## RESIDENTIAL BUILDING PERMITS ISSUED IN THE TWIN CITIES AREA JANUARY-DECEMBER 2002

In 2002, the number of new housing units authorized by building permits rose to a 15-year high in the Twin Cities area. Single-family activity outpaced last year's level by only a few units, according to data collected from local officials by the U.S. Commerce Department. However, the number of units reported as multifamily construction shot up by 58 percent, making up a 38 percent share of all new housing construction.

2002 totals for the seven-county region:

Single-family units	11,608	+0.3%
Multifamily units	7,186	+58.4%
Total	18,794	+16.7%

Nationally, the increase in housing permits was smaller—6 percent. The Minneapolis-St. Paul MSA (Metropolitan Statistical Area) ranked 8<sup>th</sup> in growth rate among the 25 largest metropolitan areas, as measured by new housing units per capita. The top-ranked growth areas continued to be southern cities.

Permit trends were far from uniform among the region's seven counties. Washington County dipped 15 percent compared to 2001. Anoka and Carver Counties saw minimal increases, Dakota rose 12 percent, and Ramsey and Carver gained 25-26 percent. Hennepin County activity expanded by a strong 43 percent.

Three Hennepin County cities reported more than 1000 new housing units: Minneapolis (1,604), Eden Prairie (1,197), and Plymouth (1,167)—due in large part to multifamily projects.

Highest in single-family units:

Blaine	813
Farmington	566
Shakopee	527
Prior Lake	474
Eden Prairie and Lakeville	472

Highest in multifamily units:

Minneapolis	1,367
Plymouth	887
Eden Prairie	725
St. Paul	501
St. Louis Park	323

In the six other MSA counties adjacent to the seven-county Twin Cities area, permit issuance declined slightly, but still accounted for 22 percent of the 13-county total, with 5,390 units authorized.

Per-unit construction cost for single-family homes rose less steeply than last year, only 2.5 percent, to an average of \$185,200. In the multifamily sector, average valuation was relatively flat last year but increased by 12 percent in 2002, to \$97,800.

**Twin Cities Metropolitan Area  
Residential Permits, January-December, 1980-2002**

## ABOUT THIS REPORT

This report provides an update of new residential building authorized by cities in the Minneapolis-St. Paul area during January through December 2002. It includes information on the number and location of single-family and multifamily building permits issued, and building permit valuations. The data used in this report was collected by the U.S. Department of Commerce, Bureau of the Census, from local governmental units. Housing permit data for individual cities appear in a table at the end of the report. *Monthly totals shown in the Census Bureau data may not add to the year-to-date figures, since the Census Bureau makes corrections and additions to the data as the year progresses.*

Questions about this information may be directed to Regan Carlson in the Metropolitan Council's Research Office, at (651) 602-1407 or [regan.carlson@metc.state.mn.us](mailto:regan.carlson@metc.state.mn.us).

The Metropolitan Council collects additional housing construction data through an annual survey of cities and townships in the Metropolitan Area, which is compared to the reports from the Commerce Department and used to prepare final data. The annual survey also asks for separate reporting of townhouse units, which is not available from the Commerce Department reports.

The Council also produces regular reports on construction activity other than housing. Questions about these and other reports can be directed to Metropolitan Council's Data Center at (651) 602-1140.

## DEFINITIONS

Residential activity in this report is measured in terms of *residential units* (housing units). A residential unit is defined as a house or apartment unit intended for occupancy as separate living quarters, having either a kitchen or cooking facilities for the exclusive use of the occupant(s) and direct access from the outside or through a common hall. Residential units do not include group quarters such as institutions, dormitories, hotels, and motels. **Townhouse units are included in the single-family category.**

The Twin Cities *Metropolitan Area*, or Region, includes seven counties under the jurisdiction of the Metropolitan Council: Anoka, Carver, Dakota, Hennepin, Ramsey, Scott and Washington Counties. The Minneapolis-St. Paul *Metropolitan Statistical Area (MSA)* includes the seven metropolitan area counties, plus the adjacent counties of Chisago, Isanti, Sherburne, and Wright Counties in Minnesota and Pierce and St. Croix Counties in Wisconsin. Metropolitan statistical areas are defined by the federal government for the purpose of standardized data collection and analysis.

**Building cost** refers to the valuation assigned to a building permit at the time the permit is issued. Generally, the building permit valuation is determined by the local governmental official on the basis of average square footage costs for various types of construction, according to Minnesota Administration Department guidelines. Consideration is also given to other factors. It is intended to measure the cost of construction, and in the majority of cases is lower than actual sales price. For instance, **the cost of the lot is typically not included.**
