

Affordable Housing Production in the Twin Cities

January 2009

This annual report summarizes new affordable housing added each year by Twin Cities area cities and townships.

Every year the Metropolitan Council determines a price-point for new owner-occupied housing that is affordable to households at 80 percent of area median family income, as calculated by the U.S. Department of Housing and Urban Development, at the prevailing home mortgage interest rates, estimated to be 6.2 percent for a 30-year fixed-rate home loan in 2007. This definition assumes that households earning 80 percent of the region's median income can afford mortgage costs (mortgage payments, taxes, insurance and related housing costs) without spending more than 30 percent of their income. The area median income (AMI) for 2007 was \$78,500; 80 percent of AMI was \$62,800. The Council considered owner-occupied units affordable if the price was less than \$206,800.

For affordable rental units, the Council used the maximum monthly rents permitted in the metropolitan area for the federal low-income housing tax credits to housing serving households at 50 percent of AMI or \$39,250 in 2007 (\$687/month for an efficiency or single-room occupancy unit, \$736/month for a one-bedroom unit, \$883/month for a two-bedroom unit, and \$1,020/month for a three-bedroom or larger unit).

For more information on the methodology, see Appendix A on p. 9.

Highlights

Percent of Units Permitted that were Affordable, 2007

- Overall in 2007, there were 2,096 new affordable units (owner and rental units combined) added in the Twin Cities region; 24 percent of all housing built in 2007 was affordable. This was an increase from the 19 percent calculated in 2006.
- 729 new affordable rental units were added. A majority were built in the cities of Brooklyn Park and Minneapolis.
- Twenty-eight percent of all rental units added were affordable. This was a decrease from the 52 percent calculated in 2006.
- 1,367 new affordable owner units were added. A majority were built in developing communities.
- Twenty-two percent of all new owner-occupied housing units added were affordable. This was an increase from the 16 percent calculated in 2006.
- From 1996 through 2007, there were 47,280 new affordable units (owner and renter units combined) added in the Twin Cities region; 25 percent of all new housing added was affordable.
- 9,802 affordable rental units were added, or 31 percent of all rental units added.
- 37,478 new affordable owner-occupied housing units were added, or 24 percent of all new owner-occupied housing units added.

Total New Affordable Housing Permitted in 2007

Overall in 2007, there were 2,096 new affordable units (owner-occupied and renter units combined) added to the Twin Cities region, which means almost 24 percent of the owner and rental housing built in 2007 was affordable. This was an increase from the 19 percent calculated in 2006, though the total number of affordable units fell 5 percent from 2006.

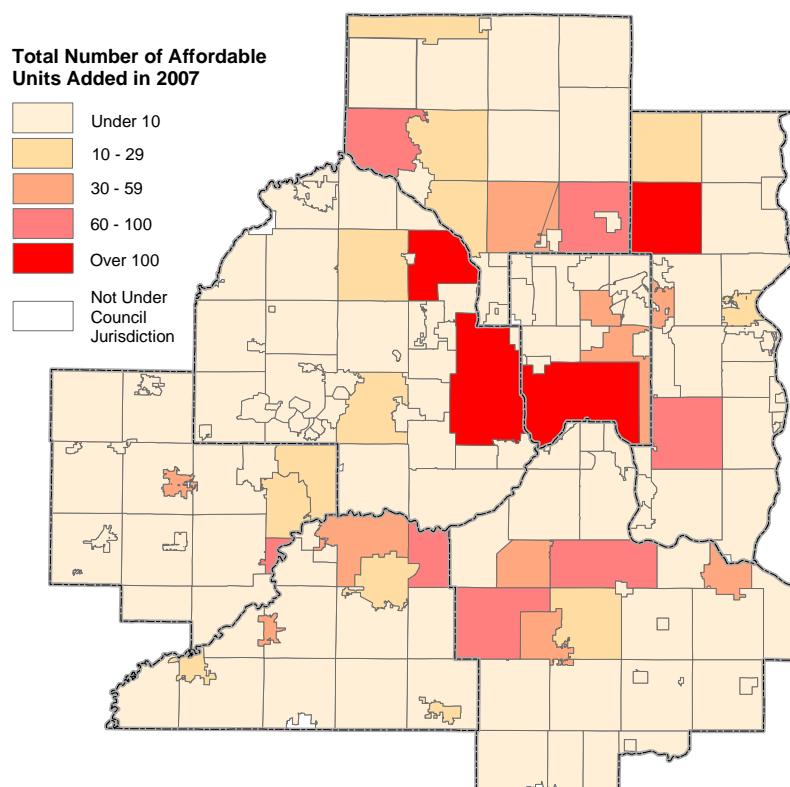

Reflecting overall weakness in new housing construction, 2,096 was the lowest total number of affordable units permitted in the 12 years of the Metropolitan Council's survey.

The majority of the new affordable units constructed (66 percent) were built in the developing communities with 1,381 units being added. The central cities had 305 new affordable units added or 15 percent of the regional total in 2007. The developed communities had 234 new affordable units added or 11 percent of the regional total in 2007. The rural centers had 170 new affordable units added or 8 percent of the regional total in 2007. Other rural communities added 6 new affordable units or less than 1 percent of the regional total in 2007.

The top 10 communities producing combined new affordable renter and owner-occupied units during 2007 were:

Brooklyn Park	379
Hugo	197
Minneapolis	189
St. Paul	116
Rosemount	79
Ramsey	78
Woodbury	70
Lakeville	69
Savage	67
Carver	64

Twin Cities Metropolitan Area Total Affordable Units Added by Community 2007

New Affordable Owner-Occupied Housing Permitted in 2007

Almost 22 percent of the new owner-occupied housing units permitted in 2007 were estimated to be affordable. This increase from the 16 percent calculated in 2006 resulted from the 50 percent contraction in unaffordable construction relative to the 25 percent in affordable construction. Thirty-two communities showed gains in affordable owner units from the previous year with the largest number built in Hugo (197 units).

Of all the new affordable owner units added in 2007 (1,367 units), over 69 percent were built in the developing communities. The fully developed communities contributed almost 13 percent of the total, while the rural centers and central cities added around 9 percent each of the total. Other rural areas added less than 1 percent.

The top 10 communities producing new affordable owner-occupied units in 2007 were:

Hugo	197
Ramsey	78
Minneapolis	75
Woodbury	70
Lakeville	69
Savage	67
Carver	64
Blaine	57
Farmington	57
Brooklyn Park	53 (tied)
Waconia	53 (tied)

2007**

New Affordable Rental Housing Permitted in 2007

Over 28 percent of the new renter-occupied housing units permitted in 2007 were estimated to be affordable. This was a decrease from the 52 percent calculated in 2006. Seven communities showed gains in affordable rental units from the previous year, with the largest number in Brooklyn Park (326 affordable rental units).

There were only 11 communities that produced affordable rental units in 2007. Of the stock of new affordable rental units added in 2007 (729 units), around 59 percent were built in the developing communities. The central cities added around 26 percent of the total, while the developed communities were at 9 percent. The rural centers added 6 percent of the total, while other rural areas didn't add any affordable rental units in 2007.

The top 10 communities producing new affordable renter-occupied units in 2007 were:

Brooklyn Park	326
Minneapolis	114
St. Paul	72
Lino Lakes	60
Vadnais Heights	47
Jordan	44
Rosemount	32
Minnetonka	13
Maple Grove	10

Affordable Rental Units Added by Community
2007

Production of New Affordable Housing, 1996-2007

In their responses to the survey, communities reported permits issued for 186,906 combined new rental and new owner units between 1996 and 2007. Of these, 47,280 were deemed affordable. These units include 9,802 new affordable rental units out of the 31,916 total new rental units constructed, and 37,478 new affordable owner units out of the 154,990 total new owner units constructed.

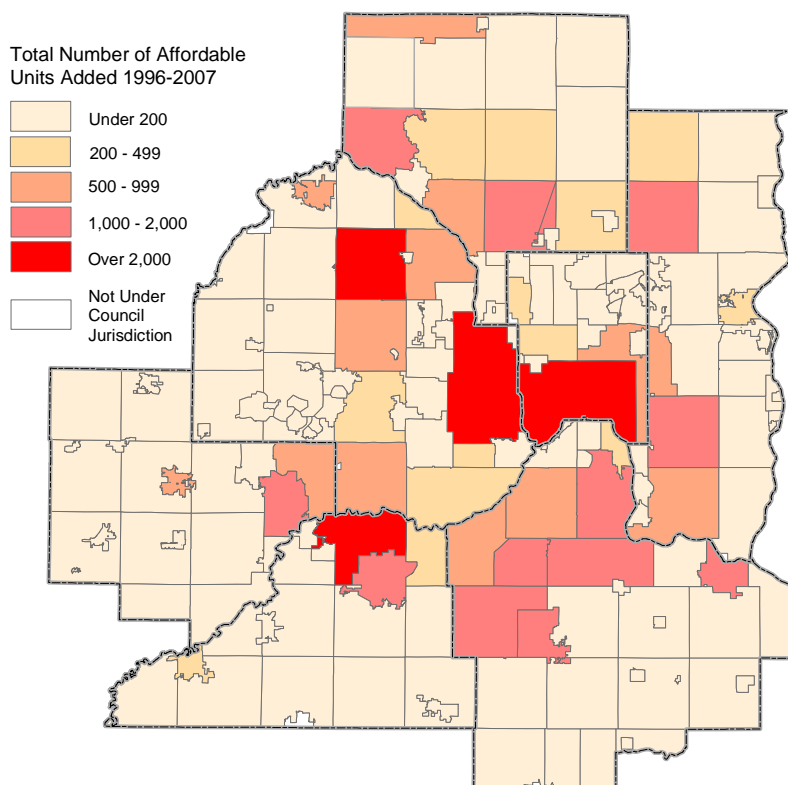

Over twenty-five percent of the new housing units (rental and owner) reported from 1996 to 2007 were deemed affordable.

The majority (60 percent) of the new affordable owner and renter units constructed from 1996 to 2007 were built in the developing communities, with 28,418 units being added. The developed communities had 8,986 new affordable units added, or 19 percent of all new affordable units added. The central cities had 7,092 new affordable units added, or 15 percent of all new affordable units added. The rural centers had 2,163 new affordable units added, or 5 percent of all new affordable units added. Rural communities added 621 new affordable units, or 1 percent of all new affordable units added.

The top ten communities producing new affordable renter and owner units since 1996 were:

Minneapolis	4,686
Shakopee	2,584
St. Paul	2,406
Maple Grove	2,133
Woodbury	1,917
Farmington	1,622
Blaine	1,555
Lakeville	1,522
Inver Grove Heights	1,440
Ramsey	1,266

**Twin Cities Metropolitan Area

1996-2007**

Production of New Affordable Owner Housing, 1996-2007

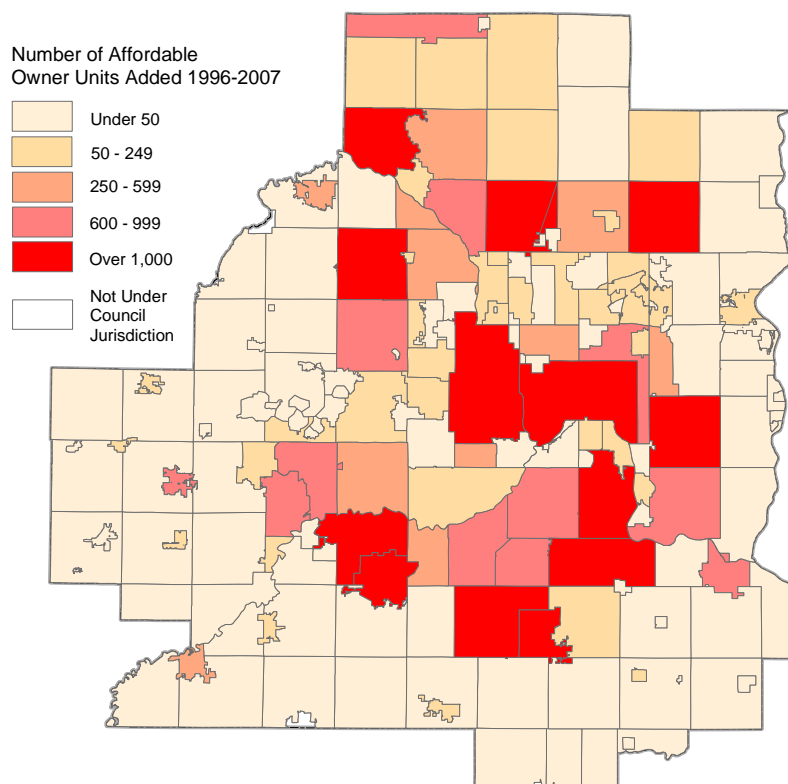

Over 24 percent of the new owner-occupied housing units reported from 1996 to 2007 were estimated to be affordable.

Of all the new affordable owner units added to the region (37,478 units) from 1996 to 2007, 67 percent were built in the developing communities. The developed communities contributed almost 18 percent of the total, while the central cities added 9 percent of the total. The rural centers added 5 percent, and the other rural centers added almost 2 percent of the new affordable owner units during these years.

The top ten communities producing new affordable owner-occupied units since 1996 were:

Shakopee	2,491
Minneapolis	2,087
Maple Grove	1,870
Woodbury	1,816
Farmington	1,546
Blaine	1,421
Lakeville	1,372
Ramsey	1,217
Hugo	1,165
St. Paul	1,160

**Twin Cities Metropolitan Area

1996-2007**

New Affordable Rental Housing Permitted, 1996–2007

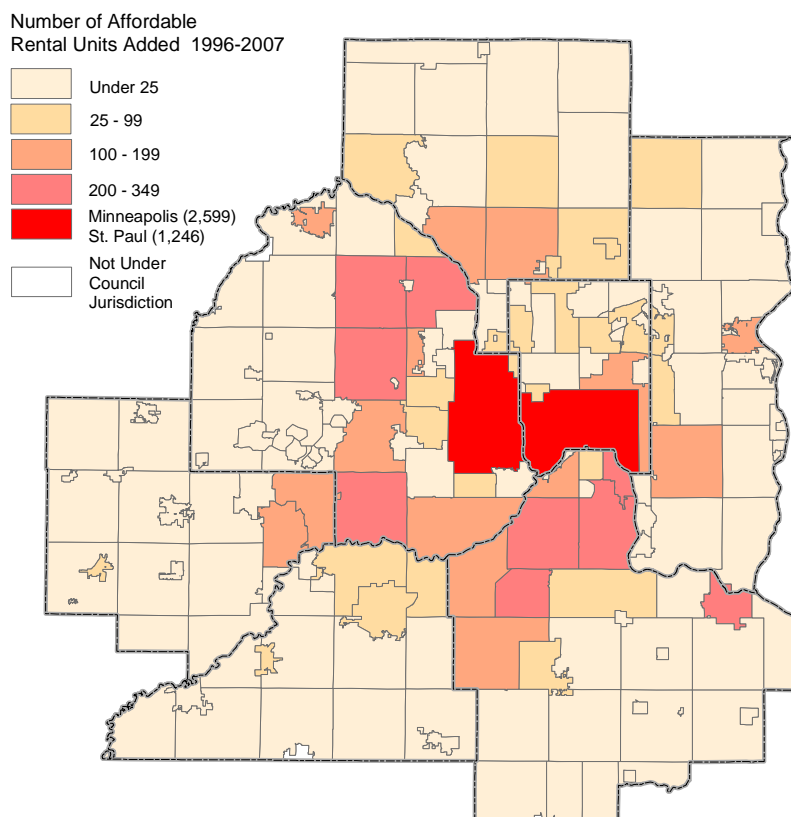

Almost thirty-one percent of the new renter-occupied housing units added from 1996 to 2007 were estimated to be affordable.

Of all the new affordable rental units added (9,802 units) from 1996 to 2007, around 40 percent were built in the central cities. The developing communities contributed about 35 percent of the total, while the developed communities added around 24 percent of the total. Rural centers added around 1 percent of the total, while the other rural communities added a negligible number (less than 1 percent).

The top ten communities producing affordable renter-occupied units since 1996 were:

Minneapolis	2,599
St. Paul	1,246
Brooklyn Park	349
Inver Grove Heights	306
Plymouth	274
Eden Prairie	270
Maple Grove	241
Hastings	240
Apple Valley	216
Eagan	215
South St. Paul	184

Twin Cities Metropolitan Area Affordable Rental Units Added by Community 1996 - 2007

Regional Goals and Production Levels of Affordable Units, 1996-2007

Participants in the Livable Communities Act (LCA) program have negotiated goals that represent the addition of 100,821 affordable units (as of November 2007) for the region by 2010 (84,981 owner units and 15,840 rental units). Even if production continues at the pace it has for the last twelve years, the region will fall short of the goals by about 42,000 units.

These numbers are intended to help communities understand the significant number of new affordable and rental units that would need to be added if they're to achieve their 2010 LCA housing goals. For some communities, these goals may well be unattainable as the overall production of new housing units has decreased. The 8,526 housing units permitted in 2007 was even lower than the previously lowest recorded total in 1975, which had 8,710 units permitted that year. However, the negotiated LCA goals numbers are a useful reminder that communities should facilitate efforts to develop medium and high density multifamily homes that offer the greatest opportunity for affordability and life-cycle housing choices.

Affordable Housing Units	New Affordable Units Reported, 1996-2006	New Affordable Units Reported, 2007	Total New Affordable Units Reported, 1996-2007	Total Production Projected through 2010 (assuming production at average 1996-2007 levels)	1996-2010 Goals
Owner-occupied	36,111	1,367	37,478	46,848	84,981
Renter-occupied	9,073	729	9,802	12,253	15,840
All	45,184	2,096	47,280	59,101	100,821

If the production of owner-occupied units continues at its historical pace, which, given the current market conditions is highly unlikely, the region's communities will fall short of their negotiated LCA goals of nearly 85,000 owner-occupied affordable units by about 38,000 units. The region would have to add around 16,000 affordable owner-occupied units each year from 2008 to 2010 to reach the negotiated affordable owner-occupied goals; this would be nearly three times the region's overall housing production in 2007.

If the production of rental units continues at its historical pace, again which, given the current market conditions is highly unlikely, the region's communities will fall short of their negotiated LCA goals of 15,840 affordable rental units by about 3,600 units. The region would have to add around 2,000 affordable rental units each year from 2008 to 2010 to reach the negotiated affordable rental goals; this would be nearly three times the affordable rental production of 2007.

Appendix A. Data Sources and Definitions

Data Sources

Metropolitan Council's Annual Residential Construction Survey: The Metropolitan Council conducts an annual survey of each city and township in the Twin Cities to track the number of units by type (single-family, townhouse, duplex and multi-family) that are permitted. This survey includes questions about units that have been removed from the housing stock each year. The building permit survey has nearly a 100 percent response rate.

Housing Production Survey: Data on the number of new permitted units that are affordable and the number intended for owner or renter occupancy are collected through the Metropolitan Council's annual Housing Production survey.

Other Sources: The Metropolitan Council utilizes various sources of data to monitor residential building activity. In addition to the Annual Construction Survey and the Housing Production Survey, other sources of data include monthly residential building reports from the U.S. Department of Commerce, sales of existing units from the Minneapolis Area Association of Realtors (MAAR), rental data from Minnesota Housing, GVA Marquette and the Dakota County Community Development Agency (CDA).

Methodology for Identifying Affordable Units

Each year, respondents to the survey are asked to estimate how many of the new units built in their jurisdiction meet the council's affordability. Some are able to provide sale price information, but others cannot.

In 1996 and 1997, many communities filling out the survey utilized building permit valuations as indicators of affordability status. These valuations were readily accessible for the communities, but they often excluded the price of lots, and some finishing costs, such as landscaping and wall and floor coverings. Therefore, the building permit valuations did not represent the value of the housing unit.

In 1998, communities completing the survey were asked to add an average lot price to permit valuations in order to estimate the final cost. While these adjusted costs were not exact, they more closely reflected the market value of new homes. This practice of applying an additional lot price to the permit value was applied until 2001.

Beginning in 2002, county assessor data were used to estimate the price of each new housing unit added. The county assessor data contain many attributes regarding residential and commercial properties, including the selling price or market value of each housing unit within the county. The selling price was used first, and if it was not available, the market value was then used. These two attributes were used extensively to establish whether a unit met the affordability threshold or not.

Starting in 2004, the Minnesota Housing's Tax Credit Programs–Funded Developments data and HousingLink's Housing Counts were used to estimate the number of affordable rental units added. These databases include many attributes including the total number of tax credit units by municipality, development name, project type, and project inception date. These fields were used to validate the number of rental units that met the affordable rental thresholds.

In general, these affordable housing numbers can be fluid from one year to the next. Changes in the numbers are reflective of not only market activity but also the input of new data sources. As new data sources become available, better quality of data can be presented in this report.
