**Minnesota Medical Assistance  
ICF-MR Recipient Rates  
Per 1,000 Population by County  
1980 - 2001**

---

This bulletin provides recipient rates by county for residents of Title XIX ICF-MR facilities both in the community and in State Regional Treatment Centers for 1980, 1985, 1990, 1995, 2000 and 2001. For 2001, the data labeled State Regional Treatment Centers is for the Minnesota Extended Treatment Option Program.

The recipient rates are determined by dividing the respective resident count by the age-group population estimate for each year and multiplying it by 1,000 to arrive at a rate per 1,000. The resident counts were derived from the Medicaid Eligibility files prior to 1995 and the Payment Files for 1995 and forward. The population data was derived from the "Minnesota County Projections 1995-2025" that was prepared by the State Demographer's Office.

Prior to 1995 all residents were identified on the Case Information File according to the county of financial responsibility as of January 1 for each year reflected in this report. This was a point in time reference. For 1995 and forward, residents are counted if MA paid at least one ICF-MR claim for January services within 6 months. Most claims for January are paid in February, however, some do carry over to subsequent months for payment.

A summary of the statewide recipient rates for 1980, 1985 and 1990 through 2001 by facility type is as follows:

**Minnesota Medicaid ICF-MR  
Recipient Rates Per 1,000 by Year**

---

Year	Community	State RTC	Total
-----	-----	-----	-----
1980	0.83	0.64	1.47
1985	1.13	0.56	1.69
1990	0.95	0.37	1.32
1991	0.94	0.32	1.26
1992	0.96	0.23	1.19
1993	0.96	0.21	1.18
1994	0.93	0.19	1.12
