INTRODUCTION

"Actions of the 1967 Minnesota Legislature" is designed to provide members of the Legislature and other interested persons with a summary of major legislation passed during the 1967 regular session and extra session. This publication, by providing a topical reference to enactments and a detailed and historical analysis of major state appropriations, should serve as a sourcebook. Although the report was compiled without benefit of the session laws or the bound permanent journals, the material contained herein is believed to be accurate.

The report includes a summary of changes in existing laws and new laws enacted by the 1967 sessions. Amendments to existing laws are not always indicated. A number of enactments have been excluded because of their minor effect both as to substantive change and limited or local application. The summaries are necessarily brief and in many cases indicate only the general purpose of the law or the major changes effected. Summaries are identified by chapter number and legislative file number. Each enactment is grouped according to its main topic; in some instances summaries are grouped under more than one heading. The headings are identical to those used in previous editions of "Actions".

Additional information on all of the laws may be obtained by referring to the newspaper edition of the session laws which should be available soon.

A large portion of this report is devoted to detailed analysis and historical review of major state appropriations and the state building program.

Appropriation figures for the 1967 regular session and extra session were compiled by accountants on the staff of the Senate Finance Committee and the House Appropriations Committee.

Members of the legislature are urged to submit suggestions to the Legislative Research Committee for improving the usefulness of this summary.

* An "open" or "standing" appropriation is one which sets apart an unspecified or a specified amount of funds for continuous use without the need for reenactment by each succeeding legislature.

Certain items listed as open or standing appropriations have no amount indicated. The lack of an amount indicates either that the appropriation is made in an open amount if certain events transpire and the nature of the event determines the amount of the appropriation or that all details were not available at the time of preparing this chart to estimate accurately the appropriation required.
