# EMPLOYMENT OUTLOOK TO 2012 NORTHEAST

mployment in Northeast Minnesota is predicted to increase by 11.3 percent between 2002 and 2012. The addition of 17,500 jobs will move the region's employment base from 155,900 in 2002 to 173,400 by 2012. The region's projected job growth rate falls short of the 14.7 percent growth predicted for the state.

> Service-producing industries will account for more than nine out of every ten new jobs in the region.

Goods-producing employment is expected to grow by only 3.2 percent while service-producing employment is projected to expand 13.6 percent. Nearly 40 percent of employment growth is expected to be in the health services sector. Most of the projected health services employment expansion will be in the nursing and residential care facilities (2,700), ambulatory health care

services (1,900), hospitals (1,200), and social assistance (1,100) industries.

Employment growth in the trade, transportation and utilities sector is expected to add the second-largest number of jobs. Employment in the sector is expected to be boosted most by employment gains at gasoline stations, building material and garden supply stores, and merchant wholesalers of durable goods. Each of these industries is projected to add approximately 400 positions.

New jobs in the food services and drinking places (1,200), accommodation (500), and amusement, gambling, and recreation (400) industries will drive leisure and hospitality employment growth. Professional and business services jobs are expected to grow the fastest, expanding more than twice as fast as overall job growth. Professional and business services industries expected to add the most jobs are the accounting and bookkeeping services (400), service to buildings and dwellings (300), and business support services (300) industries.

### EMPLOYMENT OUTLOOK BY INDUSTRY GROUP

Northeast Minnesota. 2002 - 2012

Change **Industrial Category Projected Change in Number of Jobs** 19.0 % 6,950 Education and Health Services\* 9.5 % 2,614 Trade, Trans. and Utilities 13.1 % 2.254 Leisure and Hospitality Professional and Business Services 27.2 % 2,247 Construction 16.2 % 993 Government\* 5.5 % 890 Manufacturing 6.2 % 704 **Financial Activities** 11.1 % 661 Nonagricultural Self-employed 6.0 % 654 Other Services 8.8 % 547 Information 9.0 % 257 Ag., Forestry, Fishing and Hunting -14.9 % -358 Mining -21.8 % -869 9,000 8,000 \*State/local government education and hospital jobs are included in the education and health services industry groups.

Employment in the construction and financial activities sectors are the only other sectors projected to expand at or faster than overall employment. Insurance agencies (200) are projected to add the most jobs among the financial activities industries. Expanding payrolls among special trade contractors (800) will account for most construction job creation.

Manufacturing in Northeast Minnesota will add jobs over the projection period but not enough to recover all of the manufacturing jobs lost between 2000 and 2002. Hiring is expected to be strongest at transportation equipment manufacturers (400). Mining and agricultural-related employment is expected to continue to decline over the next ten years.

BY INDUSTRY

This is a summary of industry and occupational employment projections for 2002-2012. Detailed state and substate projections data are on the Internet at www.deed.state.mn.us/lmi/proj To order brochures, please specify the area and report you want and fax your name, address and phone number to 651.282.5429 or e-mail deed.pubs@state.mn.us

## BY OCCUPATION

ne-third of the projected 17,500 new jobs in Northeast Minnesota will be in service occupations. Service occupations, which accounted for 22 percent of total regional employment in 2002, are expected to expand by 16.5 percent over the tenyear period, well above the projected 11.3 percent gain for total employment.

The fastest-growing services jobs will be personal and home care aides, home health aides, and medical assistants. Home health aides, combined food preparation and serving workers, and nursing aides, orderlies, and attendants will add the highest number of workers among services occupations.

Professional and related occupations are projected to increase 14.3 percent, adding 4,300 jobs. Social and human service assistants, registered nurses, and postsecondary teachers are expected to expand the most among professional occupations. Social and human service assistants, electronics engineers (except computer), veterinary technologists and technicians, and rehabilitation counselors are anticipated to be among the fastestgrowing professional occupations.

Sales and related jobs are expected to add the third most jobs, expanding at a rate just above overall job growth. Positions for insurance sales agents, supervisors of non-retail sales workers, and counter and rental clerks will increase the fastest among sales jobs but as usual most of the growth in sales and

#### **EMPLOYMENT OUTLOOK BY OCCUPATIONAL GROUP**

Northeast Minnesota, 2002 - 2012

Change

#### **Occupational Category**

Service Occupations Professional and Related Occupations Sales and Related Occupations Management, Business, and Financial Office and Administrative Support Construction and Extraction Transportation and Material Moving Installation, Maintenance, and Repair **Production Occupations** Farming, Fishing, and Forestry

related fields will be created by expanding retail salespersons and cashiers.

Employment growth for management, business, and financial workers is expected to exceed overall employment growth with business operations specialist, general and operations manager, and accountant and auditor jobs increasing the most. The fastest growing occupations within this occupational group will be tax preparers, computer and information systems managers, and claims adjusters, examiners, and investigators.

Office and administrative support jobs will expand by roughly 1,200 jobs. Construction and extraction employment will be right behind with job creation projected around 1,000. Customer service representative and general office clerk positions are expected to be the leading job gainers in offices. Carpenters and supervisors/managers of construction trades workers will top job expansion at construction sites.

Transportation and material moving; installation, maintenance, and repair; and production occupations are projected to expand, but fall significantly below overall job growth.

making up these three major occupational groups are projected to increase, but the other 40 percent are expected to show no change or decrease by 2012. Farming, fishing, and forestry occupations as a group are also expected to shrink.

In addition to the projected 17,500 job openings expected to be generated through employment growth between 2002 and 2012, another 37,900 replacement job openings are expected to be available to new workforce entrants and people reentering the workforce as other workers retire or leave the labor force for other reasons. There will be demand for workers for replacement openings even in occupations that are decreasing in size.

These are the top 50 occupations, ranked by a combination of projected percent growth and numeric change. They are presented alphabetically by level of training required. This ranking does not account for supply of qualified workers or competition for openings, which are other important factors to consider when using these numbers. Median annual salaries are Northeast 2005 Salary Survey unless asterisked. Single asterisked salaries are 2005 state median annual salaries. More information on job availability can be found in the MN Careers publication, produced by the Minnesota Department of State Colleges and Universities.

# REGIONAL EMPLOYMENT

Brochures are available for each of these six regions; detailed industry and occupational projections numbers are on the Internet at www.deed.state.mn.us/lmi/proj

\*State/local government education and hospital jobs are included in the education and health services industry group, not government.
