About the Minnesota Office of Higher Education

The Minnesota Office of Higher Education is a cabinet-level state agency providing students with financial aid programs and information to help them gain access to post-secondary education. The agency serves as the state's clearinghouse for data, research and analysis on post-secondary enrollment, financial aid, finance and trends.

The Minnesota State Grant Program, which is administered by the agency, is a need-based tuition assistance program for Minnesota students. The agency oversees tuition reciprocity programs, a student loan program, Minnesota's 529 College Savings Program, licensing and an early awareness outreach initiative for youth. Through collaboration with systems and institutions, the agency assists in the development of the state's education technology infrastructure and shared library resources.

Introduction

This report contains data on the number and dollar amounts of Minnesota State Grants received by Minnesota undergraduates for Fiscal Year 2007 (July 1, 2006 to June 30, 2007). Minnesota State Grants are coordinated with Federal Pell Grants, so the tables and graphs also show combined Federal Pell and State Grant awards received by State Grant recipients. In addition, since ability to pay is calculated based on income and assets, data are reported by the adjusted gross income of the student's family. The report also includes information on three categories of student characteristics that affect State Grant awards.

Family Circumstances: Recipients are classified by family circumstances. Each category of family has its ability to pay assessed somewhat differently:

- Dependent students (usually students less than 24 years old who were not married and not supporting their own children)
- Married independent students with dependents (usually children)
- Unmarried independent students with dependents
- Married independent students with no other dependents
- Unmarried independent students with no dependents

Registration Load: The report classifies recipients by the number of course credits for which they registered. The registration load chosen by the student affects the price of attendance used in calculating Minnesota State Grant awards. The report classifies Minnesota State Grant recipients by two registration loads:

- Recipients who registered for fewer than 30 credits during Fiscal Year 2007.
 - These students are commonly called part-time or part-year students.¹
- Recipients who registered for at least 30 credits during Fiscal Year 2007.
 - These students are commonly called full-time, full-year students.

Postsecondary Institution Choice: The institutions students choose to attend determine the price of attendance used in calculating Minnesota State Grants. Institutions are grouped into five categories:

- Minnesota State Colleges and Universities - two-year colleges
- Minnesota State Colleges and Universities - four-year universities

¹ The Minnesota State Grant Program defines full-time attendance as a registration load of 15 semester credits (or the equivalent) per term. A registration load of 30 or more credits during Fiscal Year 2007 is equal to full-time, full-year attendance in this report. The 30 or more credits can be earned in any combination across all the terms during the fiscal year.

- University of Minnesota
- Minnesota private non-profit institutions²
- Minnesota private for-profit institutions

Data Used in Reporting Total Minnesota State Grants Received and Number of Recipients: The data in this report are based on the State Grant research data file as of November 2007. The totals may differ slightly from other documents published by the Minnesota Office of Higher Education, which could be based on data captured on different dates.

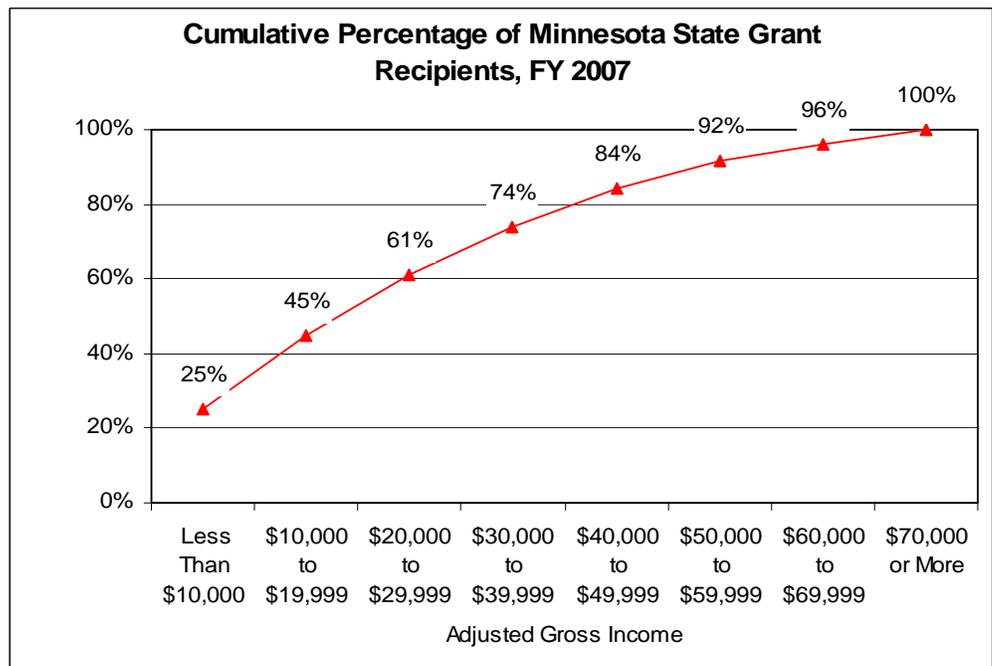

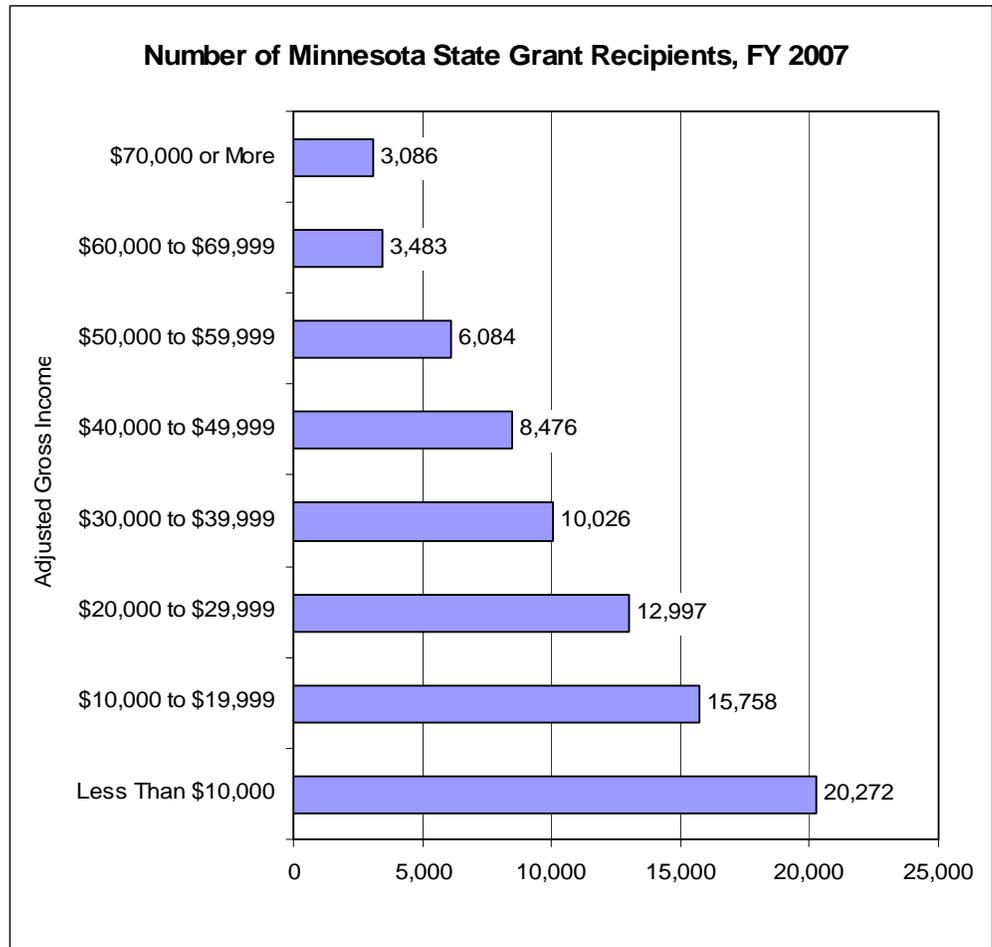

² Institutions operated by government entities besides Minnesota State Colleges and Universities and the University of Minnesota are included in this category for reporting purposes.

Overview

Of the 80,182 Minnesota State Grant recipients in Fiscal Year 2007, more than 20,000 were from families earning less than \$10,000, as shown on the top chart to the right. These earnings are the adjusted gross income reported on federal individual income tax forms. For dependent students, the parents' income was used; for others, the student's, and spouse's if married, were used.

About 25 percent of Minnesota State Grant recipients are part of families earning less than \$10,000, as shown on the bottom chart on this page. About 75 percent are from families earning less than \$40,000.

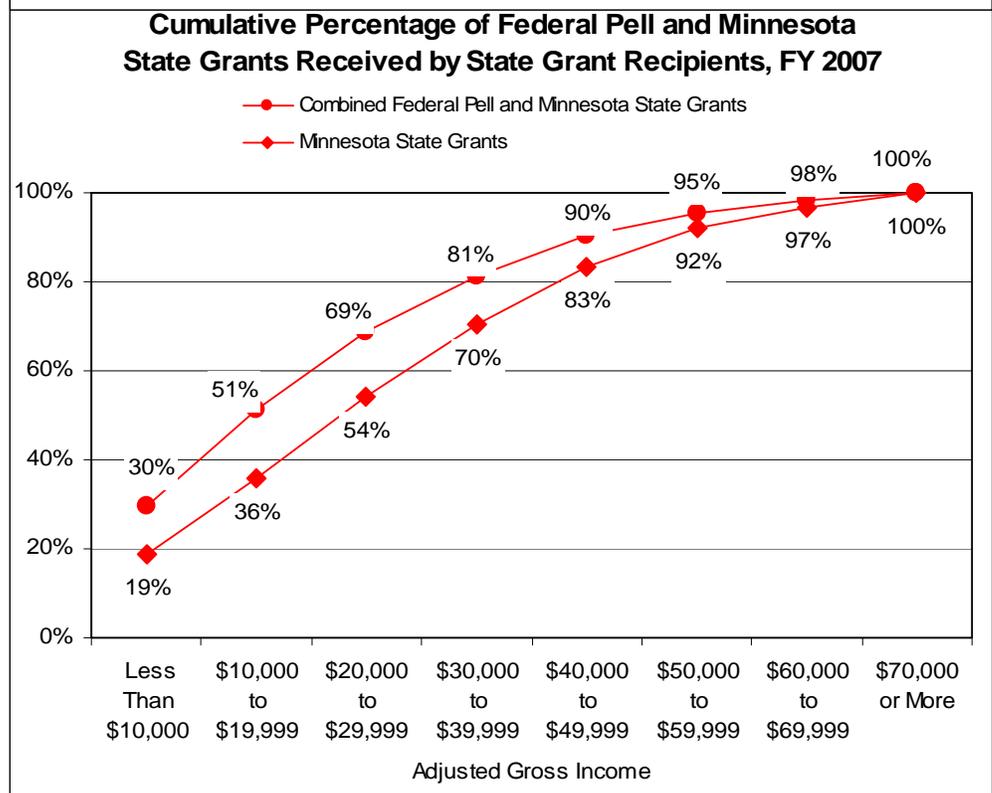

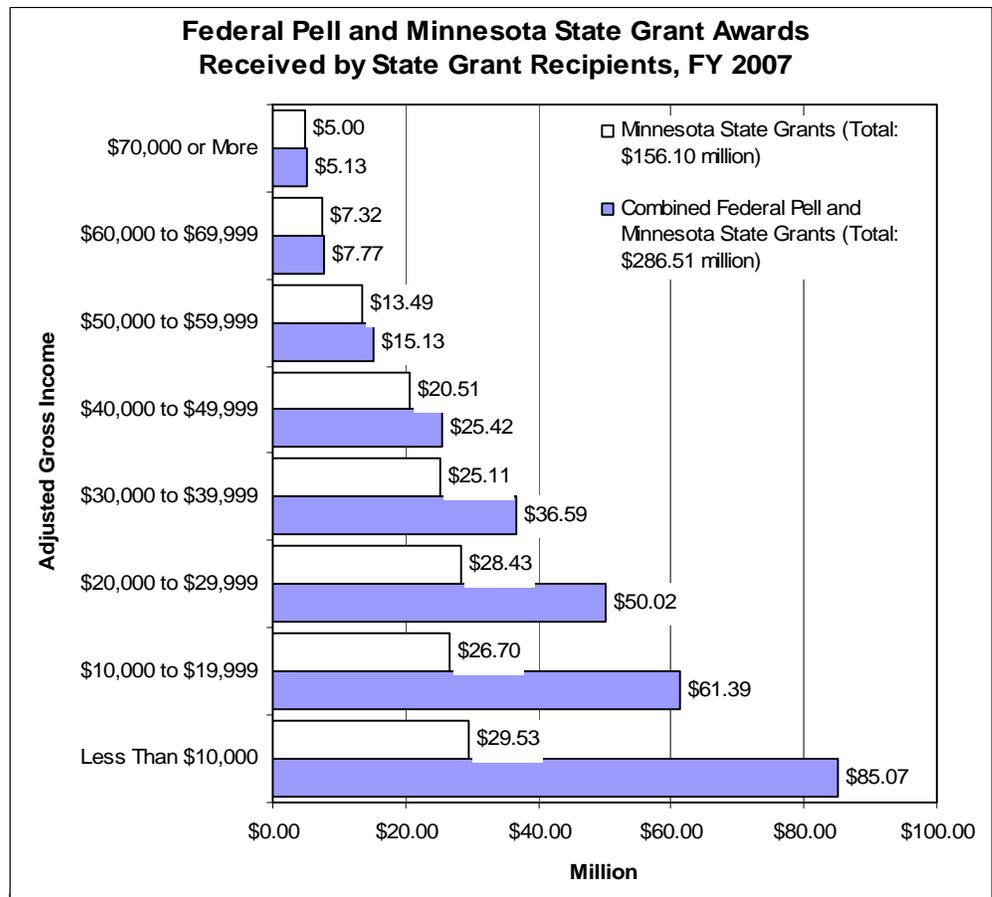

Additional detail about the characteristics of recipients is presented in the tables in the remaining sections of this report.

Of the \$287 million in combined Federal Pell and Minnesota State Grants received by State Grant recipients, about \$85 million was awarded to students from families earning less than \$10,000 annually, as shown on the top chart on this page. This was about 30 percent of all combined awards awarded in Fiscal Year 2007, as shown on the bottom chart on this page.

Of the \$156 million in Minnesota State Grants awarded in Fiscal Year 2007, about \$30 million was awarded to students from families earning less than \$10,000. This was about 19 percent of all awards. About 70 percent of Minnesota State Grant awards were made to students from families earning less than \$40,000.

The next two sections provide more detail about the overall Minnesota State Grant statistics. Subsequent sections provide detail sorted by family status, registration loads, and institution attended. The final section provides a breakout of statistics by institution attended.
