWING** - These revenues reflect the sale of bonds and notes, certificates of indebtedness, and tax anticipation certificates. Cities are restricted by law from borrowing for current expenses.

**CAPITAL OUTLAY** - These expenditures include the purchase, construction or permanent improvements of buildings, equipment, machinery, and land. Capital outlay varies from year to year based on the needs and resources of the cities.

**CAPITAL OUTLAY FOR ENTERPRISE FUNDS** - The expenditures from governmental funds for improvements to public service enterprises, such as sewer and water mains.

**CAPITAL PROJECTS FUND** - A fund created to account for the financial resources that are used for the acquisition or construction of a fixed asset.

**CASH BASIS OF ACCOUNTING** - Basis of accounting that recognizes transactions or events when related cash amounts are received or disbursed.

**CHARGES FOR SERVICES** - These revenues reflect fees for activities of the governmental funds. These include rent of city hall by individuals or organizations, police and fire contracts, fire calls, recreation fees, park dedication fees, etc.

**DEBT SERVICE EXPENDITURES** - These expenditures reflect the annual costs of servicing the outstanding debt of the local government. These costs include principal, interest, and some fiscal charges.

**DEBT SERVICE FUND** - A fund to account for the collection of resources and payment of principal and interest from long-term debt.

**ENTERPRISE FUND** - A fund established to account for operations financed and operated in a manner similar to private business. Examples include water, sewer, and electric utilities. The expenses of providing services are primarily financed by user charges.

**FINES AND FORFEITS** - These revenues reflect receipts from the payment of penalties for law violations, non-observance of contracts, and forfeited deposits.

**FRANCHISE TAXES** - These revenues reflect proceeds from taxes imposed on public utilities, usually involving elements of a monopoly, (e.g., electric utilities, gas utilities, cable TV) for use of public property.

**GENERAL FUND** - The fund used to account for all financial resources not required to be accounted for in another fund. This fund is the main operating fund.

**GENERAL GOVERNMENT EXPENDITURES** - These expenditures reflect the costs associated with running a local government, such as the mayor, the city council, administration, finance, and elections. Expenditures in this category include salaries, wages, and benefits of legislative, judicial, and administrative personnel, supplies, and city hall maintenance.

## Glossary

**GOVERNMENTAL FUNDS** - The funds through which most governmental activities are financed. The four governmental fund types are: general, special revenue, debt service, and capital projects.

**GRAVEL TAX** - These revenues are derived from taxes imposed by the local government for aggregate material removal.

**HEALTH** - These expenditures are for the maintenance of vital statistics, restaurant inspection, communicable disease control, and various health services and clinics.

**HRA AND ECONOMIC DEVELOPMENT** - These expenditures are for development and redevelopment activities in blighted or otherwise economically disadvantaged areas. Activities may include low interest loans to individuals and businesses, cleanup of hazardous sites, rehabilitation of substandard housing and other physical facilities, and other assistance to those wanting to provide housing and economic opportunity within a disadvantaged area.

**INTEREST ON INVESTMENTS** - These revenues reflect interest earned on checking and savings accounts, CDs, money market funds, and bonds. This category also includes dividends. In addition, the net increase or decrease in the fair value of investments is recorded here.

**LICENSES AND PERMITS** - These revenues reflect receipts from liquor licenses, cigarette licenses, other business licenses, street use permits, buildings permits, and other non-business licenses and permits.

**MISCELLANEOUS EXPENDITURES** - These expenditures reflect the costs of activities that were not allocated to a specific function. Some activities included in this category are pension and insurance costs not allocated to a specific department.

**MISCELLANEOUS REVENUES** - These revenues refer to refunds, reimbursements, donations, and lease payments.

**MODIFIED ACCRUAL BASIS OF ACCOUNTING** - Basis of accounting according to which (a) revenues are recognized in the accounting period in which they become available and measurable and (b) expenditures are recognized in the accounting period in which the fund liability is incurred, if measurable, except for unmatured interest on general long-term debt and certain similar accrued obligations, which should be recognized when due.

**NET TAX LEVY** - The city net property taxes, after state property tax relief aids or grants, required to be paid by the property owners of the city.

**OTHER FINANCING SOURCES** - Long-term debt proceeds, sale of fixed assets, and transfers from other funds.

**OTHER FINANCING USES** - Transfers to other funds, refunding bond proceeds deposited with escrow agent and invested until they are used to pay principal and interest on the old debt at a future time, and remittance to other agencies.

## Glossary

**OUTSTANDING LONG-TERM DEBT** - This category refers to the long-term debt that a local government has incurred to finance its capital projects. Examples of long-term debt include various types of bonds and other obligations such as notes and long-term leases.

**PARKS AND RECREATION** - These expenditures reflect park maintenance, mowing, planting, and removal of trees. Recreation expenditures include festivals, bands, museums, community centers, cable TV, baseball fields, organized recreation activities, etc.

**PUBLIC SAFETY EXPENDITURES** - These expenditures reflect the costs related to the protection of persons and property. This category combines several distinct city departments, including police, fire, ambulance services, and other protection. They are combined here because cities allocate similar responsibilities differently among these departments.

**SANITATION** - These expenditures reflect the costs of refuse collection and disposal, recycling, as well as weed and pest control. Some cities provide sanitation services through enterprise funds.

**SPECIAL ASSESSMENTS** - These revenues refer to levies made against certain properties to defray all or part of the costs of a specific improvement, such as new sewer and water mains, deemed to benefit primarily those properties. The amount includes the penalties and interest paid on the assessments.

**SPECIAL REVENUE FUNDS** - A fund used to account for the proceeds of specific revenue sources that are restricted to expenditures for a specific purpose.

**STREETS AND HIGHWAYS EXPENDITURES** - These expenditures reflect the costs associated with the maintenance and repair of local highways, streets, bridges, and street equipment. Common expenditures include patching, seal coating, and snow removal. Expenditures for road construction are not included in current expenditures but are accounted for as capital outlay.

**TAXABLE TAX CAPACITY** - The tax capacity less the tax increment district value, less the fiscal disparities contribution value, plus the fiscal disparities distribution value.

**TAX CAPACITY** - The value assigned to the property used to calculate the property taxes.

**TAX INCREMENTS** - These revenues refer to the amount of resources cities generate when they establish tax increment financing (TIF) districts. In a TIF district, the increase in property tax revenues in the redeveloped area are used to pay the costs of development and redevelopment in the district rather than the general services of the city, county, and school district.

**TOTAL CURRENT EXPENDITURES** - This category reflects the total of all expenses relating to current operations.

**TOTAL EXPENDITURES** - This category includes current operating expenses, capital outlays, and debt service principal and interest payments.

## Glossary

**TOTAL REVENUES** - This category reflects all sources of revenue that increase the amount of available resources without creating a liability or a future payment. Borrowing and transfers between funds are not included in total revenues.

**TRANSFERS - ENTERPRISE FUNDS** - The transfer of available resources to or from public service enterprises. An example of this transfer is a water utility transferring money to the General Fund.

**TRANSFERS - GOVERNMENTAL FUNDS** - The transfer of money between governmental fund types. The revenues and expenditures for these funds are always shown in the same tables.

**UNALLOCATED INSURANCE** - These expenditures refer to insurance premiums that were not allocated to a specific function of government.

**UNALLOCATED PENSION CONTRIBUTIONS** - These expenditures refer to contributions to pension plans that were not allocated to a specific function of government.

## **RECENT ANNUAL REPORTS, SPECIAL STUDIES, AND BEST PRACTICES REVIEWS FROM THE OFFICE OF THE STATE AUDITOR'S GOVERNMENT INFORMATION DIVISION**

### **An Analysis of Minnesota's Municipal Liquor Store Operations in 2003**

This annual report details the sales and profits of Minnesota's municipally-owned and operated liquor stores. December 2004.

### **Best Practices Review: *Cooperative Efforts in Public Service Delivery***

The best practices review highlights examples of successful local government cooperation and offers guidance to those local governments pursuing cooperative efforts. December 2004.

### **2003 Minnesota Township Finances**

This annual report lists the sources and amounts of revenues, expenditures and outstanding debt for Minnesota towns for the most recent fiscal year. November 2004

### **Financial Trends of Minnesota School Districts – School Districts Under 1,000 Enrollment**

This annual report provides five years of data and rankings based on the per pupil revenues, expenditures, and debt for all regular Minnesota school districts with enrollments under 1,000 for the most recent year. The report also provides rankings on student demographics, average teacher salaries, fund balances, and other statistics. May 2004.

### **2003 Criminal Forfeitures in the State of Minnesota**

This annual report describes the amount of property and cash seized by law enforcement agents in criminal forfeitures and what happens to the forfeited items. May 2004
