

OVERVIEW: 2003 Recycling Recovery Rates of Metropolitan State Agency Offices and Operations

05 - 0207

State Employees Exceed 60 Percent Recycling Recovery Rate Goal

Minnesota's public employees continue to recycle more than 60 percent of their discarded material and to implement waste reduction. The Minnesota Department of Administration's Resource Recovery Office assists metropolitan state agency and regional government locations in calculating and reporting the recycling recovery rates of 27,000 employees located in the counties of Anoka, Carver, Dakota, Hennepin, Ramsey, Scott, and Washington. It provides technical assistance to state offices, and its State Recycling Center provides collection and marketing to the Capitol Complex and nearby agencies.

State Government Resource Recovery Program Rates 1991-2003

	1991	1992	1993	1994	1995	1996	1997	1998	1999	2000	2001	2002	2003
Statutory Recycling Goal	40% by 12/93			60% by 12/96									
Metro Area	30%	34%	51%	42%	44%	52%	64%	61%	64%	67%	61%	64%	71%
Capitol Complex	49%	54%	54%	60%	67%	66%	67%	64%	66%	63%	68%	64%	64%

The State Government Resource Recovery Program continues to exceed recycling goals as summarized in the above table. Reporting of recycling rates was required by the legislature starting in 1991. The recycling recovery rate of agencies in the Capitol Complex is calculated using the actual tonnage of recovered recyclables and refuse. Department of Administration employees manage discarded materials from agencies in the Capitol Complex and nearby locations. The metropolitan area agencies use public or private recycling/refuse services and forward their own raw data, if available, for calculation by the Resource Recovery Office. Some agencies are located in rental properties that provide private maintenance and recycling services and data is sometimes not available from their private vendors. The *2003 Recycling Recovery Rates of Metropolitan Offices and Operations* is published for state agencies, metropolitan regional government entities, the Minnesota Office of Environmental Assistance and the Legislature to facilitate recycling progress, opportunities, and accountability.

Recycling Recovery Rate Reporting

The Minnesota State Government Resource Recovery Program was established to promote the reduction of waste generated by state agencies, the separation and recovery of recyclable and reusable commodities, the procurement of recyclable commodities and commodities containing recycled materials, and the uniform disposition of recovered materials and surplus property. The Department of Administration, Plant Management Division's Resource Recovery Office administers the Resource Recovery Program and recycling rate reporting in accordance with Minnesota Statutes 115A.15.

OVERVIEW: 2003 Recycling Recovery Rates Continued

This state statute requires that each state agency in the metropolitan area work toward individually achieving a 60 percent recycling goal. The recycling recovery rate is the percentage of total waste that is recycled using this formula:

$$\text{Recycling Recovery Rate} = \frac{\text{Recyclables Recovered}}{\text{Recyclables Recovered} + \text{Solid Waste Discarded}}$$

A high recycling recovery rate may be the result of a combination of factors such as employee dedication, full support from management for collection and measurement, type and volume of materials collected, building population, physical parameters of the location, and interagency coordination. The recycling recovery rate data in the *2003 Recycling Recovery Rates of Metropolitan Office and Operations* report is most useful for determining obvious needs, general trends, and types of material that are or are not being recovered for recycling. Agencies not achieving the 60 percent recycling goal should explore their recycling options. For further assistance, agencies may contact the Resource Recovery Office, which provides recycling collection services and technical assistance, the Minnesota Office of Environmental Assistance, or local solid waste officials.

Promotion of Waste Reduction with Recycling

The Resource Recovery Office promotes waste reduction as an integral part of recycling efforts. One example is the electronic communication is used to survey public entities to measure annual recycling rates. Agencies requested that their self-initiated waste reduction plans be reported in conjunction with their recycling rates. Therefore, the *2003 Recycling Recovery Rates of Metropolitan Office and Operations* report identifies agencies volunteering that they have waste reduction plans.
